## GREETING OF AUTHOR

Baldur's Gate is a game which absorbs me since I have played it the first time. Over and over again there is new to discover or other play variations are possible.

When some years ago internet was absolutely new for me and I had established an internet connection for the first time, I have searched of course also for a walkthrough for Baldur's gate. On this occasion, I came on the page <http://www.baldurs-gate.ch/> and found a tip to the Mod DSotSC for the first time. Later I tried to install BG1 together with DCotSC and TGC1 - and crashed sometime to the desktop. Since then I was again and again in search for solutions for the conflicts and found thereby more and more mods - TDD, SoS, CtB. All of them had been in English only and mostly unknown in Germany and I longed for playing these mods in German. Hence, I began in the year 2005 with translation of some of the big mods and then brought to life the Baldur's Gate Trilogy Translation Project.

Sometime I stumbled upon a clue to BP and BGT (non WeiDU). When these appeared then in a WeiDU version, the conditions for bigger megamods were created. After erebusant has published his first megamod instructions, I began after careful analyses of the single mods with the development of my own megamod with reproducible instructions whose most current version you have now before yourself.

Most of the other megamods have always failed up to now because of the fact that the players have thrown together a few mods haphazardly. However, decisive for a functioning megamod the right combination of the the mods in a specific sequence. Also it is as important to solve a problem at the root and not only to remove the symptoms as it was mostly done before. See in addition also this contribution:

<http://forums.blackwyrmlair.net/index.php?s=&showtopic=4018&view=findpost&p=33478>

Now, with a clearly structured and uniform composition it is possible that also other experienced players with knowledge in programming are able to develop patches that can be used by all the other players that play the **B&G World Megamod**.

The **B&G World Project** is an extensive package with instructions, downloader, installer, bug-fixes and text-patches in various languages, that allows a smoothly and faultless installation.

However, the **B&G World Project** is (still) not perfect because also the mods are (still) not perfect. But a basis on which all necessary improvement can be carried out efficiently is created.

Thanks all modders, cooperators and players who have contributed by your many tests, vigorous support, advice and bug-fixes to the advancement of the **B&G World Tools** to his current form and have encouraged me over and over again to go on working in this mammoth project.

I wish you a lot of fun with your **B&G World Megamod**.

## INTRODUCTION

After the release of Baldur's Gate II: Throne of Bhaal (ToB), some players didn't want the adventure to end and took it upon themselves to write new modules and modifications ("mods"). These mods could be installed on top of Baldur's Gate and added new NPC's, new areas, new equipment, and most important, new adventures.

With the WeiDU-Installer and the BGT-WeiDU Mod it is now possible to play Baldurs Gate with not just one or two other mods, but to combine the majority of mods created up until now into one single epic game.

With the Baldur's Gate Trilogy - WeiDU (BGT-WeiDU) mod you can customise your BG game world as you like:

1. You can play BG1 and BG2 with a selection of the available mods.
2. You can play BG1 and BG2 with only some NPCs to be able to take them into your party.
3. You can play BG1 and BG2 with additional quests.
4. However, it is also possible to install all existing mods for a huge, unique playing experience. These instructions are intended for this type of megamod installation.

The **B&G World Project** aims to merge the games of the Baldur's Gate series and the additional contents created by its community into one epic adventure, including a modification of BG1 to run BG1 with the more modern engine of BG2, plus the added functionality of ToB expansion.

Now new functions introduced in BG2 are also available for BG1. This means, BG1 utilises the same graphic art as BG2, the same character kits, the same magic and the same rules. This provides even those who know BG1 off by heart with a new playing experience. Included is a transition from BG1 to BG2.

The **B&G World Project** is constantly going through changes to acquire a more stable and bug free version with every new update. Over time, most mods that currently are existing for Baldur's Gate were added to the manual and will be installed in the right place by the **B&G World Installpack**. The number of modifications may be overwhelming and the goal is NOT to install them ALL but to provide a base frame for a megamod installation to combine the mods that you want at their best regardless of their rating. Pick and choose which mods you want to play, some are better, some are worse, some are overpowered and others are not compatible. Bear in mind the more mods you install, the greater the risk that conflicts, undiscovered up until now, will appear.

When you install too many mods you may get too many quests to solve. This causes that you visit already explored areas several times and talk with the same people again. Every time you travel you always get ambushed and it starts to become annoying when you travel so much.

**Please note:** The **B&G World Project** is meant only for the classic version of BG1 and BG2 and not for the enhanced edition. Read more about this in the chapter **BG classic vs EE**.

For a satisfying game you first should make your own choice of appropriate quests and NPCs and add tweaks, items and spells only with caution. With many tweaks you can easily get an unbalanced game that spoils the gaming experience.

Many developers try for a stable "core" of the big mods together with BGT and BP which can then be complemented with a wide range of smaller mods.

When installing additional smaller mods or NPCs it is strongly recommended to obey the installation instructions instead of installing haphazardly. Many of the mods for instance, are compatible in one specific order but not in another, and many of the particular components are conflicting, in particular the tweaks. The reason for this is that most mods were developed as sole extensions for BG1 or BG2. At that time none of the modders conceived of a megamod installation. Therefore, especially some of the older mods simply replace one or several files with their own. Then the next mod cannot find the necessary files because they have already been changed.

This order takes into consideration all interactions known about at this point. The whole installation procedure by using the **B&G World Installpack** is faultless. That does not mean however, that the mods themselves are faultless.

You do not need to read the whole guide! **Read carefully the chapters 1 - 3 and then let's go!** The detailed instructions in the next chapters are intended for reference in the event that you want to change something or to see what happens and why.

## HARD DISK

The hard disk should be formatted as NTFS, not as FAT32. The number of files in the override folder for a full installation of BWP exceeds the limit of the FAT32 system to max. 65 534 files!

If your computer is equipped with a second hard drive then install BWP there. The installation on the second hard disk is much faster (in my case in less than half the time!)

The full installation requires more than 50 GB of hard drive space and temporary 2.54 GB for Baldur's Gate I. Note that afterwards still 15% of the disk should be free to allow the operating system to function properly.

## RAM

A few mods (Stratagems for example) need up to 4 GB RAM. Windows XP can only address max 2 GB RAM despite with how many RAM your computer is equipped.

So you need at least the Windows 7 operating system (64 bit recommended). Your computer must be equipped with more than 4 GB RAM. Set your virtual memory at least on doubled the size of your installed RAM.

If you have Windows 7 32 bit installed you must remove the 2 GB limit with the patch from here:

<http://www.unawave.de/windows-7-tips/32-bit-ram-barrier.html?lang=EN>

Note: As long as the DDR limit is unlocked, the Windows update does not work.

## INSTALLATION PATH

(will be executed by the **B&G World Installpack**)

BGII will be installed into the directory "C:\Program Files\Black Isle\BGII - SoA" (without quotes) by default. As of BWPv10.1 you can install BG2 at any other location and rename the folder as desired. The **B&G World Installpack** checks the installation of the main directory and corrects the paths in the baldur.ini.

**Windows Vista** and **Windows 7** are using a security feature that protects the programs which are installed into Program Files folders (including x86 on 64-bit systems) from being altered after the install is complete. This is an issue for older games like Baldur's Gate because they want to create and edit save games and settings files within the game's installation folder, which the security feature is preventing you from doing.

You will either need to disable UAC while running the **B&G World Installer** (you can enable it again afterwards) or better install the game outside of the Program Files folder (for example C:\Games\...).

In any case you change the default directory you need to adjust the baldur.ini inside the main directory. Open it with a text editor. You will find below [Alias] the pathnames like this:

```
HD0:=C:\Program files\Black Isle\BGII - SoA\
CD1:=C:\Program files\Black Isle\BGII - SoA\CD1\
CD2:=C:\Program files\Black Isle\BGII - SoA\CD2\;C:\Program files\Black Isle\BGII - SoA\CD2\
CD3:=C:\Program files\Black Isle\BGII - SoA\CD3\
CD4:=C:\Program files\Black Isle\BGII - SoA\CD4\
CD5:=C:\Program files\Black Isle\BGII - SoA\CD5\
```

Make sure that the listed pathnames are identical with the real pathnames and rename them if necessary.

## CLEAN INSTALL - CD AND DVD VERSION ONLY

Install Baldur's Gate with all components (all check boxies activated).

Install the extension TotSC legends of the sword coast with all components.

Install the patch 5512.

**DO NOT install Baldurdash and DO NOT install the TOSC DirectX 8+ Patch!**

OR:

Install Baldur's Gate: The Original Saga with all components (all check boxies activated)

Install Baldur's Gate II - Shadows of Amn with all components (all check boxes activated).

Install the extension Thrones of Bhaal with all components.

Install the patch 26498.

**DO NOT install Baldurdash and DO NOT install the Patch 26499, as it's likely to make your game uncompletable!**

Check that the movieCD5.bif file is in your Baldur's Gate\movies folder. This file is not copied with some DVD versions. The absence of this file causes a crash to desktop when you enter the city of Baldur's Gate. In addition, some mods cannot be installed. Copy the file movieCD5.bif from the DVD from the folder ...\\CD5\\movies into the movies folder.

As of BGT v1.15 this mod fixes the problem occurring in some languages with the missing sound files. Therefore, these files must not be added as before by yourself any more.

## CLEAN INSTALL - GOG DIGITAL VERSION ONLY

Install Baldur's Gate v1.3.5512

Install Baldur's Gate II v2.5.26498.

**DO NOT install any Patch! They are included already in this version.**

The default directory for BGII using gog.com is: "...\\GOG.com\\Baldurs Gate II" (no quotes). Therefore, the directory name needs to be changed to "BGII - SoA" (a space before and after the hyphen).

(Not needed when using the **BiG World Installpack** as of v10.1).

You must also change the Baldur.ini. Open it with a text editor. Under the line "alias" you will have to change the lines for HD0 and CD1-CD6 to reflect the proper path to the directory. (will be executed by the **BiG World Installpack**)

## CONFIGURATION OF BALDURS GATE

### Higher resolution

If you have a large enough monitor you can choose to see a larger amount of the map in your screen window by using a higher resolution. Double click the file BGConfig.exe in your BGII - SoA folder. With graphics options select the highest resolution; 1024 x 768 and in window mode choose full image.

## SHORTLY PLAY THE GAME

(not required when using BiG World Installpack)

You should begin a game as a precaution. By doing this, registration files are adjusted which are taken over later by the installation. If you leave this step out, you may find later that you cannot begin the game because of the missing entries.

Start Baldur's Gate and adjust your settings. Take in any prepared character. It is only a test!

Start a game and as soon as you can, press the "Q" key for a quick save.

Quit the game.

Start Shadows of Amn. Take in any prepared character. It is only a test!

Start a game. A score will be saved automatically.

Quit the game, when the dialogue with Imoen is finished. (The answers make no difference for the test.).

Start Throne of Baal. Take in any prepared character. It is only a test!

Start a game. A score will be saved automatically.

Quit the game as soon as you can do so.

### DOWNLOAD OF THE MODS

Download all the mods you are interested in, into a separate folder that you name BiG World Downloads. The **B&G World Installpack** extracts all mods out of this folder into your BGII - SoA folder regardless of their file format (even if they are wrapped in NSIS).

During the Installation some fixes and patches are required. All needed files (patches and fixes) are included in the folders **B&G World Fixpack**, **B&G World Textpack** and **B&G World Installpack** which can be downloaded at the same site as these instructions:

<http://www.shsforums.net/index.php?automodule=downloads&showcat=72>

<https://baldurs-gate.de/index.php?resources/categories/big-world-projekt.4/>

Copy the whole content into your BGII - SoA game folder.

### EDITING THE FILE BALDUR.INI

(will be executed by the **B&G World Installpack**)

#### Activate Cheats

Backup the existing baldur.ini file in the main SoA directory ensuring that the extension of your backup file is no longer .ini; for example, rename baldur.ini to baldur.bak.

Open the file baldur.ini in the BGII-SoA-folder with an text editor

Add below [Program Options] as the last line: "Cheats=1" (without quotation marks). Then you can open in the game with STRG+Space or CTRL+Space (according to keyboard) a dialog window and enter Cheats.

Add below [Program Options] as the last line: "Debug Mode=1" (without quotation marks). Then you can use STRG+Space or CTRL+Space (depending upon your keyboard layout) to open a dialog window from within the game and type in Cheats.

You will find Cheats in the chapter "Cheat keys / console commands".

#### Activate blood patch

*(only in some countries where it is disabled for juridical reasons)*

Below [Game Options], add "memory access=100" (without quotation marks) as the last line. You receive an additional button in the settings to switch blood on/off.

#### Activate Errorlog

Below [Program Options], add "Logging On=1" (without quotation marks) as the last line. If it should happen, that your game crashes unexpectedly, then these data can be helpful for the BWP-support-team at troubleshooting.

## AVOID PROBLEMS

**Although the whole installation is well documented, on account of his complexity and the many patches during the installation it is nearly impossible to install this megamod by hand. Please, use instead of this the installation files!**

Using these batch files means mods can be automatically installed as per my guide. You just need to double click the batch files. Besides, you save a lot of time!

**The installation process lasts several hours. Take the following precautions to avoid strange things happening which can break your installation.**

Disable your antivirus program and any unnecessary programs that are running in the background because otherwise the installation will last much longer (up to several hours). In addition, possible sources of error are excluded (some errors in the installation can be caused by a virus scanner for example randomly some files may get lost or damaged). Deactivate automatic updates for your operating system. Reboot your computer. If you use windows defender antivirus it needs to be disabled after every reboot, it simply does not stay disabled without brute force.

Make absolutely sure that the folder in which you run the current installation is named BGII - SoA. Some mods read the path stated in the baldur.ini which is registered there with the installation of BG2. If the current directory does not agree with the path registered there, the installation will fail.

Installation of mods such as Tweaks Anthology, Mid\_BiFF, End\_BiFF, Ding0's Experience Fixer, BGT-NPCSound-WeiDU is extremely memory-intensive! **To avoid a system crash, adjust your virtual memory to a minimum value of 2 GB.**

**TAKE YOUR BG CD OR BG DVD OUT OF YOUR DISK DRIVE BEFORE YOU CONTINUE! You should also have no other CD in your disk drive!**

WeiDU's autoupdating not always working right from time to time. You may have a virus alert or it breaks off. Both does not happen when you use the Install.bat.

## SPECIAL CASE WINDOWS VISTA

Open the Start menu and write into the search field "cmd.exe"

Right-click on "cmd.exe" and select "Administrator" in the context menu.

A command line window opens.

Write into the line C:\Windows\system32> behind the arrow the directory where you had installed the megamod:

cd "\\Program Files\Black Isle\BGII - SoA" and press Enter.

Then write into the line C:\Program Files\Black Isle\BGII - SoA> behind the arrow "BiG World Install v6.bat" (the version number could have also changed) and press Enter.

Now the installation starts normally as also under other Windows operating systems.

Please look at the introduction video: <http://kerzenburg.baldurs-gate.eu/files/BGT-Vista-en.htm>

## DISABLE PROGRAM COMPATIBILITY

Disable Program Compatibility Assistant in Windows 7

1. Click on Start and type in services.msc, hit enter.
2. Scroll down the list in the window that appears until you see program compatibility assistant service.
3. Highlight the service.
4. Right click on it and select properties.
5. Next to startup type, select disable.
6. For service status, select stop.
7. Hit apply.
8. Hit OK.

Please be advised that Windows 10 operating system will receive frequent hardware driver and software updates following its release; this may affect game compatibility.

You need to have full admin privileges to be able to run the BWP batch program correctly otherwise several mods fail to install.

With Windows 10 you need to install the game into your owned folders if you use the C drive, the other drives are free from this restriction. The folder in C drive follows this structure: C:\Users\<user profile>\Games\BGII - SoA\ ...

## INSTALLATION WITH THE B&G WORLD INSTALLPACK

Once you start the **B&G World Install.bat** by double-clicking a dialogue begins that leads you through the configuration. The program checks the prerequisites for the installation. If necessary, you will be prompted to add the missing files.

You can choose your game (BGII or BGT), the type of mods (quests, NPCs, items, tweaks and so on, the difficulty and much more. When occurring incompatibilities, the program offers solutions. You can also select under various compilations recommended by players or you can use your previously created own selection.

Then the entire **B&G World Megamod** will be installed according to the **B&G World guide** and according to the settings. Missing mods will be simply skipped.

The **B&G World Fixpack** and the **B&G World Textpack** will be started by the **B&G World Installpack**.

The real installation is terrifically simplified by the **B&G World Installpack** and the installation time is drastically reduced by many hours. Nevertheless, the installation of all components, as described in the instructions, takes more than 15 hours. *These times refer to a computer with 2.66 GHz and can vary according to PC.*

**Note:** The **B&G World Installpack** is designed to install all the mods that are existing in your BGII folder. For a satisfying game you should make a choice before and not throw unhesitatingly all the mods into the BGII folder. The more mods you install, the greater is the risk that conflicts, undiscovered up until now, will appear.

The automated installation without any backups is intentional! At several steps single files get copied into the override folder. WeiDU cannot handle this. So, if you feel the need to change your installation, please don't try un-installing and re-installing, but install the whole mod from scratch! Trust me - it's safer!

**Note:** The **B&G World Installpack** not only installs mod after mod, but also restores continuously missing entries in several IDS files. Without this feature you would get "parse errors" with some mods and the installation of many components would fail. For this reason I strongly advise against installing manually!

## EDITING THE BATCH FILES

However, possibly you want to install not all given mods and components. You can change the batch file quite simply individually. Read in addition the file **B&G World Installpack read me.txt** in the folder **B&G World Installpack**.

The following main part describes in detail the installation of the individual components. With the help of this guidance you can create your own Megamod.

**Note:** All these tools will work with Windows NT/2000/XP/Vista/Windows7, however not with Windows 98.

# ***THE B*i*G WORLD***

Entire installation instructions for the Baldur's Gate Mega-Mod

by Leonardo Watson

The **B*i*G World Project** merges the games Baldur's Gate 1 and 2 with as many other mods as possible, into one single epic Baldur's Gate World which you can play continuously with the more modern engine of BG2.

This guide provides step-by-step instructions on installing the more than 400 separate mods.

First the remaining bugs in BG2 must be fixed and some corrections should be done. You should install these mods (all but Oversight and Key Names) in any case, even without a mega-mod mod.

### 1.12 Vlad's Compilation v2.1 (1)

~SETUP-VCV21.TP2~

**NOTE:** This mod must be installed in three steps! The Baldurdash components 0, 1 and 2 must be installed before the Item Revisions main component but the component RESTORED DAK'KON'S BLADE should be installed only after it!

TS must be installed after the BP core component but before NEJ!

If you are not going to install Tortured Souls or Keldorn Romance from Vlad's Compilation or the Never Ending Journey mod you should better use the Baldurdash v1.75 mod

**For full description see step (2)**

Copy the folders **Custom Portraits**, **NeJE**, **override**, **ReadMe** and the files **NeJEAreasSounds.bat**, **oggdec.exe**, **Setup-VCv10.exe**, **Setup-VCv10.tp2** and **tisunpack.exe** into your main SoA directory.

### 1.14 igi's Key Names v2

~IIKEYNAMES/SETUP-IIKEYNAMES.TP2~

The Key Names mod simply alters the names of key items used in ToB to indicate whether they have been used, or are yet to be used, depending on the state of the door they are intended for.

*iikeyNames can only be installed as long as the 2da files are three-columned, that means only before the big BG2 mods.*

**NOTE:** Party AI must be enabled for this mod to work correctly.

These mods enhances BG2 with many new quests as well as additional characters, items and spells. The **BIG-World** is more than doubled by hundreds of new areas.

BGT takes corrections to the mods CtB, TDD, SOS and BG2 Fixpack. Therefore, these mods must be installed before BGT! The files get biffed automatically at the end of the installation. Therefore a simple deinstallation with WeiDU is not possible.

Due to their complexity the mods until today are not yet bug-free. A general problem of the big BG2 mods (NEJ, TDD, SOS, RED, CTB) is that they all use files from IWD, but these were not renamed and if for example a quest item of TDD has the same file name as a quest item of NEJ, of course, this leads to complications. You will most likely run into problems in some places and will have to use the CLUA console in order to be able to further-play. For beginners, these mods are not recommended.

## 2.1 The Darkest Day v1.14

~SETUP-TDD.TP2~

This big mod adds 5 new major quests and more than 40 smaller quests, 10 NPCs, 39 new creatures, 75 kits, more than 180 items and more than 170 spells to SoA and ToB. To start the biggest Quest in TDD, you must talk with Forp.

*Either install TDD before BGT in order to have NPCs imported from BG1 that receive the quests offered by TDD or install TDD after BGT to give TDD NPCs their quests function.*

*TDD completely alters Ellesime's dialogue in a way that makes it incompatible with Ninde.*

*This mod is neither compatible with the NEJ3 component "Firewalker" Shar-Teel (custom kit and continuous character) nor the the Shar-Teel mod.*

*The BG1NPCSoA components "Kagain's Corner" and "Xzar and Monty Murder Mysteries" from BG1NPCSoA v6 will remove Kagain, Xzar and Monty from TDD to avoid that you get these NPC's twice. This mod is not compatible with the Kivan component from BG1NPCSoA because you would get Kivan twice.*

*TDD is adding too many new spells and filling every single available slot in spell.ids. The engine puts a limit on the number of spells that can be available on each level. As a result the IWDification component "IWD Divine Spell Pack" cannot be installed along with TDD.*

Copy the folder **TDD** and the files **Setup-TDD.exe** and **Setup-TDD.tp2** into your main SoA directory.

**TDD requires the worldmap file already extracted otherwise installation does not progress at all.**

### 2.3 Baldur's Gate Trilogy v1.22

~BGT/BGT.TP2~

With this mod Baldurs Gate I and the Legends of the Sword Coast are integrated into the game to play BG I with the more advanced engine of BG II and to create a transition from the Legends of the Sword Coast to Amn. Besides, BGT takes corrections in the mods NeJ, CtB, TDD, SOS and TS. In addition, BGT repairs the problem caused by the BG2 Fixpack that SoA play cannot start after transition.

*Other than earlier versions of BGT the baldur.ini in the directory Baldur's Gate needs no more to be edited.*

*As of BGT v1.08 this mod includes the Dudleyville Fixes.*

*As of BGT v1.15 this mod fixes the problem occurring in some languages with the missing sound files. Therefore, these files must not be added as before by yourself any more.*

*As of v1.22 BGT is no longer compatible with High quality music and maybe a few other mods.*

*This mod patches the BGMain.exe.*

Copy the folder **BGT** and the file **Setup-BGT.exe** into your main SoA directory.

**Make sure that no CD or DVD is in your disk drive!**

Not with GoG Digital Version:

**Check whether the file MovieCD5.bif exists in the folder ...\Baldur's Gate\movies. It can't be installed afterwards because these files get biffed into the file BG1MOVIE.bif in the directory ...\BGII - SoA\data.**

Double-click the Setup. The DOS dialogue appears:

```
Choose your language:                                0 [English]

The readme opens.
Installation complete. Press any key . . .                Press ENTER
```

*Up to v1.21 the folders **GUI\_Mods** and **music** as well as the files **Setup-BGTMusic.exe**, **Setup-BGTMusic.tp2**, **Setup-GUI.exe** and **Setup-GUI.tp2** are created during installation. These files are used only later. As of BGT v1.22, BGT Music will no longer be a separate installer, but a component of the core package. Mods checking for bgtmusic.tp2 will have to be updated (eg 1PP HQ Music and Revised Battles). Hopefully it will be maintained even*

further. *Don't use v1.22 if you want to install 1PP HQ Music.*

**Fault recovery at the installation of BGT-WeiDU** (stored from v1.02, should no longer be needed)

During the installation under Windows XP the known error message of the operating system may appear three times: "tis2bg2.exe or \_WeiDU.exe has ascertained a problem and must be finished. This problem appears when a CD is in the disk drive. Unfortunately, in this case you must uninstall again BGT immediately after installation is finished (don't use reinstall).

If the deinstallation is complete, you must restore again manually the Dialog.tlk and DialogF.tlk from the folder BGT\dialog.bak.

Take the CD out of the disk drive.

Start at the scratch again. Now according from experience the renewed installation runs without problems.

If you have already experimented several times with the installation, in particular if you have copied and deleted the BGII - SoA folder, it may happen that BGT-WeiDU asks you during installation to insert a data carrier in your disk drive. By no means insert a BG game, but any other CD (a audio CD or a blank disk is even sufficient). Then continue with the installation.

Start at the scratch immediately afterwards again.

**Continue with the other installation only when your BGT-WeiDU has installed perfectly.**

### 2.4 Baldur's Gate Graphics Overhaul for EET v2.00

~BGGOEET/BGGOEET.TP2~

This mod complements the extended night areas that are missing from all main areas except Baldur's Gate and adds the missing night minimaps to all main areas. It also fixes around ninety percent of the visual stupidities in Baldur's Gate city. These ranged from windows showing at night and not in the day (or vice versa) to whole buildings that changed from nicely maintained habitations during the day to complete derelicts as the sun went down. It gives all of the wall braziers their missing flames. Finally, almost all of the nasty blue and purple patches have been removed from the streets.

*This mod substitutes the former and no longer supported "Baldur's Gate Trilogy Graphics Overhaul". It also works fine with the classic BGT Trilogy!*

*Install this mod before any other mod that makes changes to the BG1 areas because otherwise the game will crash when you enter these areas!*

Copy the folder **bggoEET** and the file **setup-bggoEET.exe** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

### 2.5 Jondalar Fix for BGT v1.1

~SETUP-JONDALARFIX.TP2~

*This fix is not needed if Jarl's BGT Adventure Pack will be installed.*

As of BGT-Weidu version 1.10, Jondalar's dialog contains a trigger error that allows for an exploit. This mod fixes that exploit.

Copy the folder **JondalarFix** and the files **Setup-JondalarFix.exe** and **Readme-JondalarFix.txt** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

Install Component	0 [Jondalar Fix for BGT]?	[I]Install

### 2.6 MKs BG2Textpatch Revised v3.4 (2)

~SETUP-TP.TP2~

*only for German users*

### 2.7 BGT-NPCSound-WeiDU v3

~SETUP-BGT-NPCSOUND.TP2~

only for German users

### 2.8 Restored Textscreen Music v9

~XTMUSIC/TXTMUSIC.TP2~

This small modification simply restores, and makes more consistent with the text, the music that is heard during the prologue textscreen in Baldur's Gate, and also restores the dreams' music.

*This mod consists of two components: the Core Installation Package and the Language Pack which you must download apart.*

Copy the folder **TxtMusic** and the file **Setup-TxtMusic.exe** into your main SoA directory.  
Copy the content from the **English Language Pack** into the folder ...\\TxtMusic\\Language\\English.  
Double-click the Setup. The DOS dialogue appears:

Successfully installed	[Restored Textscreen Music for BG1TuTu, EasyTutu, and BGT-WeiDU]	Press ENTER to exit

The readme opens.

### 2.9 Check the Bodies v3.0

~CTB/SETUP-CTB.TP2~

This are more than 20 independent quests. Dozens of class specific quests, items, spells, and even the unofficial mod Company of Eight is included. 450 creatures, 275 spells, 160 areas, 15 new areas, 25 stores, 24 quests, 11 new creatures, 6 new songs, 1 new NPC, 1 new town and 1 film. The mod starts with own tutorial. During four days are to be solved one quest each day. After that the regular BG2 game begins.

*The new revision of CtB needs to be installed after BGT, not before.*

*There is an incompatibility between NEJ and CtB in the kind that a small number of creatures uses the same animation what looks a little bit funny. This problem will be solved with "Infinity Animations".*

*This mod is not compatible with the component Continuous and Custom Kit Imoen from Vlad's Compilation because in spell.ids both of them use the same literal number for different symbolic identifiers.*

Copy the folder **CtB** and the file **Setup-CtB.exe** into your main SoA directory.  
Double-click the Setup-CtB.exe. The DOS dialog appears:

### 2.10 Check the Bodies Cutscene Improvement

~SETUP-CTBCUTIMP.TP2~

As the cutscene is supposed to be a flashback of BG1's happenings this little mod gives the characters involved armor and items they can wear.

The **B&G World Fixpack** copies the folder **CtBcutImp** and the file **setup-CtBcutImp.tp2** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

Install Component	0 [Check the Bodies cutscene improvement?]	[I]Install

### 2.11 TethyrForestPatch v3b

~TETHYRFORESTPATCH/SETUP-TETHYRFORESTPATCH.TP2~

The original cave in the Forest of Tethyr was being changed by CtB. The mods TS and Tashia still used the original cave for quests and scripts. This mod creates a new entrance to the cave that is achievable for all the mods without CLUA console.

Copy the folder **TethyrForestPatch** and the files **Setup-TethyrForestPatch.exe** and **Setup-TethyrForestPatch.tp2** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

Choose your language:		0 [English]

### 2.12 Region of Terror 4.0

~ROT/SETUP-ROT.TP2~

The mod puts in Drizzt and his companions as playable NPC's and you'll be able to play with him through the old and new quests. The mod includes more than 10 new big and other 20 smaller tasks and adds four new towns / villages as well as an arena in which you can fight for premiums. Hundreds of new items, new spells, 10 new NPCs, more than 20 new kits, more than 160 new areas, a modders house (to reach with code) 30 - 40 hours of additional playing time.

*The new revision of RoT needs to be installed after BGT, not before.*

Copy the folder **RoT** and the file **Setup-RoT.exe** into your main SoA directory.

One or more files of this mod must be changed. This will be done by the patch from the folder **B&G World Fixpack**.

Double-click the Setup. The DOS dialogue appears:

*If the Region Of Terror Kit Pack component is selected, 20 kits will be added to the game: 3 fighters, 3 rangers, 2 paladins, 4 clerics, 3 druids, 3 thieves and 2 bards to the game.*

*The kits are: Holy\_Swordsman, Lancer, Shadow\_Walker, ElementWarrior, WoodProtect, Singer, Auril, Deneir, Lovi-atar, Doombringer, Samurai, Trail\_Tracker, Silent\_Hunter, Snare\_Master, Harpist, Drifter, Knight, Dark\_Paladin, Planar\_Druid, Wisher, Aerial\_Druid.*

***If you install this mod together with Drizzt Saga, you should also install The One Drizzt!***

### 2.13 Resource Fixer v1

~SETUP-RES\_FIXER.TP2~

Some macros designed to fix various structural errors in creatures, items and spells. It's necessary to get BP to install.

The **B&G World Fixpack** copies the folder **res\_fixer** and the files **setup-res\_fixer.exe** and **setup-res\_fixer.tp2** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

Install Component	0 [Resource Fixer]?	[I]Install
Successfully installed	[Resource Fixer]	Press ENTER to exit

**2.14 Big Picture v1.81 4611 (1)**

~BP/SETUP-BP.TP2~

BP balances all mods installed before, contains several smaller mods and includes other improvements also as a unique hostile KI system. If several mods have changed the same objects, these are overpowered. BP compensates this again.

**NOTE:** This mod must be installed in two steps! The BP component #2000 (Ascension for BP) and thus also the BP core component #0 needs to be installed before all ToB epilogue-enabled NPCs, that means before TS. However, all the AI components should be installed nearly at the end and particularly after SCS.

BP and SCS both try to do broadly similar things in rather different ways, so mixing BP AI and SCS AI components is a bad idea (SCS rewrites original scripts with new behavior; BP replaces original scripts with new differently-named scripts). If you install both then some creatures might have both SCS and BP AI scripts on them simultaneously, issuing contradictory commands.

Copy the folder **BP** and the files **Setup-BP.exe** and **Setup-BP.tp2** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

### 2.15 Vlad's Compilation v2.1 (2)

~SETUP-VCV21.TP2~

**Vlad's Compilation merges the former stand-alone mods Baldurdash, Tortured Souls, Keldorn Romance, some components and also the Leina quest from former versions of NEJ.**

***This is an edited version of the mod. Most Baldurdash components are already included in the BG2Fix-pack. These remain untouched from the edited version!***

*Nevertheless, several fixes which are not handled by BG2Fixpack are included here. Besides, Baldurdash is also required for NEJ3v7.02 and higher. It also makes the BGTNeJ2 v1.1 mod redundant.*

***Use by no means the original tp2 file from Vlad's Compilation together with the BG2Fixpack!***

**Tortured Souls** includes a task with the Yoshimo family, as well as a romance with Valygar for a female PC and a romance with Sime for a male PC - this are two absolutely different plots!

TS must be installed after the BP core component but before NEJ!

The **Keldorn Romance** adds a huge number of new dialogs for Keldorn in SoA and ToB. This mod romances a female protagonist. She must be a human, elf or half-elf of any good or lawful neutral alignment and any class except a thief. Keldorn won't romance thieves and opposite alignments. True and chaotic neutral characters are possible but risky.

*Tortured Souls is highly recommended but optional, Baldurdash is the must. Baldurdash enhances Nalia and Aerie. Both are highly recommended in the party. The author of the mod recommends to refrain from installing Keldorn Romance with other big mods such as TDD, SoS and CtB.*

**NOTE:** *This mod must be installed in three steps! The Baldurdash components 0, 1 and 2 must be installed before the Item Revisions main component but the component RESTORED DAK'KON'S BLADE should be installed only after it!*

*TS must be installed after the BP core component but before NEJ!*

Copy the folders **Custom Portraits**, **NeJE**, **override**, **ReadMe** and the files **Readme.txt**, **NeJEAreasSounds.bat**, **oggdec.exe**, **Setup-VCv10.exe**, **Setup-VCv10.tp2** and **tisunpack.exe** into your main SoA directory.

One or more files of this mod must be changed and you need a special edition of the tp2 file. This will be done by the patch from the folder **B&G World Fixpack**.

## 2. BGT, THE BIG BG2 MODS AND PRIOR TWEAKS

*You may consider to give Imoen either the Adventurer kit from Song and Silence, or the Swashbuckler kit from Refinements (especially good with Rogue Rebalancing).*

*Not compatible with the Imoen Romance mod or Imoen Forever mod.*

*Not compatible with Sandrah NPC because this makes the largest part of the Sandrah/Imoen relationship unplayable and would remove 2 major quests from the mod. Imoen in Return to Faerûn would appear unrelated to the Imoen in the earlier parts of the game. Even if Sandrah main plot remains intact, about a quarter of the BG1 contents will be lost.*

### 2.17 Never Ending Journey 3 v7.1

~SETUP-NEJ3V71.TP2~

NEJ integrates the game Icewind Dale in extended and improved form into Baldur's Gate. This mod is a whole game in itself without any connection to the main BG2 plot. By taking the portal immediately north of the starting area in Irencius' dungeon the party will travel through time and space to the town of Easthaven about 100 years ago and meet the heroes from Icewind Dale. Your task is to influence the conflict between the two different schools of magic and thus to change the future history. The Leina quest from former verions of this mod is now moved to Vlad's Compilation.

NEJ is regarded by many players as the best game at all.

Please understand that playing NEJ is different from playing BG. The main character is not your protagonist but Hrothgar. So if you want to play the whole mod, you should follow him. Like in original IWD the plot is predetermined. There is no such freedom of walking like in BG. You get the following quest only if you have solved the previous one. If you missed something, you cannot go back. The only way is reload.

NeJ only accepts one single procedure of solution and you are forced to play this mod in a predetermined way that is uniquely different from the usual spirit of BG mods and you are unable to leave until you have completed it. This mainly refers to the second part of the plot, playing in Halruaa. The spell tests that are to do there are so scripted that the spell has to act just, as the author has provided. If a mod like Spell revision for example is installed, this upsets the balance and the tasks in Halruaa cannot be solved.

*Compatibility issues with BGT are now resolved during the installation of NEJ3. Hence, NEJ3 is installed after BGT-WeiDU.*

**NOTE:** This is a first try to add NEJ to BWP as a base for further improvements. The author of the mod recommends to refrain from installing NeJ3 with other big mods such as TDD, SoS and CtB. NeJ3 ist not extensively tested in a BWP installation yet, so reckon with problems. With the previous NeJ2 in many tests experienced players did not find bigger issues.

## 2. BGT, THE BIG BG2 MODS AND PRIOR TWEAKS

If you try to play NEJ3 in a megamod and run into any problem, by no means bother neither the author nor someone else at the Black Wyrms Lair - Forums with them, but only ask for help at Spellhold Studios - Mega Mod Help even when you think it might be caused by NEJ3!

*Some parts of this mod are either rather unbalanced or at least get out of hand if you use them in combination with some tactical or spell-altering mods. Hrothgar and his friends are overpowered.*

*If you want to play the Halruaa quest from NEJ you should avoid spell changing mods like:*

*Spell Revisions*

*Lost Crossroads Spell Pack for Baldur's Gate 2*

*Spell-50*

*Sword Coast Stratagems - Spell tweaks components*

*and maybe some others not added yet because otherwise the tasks cannot be solved.*

*The mod requires Tortured Souls which is to be installed prior NEJ3. BGT is strongly recommended. Vlad's Compilation v2.1 including Original Baldurdash fixes v1.12 (by Kevin Dorner) is a prerequisite and is to be installed prior to installation of NeJ2 because some NEJ files are stored there.*

Copy the folders **BGTComp**, **Intro**, **NeJ**, **NeJ2**, **NEJ3**, **Hrothgar's Bonus Portrait**, **Jaheira's Original Portrait** and the files **acm2wav.exe**, **NeJ-Readme.txt**, **NeJAreasSounds.bat**, **NeJBGTAreasSounds.bat**, **NeJUninstaller.bat**, **oggdec.exe**, **Setup-NeJ3v702.exe**, **Setup-NeJ3v702.tp2**, **snd2acm.exe**, **tispack.exe**, **tisunpack.exe**, **wavc.exe** into your main SoA directory.

### 2.18 Paladins of Faerûn Quest Pack v3.2

~POFQUESTPACK/SETUP-POFQUESTPACK.TP2~

This mod is a WeiDU processing of the total conversion of Paladins of Faerûn from BGslayer and other Czech developers, and contains all the quests of the original Paladins of Faerûn but it is not an exact copy of it. Part of the quests was implemented differently. A large number of errors were also corrected, many scripts and dialogs were rewritten practically a new.

The mod contains one large main quest "Paladins of Faerûn" and two side quests "Order and Chaos" and "Abduction and Politics". New adventures in the cities are also waiting for you: Neverwinter, Baldur's Gate, Waterdeep, Targos (city center, docks), Siluvised (Elven city) and Har Al-Dur (city of priests) - each of them has its own city quest, mainly to provide any help to the city or even save it. In addition, there are more than 20 individual small quests. The mod begins in the Irenicus dungeon.

One or more files of this mod must be changed and you need a special edition of the tp2 file. This will be done by the patch from the folder BiG World Fixpack.

Copy the folder **PoFQuestPack** and the file **SETUP-PoFQuestPack.exe** into your main SoA directory.

## 2.19 Baldur's Gate Trilogy - Music

~SETUP-BGTMUSIC.TP2~

This mod must be installed to play the proper music with Baldur's Gate and the Legends of the Sword Coast.

*This mod is included in BGT up to v1.21 and will be created during the installation of BGT.*

*The mods Keldorn and TS only use line numbers smaller than 100 in the songlist and therefore they must be installed before BGT music otherwise the music files of TS and Keldorn are missing.*

*You can change the settings of this mod at any time because the remaining installation will not be affected!*

*BGTMusic should be installed right after BGT. Otherwise, any BGT NPC and quest mods which want to reference BGT music have no way of knowing what SONGLIST.2DA entries they should use (as those BG1 song entries don't yet exist in the songlist when they're installed).*

The folder **music** and the files **Setup-BGTMusic.exe** and **Setup-BGTMusic.tp2** have been copied into your main SoA directory together with BGT-WeiDU.

Double-click the Setup. The DOS dialogue appears:

Choose your language:		0 [English]

2	3] Full Baldur's Gate/Shadows of Amn/Throne of Bhaal Music (WARNING: patches BGMain.exe)	

[3]

*Some NPCs connect new music not like other mods with the dialogs or other events, but add them to a songlist.*

*Into the unpatched songlist only 99 entries may be carried out all together. Hence, up to now all lines from line 100 had to be deleted after the installation because, otherwise, the game could not start.*

*This patch removes this limitation. Also it writes all BG1 music into the songlist.*

## BG1 QUEST MODS

These mods enhances BG1 with dozens of new areas, many new quests as well as additional characters, items and spells.

The files get biffed automatically at the end of the installation. Therefore a simple deinstallation with WeiDU is not possible.

### 3.1 Dark Horizons BGT v2.13

~SETUP-DARKHORIZONS.TP2~

In this extensive quest mod you will be hunted by a dangerous organization. Find out who they are, before they get you. This mod includes one major and multiple minor quests as well as encounters for BG1 and introduces new areas, stores, items and enemies.

**This mod includes also the mods “BG1 Adventure Pack” and “BG1 CoM Forge - Item Upgrade”.**

#### 3.4 Secret of Bonehill v2.75c

~SETUP-BONEHILL.TP2~

New areas, a new NPC and new quests. This mod is subdivided into two chapters, of those the first can be played rather early and the second only reveals after some time.

Copy the folder **Bonehillv275** and the files **Setup-Bonehillv275.exe** and **Setup-Bonehillv275.tp2** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

#### 3.5 Drizzt Saga v3.0

~DRIZZTSAGA/DRIZZTSAGA.TP2~

This mod brings Drizzt and his companions with her own major quest and many minor quests as well as many new areas and new creatures into the game. You meet Drizzt in his original area fighting with gnomes.

*The Drizzt saga is intended only for experienced players.*

Copy the folder **DRIZZTSAGA** and the file **Setup-drizztsaga.exe** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

#### 3.6 The Vault v7.2a

~SETUP-VAULT.TP2~

These new and improved items will be distributed in the various encounters in BG1. These groovy new items, being in the possession of the enemies, will tend to make the game significantly harder.

*This mod must be installed before BGQE and TGC, because it overwrites some files and otherwise their NPCs do not trigger any more. It can ONLY be installed into a BGT game.*

### 3. BG1 QUEST MODS

Copy the folder **vault** and the files **Setup-Vault.exe** and **Setup-Vault.tp2** into your main SoA directory.

#### 3.7 Imoen Forever v6 (1)

~IMOEN\_FOREVER/IMOEN\_FOREVER.TP2~

This mod makes Imoen a steady companion throughout the whole BG-Saga. Imoen-related story content is being maintained, therefore Imoen will be out of party temporarily to get the most crucial original game events and will rejoin the party after such incidents.

*Compatibility is a bit on the tough side with this mod since all mods assume Imoen is being taken at the Waukeen's Promenade fight and stays in Irenicus' grasps until the PC reaches Spellhold. In general: There should be no problem with mods that do not introduce talking NPCs in chapter 2 or 3, i.e. all mods with content that either do not include NPCs or where the content kicks in after going to Brynnlaw, e.g. NPC mods starting in the Underdark or ToB mods.*

*This quest mod should be installed as soon as possible and before any other NPC mods that add interjections in SoA chapter 2&3.*

*The mod is compatible with the following mods that add dialogues with Imoen and/or content about Imoen in chapter 2&3:*

*Afaaq, the Djinni Companion for BG2 and BG2:EE*

*Ajantis NPC for BGII*

*Almateria's Restauration Project "Extended Waukeen's Promenade Cutscene" (independent of installation order)*

*Alternatives (compatibility component of I4E needs to be installed after)*

*Ascalon's Breagar NPC*

*Edwin Romance*

*Fading Promises as of v9*

*Heroes, Thieves, and Moneylenders*

*IEP Extended Banters as of v5.7*

*Imoen Friendship as of v3.6*

*NPC Strongholds as of v8.1*

*The Artisan's Kitpack as of 21-01-19*

*Tweaks Anthology "Faster Chapter 1&2 Cut-Scenes & Dreams" (component "Convenience Tweaks and/or Cheats") if Tweak Anthology is installed after.*

*Unfinished Business as of v28beta*

*Yeslick NPC for BGII as of v5.0*

*I4E is also technically compatible with Saerileth's route to Spellhold if component 5 is installed \*after\* Saerileth mod (the mod still refers to Imoen being taken, though.)*

*The mod is \*not\* compatible with the "Imoen Is Stone" mod, the Imoen Romance mod and with the component "Continuous and Custom Kit Imoen" from Vlad's Compilation.*

**NOTE:** This mod must be installed in two steps! The component 9 must be installed after ther Alternatives mod.

Copy the folder **imoen\_forever** and the file **Setup-imoen\_forever.exe** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

### 3.8 Endless BG1 v6

~C#ENDLESSBG1/C#ENDLESSBG1.TP2~

For BGT, the main component of the mod adds some praise for the PC to Duke Belt's dialogue and removes some oversights with regard to references to Sarevok after he died, however, it does not provide the possibility to remain in the BG1 "world" after Sarevok is defeated as it is the main aim of this mod for BGEE.

*For compatibility, please stick to the install order: EBG1 - bg1npc project - bg1re - bg1ub - Jarl's Adventure Pack.*

Copy the folder **c#endlessbg1** and the file **setup-c#endlessbg1.exe** into your main SoA directory.

### 3.9 BG1 Mini Quests and Encounters v24

~BGQE/SETUP-BGQE.TP2~

The mod adds several mail quests. Also included is the "Slime-Quest Mini-Modifikation, so now Jasteys BG1 Mini-Quests replaces Slime-Quest v1.6.

*This quest mod has to be installed before the BG1NPC Project so no added reply options will be overwritten. The former component Brage's Sword is now part of the mod Brage's Redemption.*

#### 3.10 Brage's Redemption v6

~C#BRAGE/C#BRAGE.TP2~

The mod adds a quest extension to Brage, the captain of the Nashkel guard, and makes him a joinable NPC.

*This quest has to be installed before the BG1NPC Project and after BG1 Mini Quests and Encounters so no added reply options will be overwritten.*

*The quest extension to prove his innocence was originally published as the component "Brage's Sword" in the mod BG1 Mini Quests and Encounters.*

Copy the folder **c#brage** and the file **setup-c#brage.exe** into your main SoA directory.

BG2 came along with a special innovation: The NPCs can have banters or conflicts, but also romances with the main character or with other NPCs. Of course it was not long time coming, to develop this approach also for BG1.

#### 4.1 BG1NPC Project v30

~BG1NPC/BG1NPC.TP2~

This mod expands on the depth of character and levels of interaction with the NPCs from the BG1 game. Every character has banters with other NPCs and with the main character, some have personal tasks, romances with Ajantis, Branwen, Coran, Dynaheir, Shar-Teel and Xan.

The files get biffed automatically at the end of the installation. Therefore, an easy deinstallation with WeiDU is not possible.

*Should be compatible with Drizzt Saga v3, provided the Delayed Start component is installed.  
The Brage's Redemption mod should be installed before.*

Copy the folder **BG1NPC** and the files **Setup-BG1NPC.exe** and **bg1npc.tp2** into your main SoA directory.  
Double-click the Setup. The readme opens. and The DOS dialogue appears:

### 4.4 BG1 Unfinished Business v16.3

~BG1UB/SETUP-BG1UB.TP2~

The mod restores many of the cut items, quests, and encounters from the game's final release, as well as try to tie up some of the "loose ends."

## 4. BG1 NPC MODS

*This comprehensive mod includes fixes and restorations, some of which patch materials other mods use. If the mod is installed after BG1 NPC Projekt, it skippes automatically incompatible components. As of version 13 no additional audio pack is needed. Do not install the separate German, French or Spanish audio packs of earlier releases!*

Copy the folder **bg1ub** and the file **setup-bg1ub.exe** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

### 4.23 Tenya Thermidor v1.5c

~SETUP-TENYATHERMIDOR.TP2~

This mod makes 12 year old Umberlant Tenya a joinable NPC. Tenya has a low strength for a cleric, but makes up for it with some special abilities and unique items. She is quick to anger, abrasive, and like children do will sometimes try to test the limits of people around her to see how much she can get away with. But, she can actually be quite helpful and even nice, on occasion.

Copy the folder **TenyaThermidor** and the files **Setup-TenyaThermidor.exe** and **Setup-TenyaThermidor.tp2** into your main SoA directory.  
This mod was created for BGEE. The **B&G World Installpack** converts this mod to BGT using the PCU. The **B&G World Fixpack** makes further changes to the mod to be able to play it with BWP.

The following mods give the game the final touch. The BG1 game will be in general upgraded, improved and especially the fightings refined.

### 6.1 BGSpawn System v1.12

~SETUP-BGSPAWN.TP2~

This mod will replace the simple random encounters in BG1 with a ingenious system. Instead of always the same spawned creatures as in the past there are now different creatures, depending of the area in that you travel and whether it is day-time or night-time. The difficulty of the encounters is depending of the experience of your party.

*BGSpawn requires BGT-WeiDU to be installed. Conceptually NOT compatible with the BGT-Tweaks component "Altered spawns".*

Copy the folder **BGSpawn** and the files **Setup-BGSpawn.exe** and **Setup-BGSpawn.tp2** into your main SoA directory.

### 6.3 Kit Tomes for BGT, TuTu & BG:EE v2.01

~KITTOMES/SETUP-KITTOMES.TP2~

In Baldur's Gate 1 originally were no kits. In Baldur's Gate 2, characters start out at a later level and can have a kit. So if you start a character without a kit in the first game; they gained the kit somehow by the time the second game. This mod adds a merchant, Panver the Loremaster, outside of the Friendly Arm Inn who will sell you magical career tomes that can add a kit to a character.

### 6.4 BGT Tweak Pack v11 (1)

~SETUP-BGTTWEAK.TP2~

This compilation deals with issues with in the original Baldur's Gate and Legends of the Sword Coast.

**NOTE:** This mod must be installed in two steps!

*At least the BGT Tweak Pack component "Enemy items shatter" must be installed before Aurora and before most of the BG2 mods!*

*The "Import more NPCs into Shadow of Amn" components, however, must be installed after the BG1 NPCs for BG2:SoA because of compatibility checks. However, these components are not compatible with Sandrah RTF. Because of compatibility checks the modifications 'Ease-of-Use', 'BGSpawn', 'BG1 NPC Project', and 'BG1 Unfinished Business' must be installed before.*

*The BGT Tweak Pack component "Restore BG2 XP bonus for traps, locks, and scrolls" must be installed before the Tweaks Anthology component "Change Experience Point Cap" because otherwise the level will be reduced from 50 to level 40.*

Install Component 2500 Access Ulgoth's Beard west of Wyrms Crossing only [Y]es

*Ulgoth's Beard lies to the west of Baldur's Gate according to Forgotten Realms Lore, but in Baldur's Gate: Tales of the Sword Coast, Ulgoth's Beard is placed to the north-east. This component corrects this inconsistency by only allowing access to Ulgoth's Beard on the west side of Wyrms Crossing. However, this also means that Ulgoth's Beard will not be accessible until Baldur's Gate city is also accessible.*

Install Component 2600 [Prevent access to Durlag's Tower from adjacent areas] [Y]es

*This component stops the player from discovering Durlag's Tower just by walking to its location. If this component is installed, the only way to discover Durlag's Tower is through informants at Ulgoth's Beard.*

Install Component 2700 [Put Sword of Chaos +2 in Sarevok's inventory] [Y]es

Install Component 2800 [Reputation Resets at Beginning of BG2] [Y]es

*Because the hero and his party are still unknown in Amn when they emerge from the opening dungeon after the transition from BG 1 to BG2 and go to the Adventurer's Mart, they cannot already enjoy advantages because of her good call.*

*This component is also included in Tweaks Anthology.*

### 6.5 New travel system between Baldur's Gate City areas v2.1

~BG\_TRAVEL/SETUP-BG\_TRAVEL.TP2~

This mod changes the travel system in Baldur's Gate City in a way that the party appears in the nearest location on the bordering map, and not always at the same set entry point as it was before and without the use of the main map.

## 6. BG1 RULES AND TWEAKS

This will now give an impression of being one big, cohesive area.

### 6.6 Critter Parts EE v1.1

~SETUP-CRITTERPARTS\_V1.1.TP2~

This mod includes a quest and adds items to bears, wolves and wild dogs that the Ranger and Druid protagonist encounters in the game. The dropped items can be sold or consumed by any character in your party.

Copy the folder **CritterParts** and the files **setup-CritterParts\_v1.1.exe**, **setup-CritterParts\_v1.1.tp2** and **CritterParts\_v1.1 Readme.txt** into your main SoA directory.

This mod was created for BGEE. The **B&G World Installpack** converts this mod to BGT using the PCU. The **B&G World Fixpack** makes further changes to the mod to be able to play it with BWP.

### 6.8 BP-Balancer v0.35 (1)

~BP-BALANCER/SETUP-BP-BALANCER.TP2~

This mod works similar as Big Picture, but for BG1: the values of too strong items from DSotSC, NTotSC, SoBH and Drizzt Saga are set back to their BG1 values. Also BP-Balancer reduces too high experience points, which you get with these mods, in order not to gain too soon too high experience levels. By all these settings you get a balanced BG1 gameplay.

**NOTE:** This mod must be installed in two steps! For compatibility, the part that modifies BG1 mods needs to be installed just after all BG1 mods because other mods may replace/modify files changed by this mod. (IR or IRR mostly).

The former components for Item and XP Balancing for "Dark Side of the Sword Coast" and "Northern Tales of the Sword Coast" are no longer available because this function is already included in the mods.

Copy the folder **BP-Balancer** and the files **Setup-BP-Balancer.exe** and **Setup-BP-Balancer.tp2** into your main SoA directory.

### 7.1 Edwin Romance v2.11

~SETUP-EDWINROMANCE.TP2~

Allows the player to carry out a romantic relationship with Edwin Odesseiron, that insulting Thayvian wizard wearing red. This version includes the previously separate parts ToB and Flirts.

*Edwin Romance conflicts with "Female Edwina" from The Tweaks Anthology. Edwin romance mod already includes another portrait.*

*Edwin Romance has to be installed before Ascension because Ascension v2.08 and higher has code specifically to allow for this mod.*

*If you wish to install both Edwin and Tsujatha, Edwin should be installed before because Tsujatha contains the patch to keep Edwin in the party at high reputation if you are romancing him. Edwin, however, does NOT contain this file for Tsujatha.*

### 7.2 Ascension v2.0.23

~ASCENSION/ASCENSION.TP2~

Ascension is one of the most popular mods at all. It changes the end of Throne of Bhaal and some encounters.

*This mod contains excellent tougher versions of four members of the Five, but no tougher version of Sendai, Throne of Bhaal's ultimate spellcaster. You can add the missing tougher Sendai with the Oversight mod.*

*Ascension is fully compatible with SCS, however, the version of Ascension that is included in the Big Picture mod is not compatible with SCS. The Big Picture mod contains its own version of this mod.*

*Because Ascension has been an iconic mod right through the modding era, many mods are likely to be aware of it and respond to it, but that requires Ascension to be installed before them.*

*These specific mods should be installed before Ascension 2.0:*

*Edwin Romance (version 2.0.7) - Ascension has code specifically to allow for this mod.*

*The BG2 Fixpack - Ascension actually requires this mod on a non-Enhanced install.*

*These specific mods should be installed after Ascension 2.0:*

*Longer Road*

*Spell Revisions*

*Sword Coast Stratagems*

*Turnabout*

*Wheels of Prophecy*

*Imoen Romance*

*Kelsey*

*Sarerestore*

*Afaaq, the Djinni Companion*

*Item Upgrade*

## 7. BG2 QUEST MODS

### 7.3 Turnabout v1.3 FOR ORIGINAL NON-EE BALDUR'S GATE 2 ONLY

~SETUP-TURNABOUT.TP2~

This mod enables the player to recall dead allies to aid in the final fight in Throne of Bhaal.

*Ascension must be installed before to be able to install this mod.*

*This mod is only compatible to a limited extent with SandrahNPC because you cannot call creatures for support at the Throne of Bhaal final battle when Sandrah is with you.*

Copy the folder **turnabout** and the files **setup-turnabout.exe** and **setup-turnabout.tp2** into your main SoA directory.

**7.5 The Longer Road v2.0.4**

~LONGERROAD/LONGERROAD.TP2~

The Longer Road is in some measure the enlarged version of Redemption and introduces Irenicus to ToB as a joinable NPC.

*Either the original Ascension mod or the BP components 2000 [Ascension for BP] and 2100 [Improved Abazigal] must be installed before Longer Road.*

*The Ding0's Quest Pack component Improved Oasis must be installed before Longer Road.*

**Note: The Longer Road v2.0.0 is only compatible with Ascension v2 and up.**

Copy the folder **LongerRoad** and the file **Setup-LongerRoad.exe** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

**7.6 The Wheels of Prophecy v8.5**

~WHEELS/SETUP-WHEELS.TP2~

This mod adds a lot of content to 9th chapter of Throne of Bhaal. It also includes the mod Restored ToB Heads, an attempt to piece together the original scene.

**NOTE: v7 and higher is only running on 64-bit engines. On a 32-bit engine you need to have v6 of this mod!**

*BG2 Fixpack is highly recommend and should be installed before.*

*Having Ascension installed is recommend though it is not required. Install it early in your install order, and before Wheels of Prophecy. It is fully compatible with Sword Coast Stratagems (SCS), provided that SCS is installed after Wheels of Prophecy.*

*Longer Road must be installed before Wheels of Prophecy.*

*The Tactics component "Slightly Smarter Mages and Liches" must be installed after Wheels of Prophecy.*

Copy the folder **wheels** and the file **setup-wheels.exe** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

**7.7 Unfinished Business for BGII v28**

~UB/SETUP-UB.TP2~

This mod restores many of the cut items, quests, and encounters from the game's final release and ties up some of the "loose ends."

*As per version 27, BG2Fixpack must be installed prior to installing Unfinished Business. UB no longer contains any fixes of its own and may not work correctly without it!*

### 7.8 Tales of Anegh v2.6

~TOA/SETUP-TOA.TP2~

This story involves an affiliation between Icewind Dale and Baldurs Gate 2. In Atkathla you meet the sorcerer Nomoran (in ToB in Saradush, if the mod had not been played in SoA) and asks you for assistance in the fight against a horde of monsters. By his magic you get directly to the mountains near the village "Anegh". Depending on whether you play the mod in SoA or in ToB you will get two different ends.

## 7. BG2 QUEST MODS

### 7.32 Fishing for Trouble v3.2.8

~FISHINGFORTROUBLE/FISHINGFORTROUBLE.TP2~

You will be asked to investigate why a village just south of Athkatla is being deserted by its inhabitants. This large mod centers around five completely new major areas throughout BG2, and has a long, non-linear storyline and a handful of smaller fedex quests. It is designed for characters at mid-level (eleven and above).

Copy the folder **FishingForTrouble** and the file **Setup-FishingForTrouble.exe** into your main SoA directory.

One or more files of this mod must be changed in order to be able to install it together with BWP. This will be done by the patch from the folder **B/G World Fixpack**.

### 8.24 Restored Rhynn Lanthorn Quest v beta1

~DW\_LANTHORN/DW\_LANTHORN.TP2~

This mod simply restores the Rhynn Lanthorn quest that was removed from Baldur's Gate II before release. The player would be given clues to find several stolen lenses that are placed in several of the stronghold quests that the player can explore in Chapter 2.

*There is an obvious conceptual incompatibility with the component of the 'Oversight' mod that also restores the missing-lens quest.*

Copy the folder **dw\_lanthorn** and the file **setup-dw\_lanthorn.exe** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

The following mods make above all the fights more difficult and, therefore, are thought for experienced players.

### 9.1 Tactics v25 (1)

~SETUP-TACTICS.TP2~

This mod adds numerous components to BGII. They all aim to make the game more challenging and rewarding by increasing the difficulty of encounters and, therefore, is thought for experienced players.

*Most components are skipped if you install Tactics together with Big Picture.*

**NOTE:** This mod must be installed in two steps! The Fighter-Class Archer Kit and the Anti-Paladin Kit] should be installed separately after “Ashes of Embers - Unique weapons (bolas and katars)” and after “Rogue Rebalancing - Proper dual-wielding implementation for Thieves and Bards”.

The component 19 “Improved Undead” should be installed separately after SCS.

The component 33 “Mike Barnes' Marching Mountains” should be installed separately after the Longer Road to avoid a problem with the drake01.CRE file.

Copy the folder **tactics2** and the files **Setup-Tactics.exe** and **Setup-Tactics.tp2** into your main SoA directory.

Replace the file **Setup-Tactics.tp2** in your directory ...\\BGII - SoA with this one of the same name from the folder **B&G World Fixpack**.

### 9.2 Azengard Tactical Encounter v5.0

~SETUP-AZENMOD.TP2~

This pack contains two new tactical encounters and a more difficult area for the SoA part of the game, although it requires ToB to function.

1. Azengard Tactical Encounter - behind a portal in Irenicus hideout a mysterious faction known as the Time Guardians has a challenge for the child of Bhaal.
2. Improved Trademeet Crypt Encounter - adds a new small crypt chamber with a handful of monsters and significantly strengthens the ones in the inner chamber.
3. Improved chateau of Irenicus - makes the internal area of Irenicus castle much more difficult.

For BG2 there is each quantity of NPCs, which you can take up to your party. They banter with the main character as well as with the other NPCs in the party and have their own quests and encounters.

For BG2 there are a lot of NPC mods. Some you can just take with you and they do not have much content, but there are also a number of NPC mods, that are an real enrichment for a game's because they not only have banter with the main character, but also with other NPCs in different situations and this usually as well in SoA as in ToB. In addition, they have their own quests and encounters.

In such a megamod it is of course important to make a selection of NPCs that meet these requirements, and you can rely on that you will have adventures with every NPC you will meet. The separated out mods are listed in the chapter MORE BG2 NPC MODS.

A description of the most NPC-mods can be found here:

<http://www.shsforums.net/index.php?showtopic=41571>

[http://www.ironworksforum.com/ubb/cgi-bin/ultimatebb.cgi?ubb=get\\_topic;f=2;t=023604](http://www.ironworksforum.com/ubb/cgi-bin/ultimatebb.cgi?ubb=get_topic;f=2;t=023604)

Not all BG2 NPCs are listed in this chapter. Some more you find in the next chapters, because they can be integrated only at the appropriate places into the megamod.

### 10.1 Tsujatha v15

~TSUJATHA/SETUP-TSUJATHA.TP2~

A joinable male elven necromancer NPC with optional romance for female PCs.

*Tsujatha contains the patch to keep Edwin in the party at high reputation if you are romancing him. Edwin, however, does NOT contain this file for Tsujatha. If you wish to install both mods, please install Edwin BEFORE Tsujatha.*

### 10.6 Beyond the Law v2.0.0

~BTL/BTL.TP2~

This mod lights up the unusual relationship between two people who cannot be more differently: Kova, a magician / thief with an unsavoury background and a good heart and Kiyone, a law-enforcing archer. The mod points out more about the power play between the Shadow Thieves and the Cowled Wizards in Athkatla and why certain things happened to certain NPCs. The NPCs of this mod appear only if the player is either good or neutrally aligned and the reputation of the player is more than 12.

Copy the folder **btl** and the file **setup-btl.exe** into your main SoA directory.

### 10.46 Aran Whitehand RC\_Amellg 03.04.2019

~ARANW/ARANW.TP2~

Aran Whitehand is a more 'self aware' human fighter and scribe for BG2, dual classable, so that he can be Tinker, Tailor, Soldier, Spy... whatever your party needs. He has minor optional quests with a new area, but comes with no special weapons or upgradeable items - his specialty is in interacting with the members of the party and adapting to situations. This mod includes Faerunian swearing and occasional adult themes in the Romance portion.

Copy the folder **aranw** and the files **setup-aranw.exe** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

### 10.47 Isra BG2 v3.1

~ISRA\_BG2\ISRA\_BG2.TP2~

This mod adds Isra, a cavalier paladin of Sune, to Baldur's Gate 2. A follower of the goddess of love, beauty, and passion, Isra is amiable, optimistic, and courteous almost to a fault. If you met her in Nashkel, you may either continue from where you left off or start anew as strangers. She is playable through to the end of Throne of Bhaal.

### 10.51 Weimer's Solaufein v1.04

~SETUP-SOLAUFEBIN.TP2~

Change Solaufein into a joinable NPC. For SoA as well as for ToB. Optional romances with every main character. Solaufein adapts to the group when joining, this means, is your main character good, Solaufein will be chaotic-good, is your main character bad, then Solaufeins will be chaotic neutral.

*Should be installed after Ascension.*

Copy the folder **solarom** and the files **Setup-Solaufein.exe** and **Setup-Solaufein.tp2** into your main SoA directory.

### 10.53 Jastey's Solaufein (Solaufein's Rescue) v3 (1)

~C#SOLAUFEBIN/C#SOLAUFEBIN.TP2~

This modification makes Solaufein, the drow warrior from Usth Natha, a joinable NPC. Before the entrance to Adalon's cave he is captured by the drow. Now it's up to the HC to preserve Solaufein to be transformed into a drider! If the group consist of 6 NPCs already, Solaufein will join as a "7th party member" and follow like a familiar.

**NOTE:** This mod must be installed in two steps! The component "Enable Drider Animations in this Mod" must be installed after the core component of Infinity Animations (IA) including the drider animation. The component "Give Solaufein in Ust Natha the Mod's Portrait" may be installed only after Solaufein NPC. If Weimer's Solaufein romance is installed, the quest "Solaufeins rescue" only starts when Weimer's Solaufein was sent away.

**10.56 Getting Rid of Anomen v2**

~SETUP-GROA.TP2~

Adds a new dream sequence to the Kelsey romance involving an imperfect future where one knight of Helm just won't go away. Only for a female char. You need to be in romance with Kelsey and you need to have Anomen in your party.

*Kelsey is required to play this mod.*

Install Getting Rid of Anomen into your main SoA directory. Now you find here the folder **GROA** and the files **Setup-GROA.exe**, **Setup-GROA.tp2**, **GROAtisuninst** and **GROAtisunpack**.

**10.57 Keto v6**

~KETO/SETUP-KETO.TP2~

*This mod must be installed because of interactions with Kelsey after that mod.*

Keto is a young woman out on her own, looking to make a basically honest living as a minstrel, but spending most of her time skirting the front door of every dungeon in Amn.

Install the file **Keto-SOAv4.exe** into any dummy folder **but by no means into your main directory!** Otherwise this mod would start to auto install immediately after being unpacked. The WeiDU-setup starts automatically, updates itself and breaks off. Now you will find the folder **keto** and the files **Setup-Keto.exe** and **Setup-Keto.tp2** as well as a file **SETUP-KETO.DEBUG** in that dummy folder. Move them except the **SETUP-KETO.DEBUG** into your main SoA directory.

**10.58 Nathaniel v4.4**

~NATHANIEL/SETUP-NATHANIEL.TP2~

Nathaniel Aplin-Fletcher is a former officer of the Flaming Fist. Although he is an experienced fighter, Nathaniel suffers from selfdoubts, possibly because of his lack of ruggedness. For some players he can become a loyal companion. For the right male character a friendship can develop to more.

*Must be installed after Solaufein and Kelsey.*

Copy the folders **Nathaniel** and **Mod backups** and the file **Setup-Nathaniel.exe** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

### 10.60 Kiara-Zaiya v1.6.2

~SETUP-KIARA-ZAIYA.TP2~

Zaiya is chaotic-good half elves magician who is searching for her friend Kiara, a neutral-evil monk.

*This mod must be installed because of interactions with Solaufein after that mod. Keldorn Romance must be installed before this mod. Smiling Imp Cross Banter mod must be installed after this mod. If this mod is installed together with the Valen NPC, not all Valen dialogues appear.*

Copy the folder **Kiara-Zaiya** and the files **Setup-Kiara-Zaiya.exe**, **Setup-Kiara-Zaiya.tp2**, **unins000.exe** and **unins000.dat** into your main SoA directory.

You must download the sounds for this mod separately. Copy the sound files from the additional folder Kiara-Zaiya 2 and paste them into the directory Kiara-Zaiya\Sounds in addition to the already available file MxKiara.mus.

One or more files of this mod must be changed. This will be done by the patch from the folder **B&G World Fixpack**. Also it provides compatibility with the Solaufein mod.

Some of these mods have little content. You can, however, insert each of these mods without worries into your B&G World, if you want to expand the game with more NPCs.

### 11.1 Fonick CliffHistory v2

~CLIFFHISTORY/SETUP-CLIFFHISTORY.TP2~

Talk to the receptionist in Five Flagons Playhouse; you meet the bard Fonick which makes notes about his trips with the HC.

*This mod does not work together with the "Multiple Strongholds" component from "The Tweaks Anthology", "Make the bard stronghold available to all classes" from Multistronghold, the NPC Strongholds mod or if the MC is a bard.*

### 11.3 Octavians Drizzt v2Beta3

~SETUP-DKDRIZZT.TP2~

With this mod you can take Drizzt Do'Urden into your group, when you leave the underdark and go again into the town. You can summon the magic cat Guenhwyvar with "K" which attacks enemies then automatically.

*Not together with with RoT because this mod adds likewise Drizzt and both are contentwise not compatible. The component with the Artemis Entreri-encounter of Unfinished Business is compatible with this Drizzt mod. If Valen is in the party, it is actually not possible to take in Drizzt, because he becomes hostile immediately.*

Copy the folder **DKDrizzt** and the files **Setup-DKDrizzt.exe** and **Setup-DKDrizzt.tp2** into your main SoA directory.

Successfully installed		[Malthis, the swashbuckler!]	Press ENTER to exit

Press any key . . .

Further files get copied, then the readme opens in html-format.

## 11. BG2 NPC MODS WITH LESS CONTENT

### 11.9 Shar-Teel v1.0b

~SETUP-SHARTEEL.TP2~

GERMAN

*Not to be confused with Shar-teel NPC mod for SoD!*

Brings the chaotic-evil fighter Shar-Teel from BG1 to BG2-SoA.

*Don't install it together with TDD or the NEJ3 component "Firewalker" Shar-Teel (custom kit and continuous character), because these mods also add Shar-Teel and these are contentwise and technically not compatible.*

*This mod is technically not compatible with BG1NPCSoA because you would have the NPC twice.*

Copy the folder **shartel** and the files **Setup-shartel.exe** and **Setup-shartel.tp2** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

Install Component	0	[Shar-Teel für Baldur's Gate II]?	[I]Install
Install Component	1	[Shar-Teels neue Portraits mit den alten ersetzen]?	[I]Install
Successfully installed			Press ENTER to exit

The readme opens.

### 11.10 Summon Bhaalspawn v3

~SBS.TP2~

The mod adds an additional NPC named Sandra in a very interesting way with some very interesting dialogs which could come by certain circumstances to a surprise for Imoen. To start this game, talk to the thief in the docks district.

*In the folder ...\\SBS\\store must be the file .DS\_Store, otherwise the mod cannot be installed!*

Copy the folder **SBS** and the files **Setup-SBS.exe** and **SBS.tp2** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

What should be done with all components that are NOT YET installed?			[A]sk about each one?

Further files get copied.

**11.13 Azure NPC BETA v3**

~AZURE/AZURE.TP2~

The druid Azure and her guardian wolf, Sharo, is to be found in the druid shrine.

*The mod stutters now and then. The wolf does not appear in mod areas at all, or the game may crash.*

Copy the folder **Azure** and the file **Setup-Azure.exe** into your main SoA directory.

One or more files of this mod must be changed. This will be done by the patch from the folder **B.G World Fixpack**.

Double-click the Setup. The DOS dialogue appears:

Install Component	0	[Nature's Ally Druid kit (Required for NPC Azure)]?	[I]Install
Install Component	1	[Azure NPC]?	[I]Install
Successfully installed		[Azure NPC]	Press ENTER to exit

*This mod adds the Nature's Ally kit to the character creation screen. This kit is not selectable for all races. There could be an incompatibility with the Divine Remix kits.*

**11.14 Frennedan v1.0.3**

~SETUP-FRENNEDAN.TP2~

GERMAN

The doppelganger Frennedan from Irenicus' dungeon becomes a recruitable NPC.

Copy the folder **frenmod** and the files **Setup-frennedan.exe** and **Setup-frennedan.tp2** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

Successfully installed		[Frennedan-Mod für Baldur's Gate II]	Press ENTER to exit

The readme opens.

**11.15 Perils of Branwen v0.9**

~SETUP-POB.TP2~

Branwen returns to Athkatla. She's followed you from Baldur's Gate. The neutral good cleric of Tempus can be found in the Bridge District.

*This mod is technically not compatible with BG1NPCSoA because you would have the NPC twice.*

Copy the folder **POB** and the files **Setup-POB.exe** and **Setup-POB.tp2** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

Install Component	0	[The Perils of Branwen the Cleric]?	[I]Install
Successfully installed		[The Perils of Branwen the Cleric]	Press ENTER to exit

**11.16 Branwen NPC v1.3**

~SETUP-BRANWENNPC.TP2~

This mod adds Branwen (a NPC from the original Baldur's Gate) to the starting dungeon of Baldur's Gate 2 (as if she were traveling with you when Irenicus and his minions ambushed your party). At this point in time, Branwen has a small number of interjections, no quests, and no romance.

*Branwen was altered to be a multi-class Fighter-Cleric (in the original BG1, Branwen is a single-class Cleric).*

*Maybe conceptional incompatible with Perils of Branwen.*

*This mod is technically not compatible with BG1NPCSoA because you would have the NPC twice.*

Copy the folder **BranwenNPC** and the files **Setup-BranwenNPC.exe** and **Setup-BranwenNPC.tp2** into your main SoA directory.

The **B.G World Fixpack** changes the starting cage in Irenicus' dungeon if Shar-Teel from Vlad's Compilation is installed.

### 11.19 Rose v003 OpenBeta

~ROSE/SETUP-ROSE.TP2~

Rose is a young female half-elf bard, that lives both of little thefts and gathering some money singing in the inns. You could meet her at the Burning Wizard Inn in Beregost, "saving" her from a man who accuses her of theft.

*This is an abandoned beta mod since many years. She has a quest in Beregost and one or two banters, that is about all. Keeping her in BGT will cause problems with the transition to BG2 (she is not coded to leave or transit). She has no content after Nashkel anymore.*

Copy the folder **rose** and the file **Setup-rose.exe** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

Install Component	0 [Rose NPC for BG:T]?	[I]Install
Successfully installed	[Rose NPC for BG:T]	Press ENTER to exit

### 11.20 Larsha v0.3

~SETUP-LARSHA.TP2~

The Dryad Larsha is to be found at the Windspear Hills. She has several interactions with other characters. This module adds new spells and changes some existing versions as adding their innate capacities. It also adds new items, which may be used only by Larsha.

Copy the folder **Larsha** and the files **Setup-Larsha.exe** and **Setup-Larsha.tp2** into your main SoA directory.

The mod contains no English translation. It will be added with the language patch from the **B.G World Textpack**.

Double-click the Setup. The DOS dialogue appears:

Choose your language:		1 [English]
Install Component	0 [Larsha]?	[I]Install
Successfully installed	[Larsha]	Press ENTER to exit

### 11.21 Raziel v1

~SETUP-RAZIEL.TP2~

Raziel is a neutral swashbuckler who was imprisoned by Irenicus like the protagonist.

Copy the folder **raziel** and the files **setup-raziel.exe** and **setup-raziel.tp2** into your main SoA directory.

One or more files of this mod must be changed in order to be able to install it together with BWP. This will be done by the patch from the folder **B.G World Fixpack**.

The mod contains no English translation. It will be added with the language patch from the **B.G World Textpack**.

### 11.22 Quayle v7.1

~QUAYLE/SETUP-QUAYLE.TP2~

The mod introduces Quayle known from BG1 into SoA and ToB. But the condition is... Aerie's death. Quayle has his own quests, banters with every character from the game, interactions, items.

*This mod is technically not compatible with the Gnomes in the City: Quayle & Tiax component from BG1NPCSoA because you would have the NPCs twice.*

Copy the folder **Quayle** and the file **Setup-Quayle.exe** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

Choose your language:

### 11.23 Gloran NPC v3 (1)

~SETUP-GLORAN.TP2~

This mod adds the chaotic good dwarf warrior to the game. Gloran can be found right at the gate of the city. Unfortunately the mod was not developed further against its announcement.

**NOTE:** This mod must be installed in two steps! The component Gloran & Virtue must be installed after the Virtue mod.

Copy the folder **gloran** and the files **setup-gloran.exe** and **setup-gloran.tp2** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

### 11.26 Saradas Magic 2 v2.0.0

~SARADAS\_MAGIC\_2/SARADAS\_MAGIC\_2.TP2~

In Throne of Bhaal Saradas is finally a recruitable NPC. You can summon him through the Fate Spirit in your pocket plane.

## 11. BG2 NPC MODS WITH LESS CONTENT

Copy the folder **saradas\_magic\_2** and the file **setup-saradas\_magic\_2.exe** into your main SoA directory.  
This mod was created for BG2EE. The **B.G World Fixpack** makes some changes to the mod to be able to play it with BWP.  
Double-click the Setup. The DOS dialogue appears:

```
Choose your language:                                0 [English]

**12.6 Ghareth v0.91**

~SETUP-GHARETH.TP2~

A male human fighter / magician who can join to the party.

Install the file **GharethNPC.exe** into any dummy folder **but by no means into your main directory!** Otherwise this mod would start to auto install immediately after being unpacked. The WeiDU-setup starts automatically, updates itself and breaks off. Now you will find the folder **Ghareth** and the files **Setup-Ghareth.exe**, **Setup-Ghareth.tp2** and **gharethaudiouninstall.bat** as well as a file **SETUP-GHARETH.DEBUG** in that dummy folder. Move them except the **SETUP-GHARETH.DEBUG** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

**12.9 Wikaede v3.4**

~SETUP-WIKAEDE.TP2~

Sir Wikaede is a male human Priest of Helm. He can be found in the Temple of Helm in Athkatla's Temple District. He has one banter with every Bioware NPC, and interjections at the Tree of Life, Hell and Final Irenicus Battle.

Copy the folder **Wikaede** and the files **Setup-Wikaede.exe**, **Setup-Wikaede.tp2** and **Setup-WikaedeAudioUninstall.bat** into your main SoA directory.

The **B&G World Fixpack** makes an update to v4.1. Double-click the Setup. The DOS dialogue appears:

Successfully installed	[JandorNPC-WeiDU]	Press ENTER to exit

The readme opens.

**12.14 Eldoth v1.10**

~SETUP-ELDOTH.TP2~

Eldoth for BG2 is a very simple mod with no witty dialogs.

*This mod is technically not compatible with BG1NPCSoA because you would have the NPC twice.*

Copy the folder **eldoth** and the files **Setup-Eldoth.exe** and **Setup-Eldoth.tp2** into your main SoA directory, but not the Setup-Eldoth.exe. Double-click the Setup. The DOS dialogue appears:

### 12.16 Teddy 1.12

~TEDDY/SETUP-TEDDY.TP2~

Teddy is a half-orc barbarian. One can meet him nearby the d'Arnise keep and travel with him. No more is not realized.

Copy the folder **teddy** and the files **Setup-Teddy.exe** and **Setup-Teddy.tp2** into your main SoA directory, but not the Setup-Teddy.exe.

Double-click the Setup. The DOS dialogue appears:

Choose your language:			0 [English]
Install Component	0	[Teddy - a half orkisch barbarian]?	[I]nstaLL
Successfully installed		[Teddy - a half orkisch barbarian]	Press ENTER to exit

These mods do not insert new NPCs, but enlarge the existing BioWare NPCs with new interesting dialogues, romances and tasks.

### 13.1 Cloakwood Squares v4

~SETUP-CWS.TP2~

A performance of the street theater in Athkatla in which nine BG2 NPCs present a spiritual competition.

*This is a fun-mod, that some players find not suitable.*

Install the file **Cloakwood\_V4.exe** into any dummy folder **but by no means into your main directory!** Otherwise this mod would start to auto install immediately after being unpacked. The WeiDU-setup starts automatically, updates itself and breaks off. Now you will find the folder **CWS** and the files **Setup-Cws.exe** and **Setup-Cws.tp2** as well as a file **SETUP-CWS.DEBUG** in that dummy folder. Move them except the **SETUP-CWS.DEBUG** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

### 13.2 The Jerry Zinger Show v4

~JZ/SETUP-JZ.TP2~

The show of Jerry Zinger offers depending on the combination of your party nine different performances.

*The mod only starts if your party is gathered.*

*This is a fun-mod, that some players find not suitable.*

Double-click the Setup JZ-v1 in your main SoA directory.

The window "The Jerry Zinger Show Setup" opens. Press Yes and then in the next window Install as well as afterwards Close. This installs the folder **JZ** and the file **Setup-JZ.exe**. It opens to itself a window with the text "Press any key to install The Jerry Zinger Show..."

The DOS dialogue appears:

Choose your language:			0 [English]
Install Component	0	[The Jerry Zinger Show]?	[I]ninstall
Install Component	1	[Remove Delay Between Episode]?	[N]ot Install
<i>If you press here [I]ninstall, you need not always wait one day between the single performances.</i>			
Successfully installed		[The Jerry Zinger Show]	Press ENTER to exit

Further files get copied, then the readme opens.

### 13.3 Arnel's Nalia Romance v1.06

~SETUP-LUVNALIA.TP2~

Contains a complete romance with Nalia, including the tree of life dialogs, beloved one in danger, Nalia's abduction by bodhi, and other love related quests. It also adds some new quests and character interactions. I strongly recommend having Minsc in the party.

*The mod hangs after the wedding because of faulty programming. However, this also happens if one only plays the mod without BGT.*

*Don't install Arnel's Nalia Romance alongside with de'Arnise Romance because installing two dedicated PC/Nalia romances would be a poor idea. However, the mod can be installed together with Auren Aseph.*

Copy the folder **LuvNalia** and the files **Setup-LuvNalia.exe** and **Setup-LuvNalia.tp2** into your main SoA directory.

One or more files of this mod must be changed. This will be done by the patch from the folder **B/G World Fixpack**.

**13.4 de'Arnise Romance v7**

~DEARNISE/SETUP-DEARNISE.TP2~

The mod adds a romantic relationship between Nalia and a male player character who is human, elven, half-elven, or dwarven, of any character class and alignment.

*Don't install Arnel's Nalia Romance alongside with de'Arnise Romance because installing two dedicated PC/Nalia romances would be a poor idea. However, the mod can be installed together with Auren Aseph.*

Copy the folder **deArnise** and the file **Setup-deArnise.exe** into your main SoA directory.

### 13.10 Keeping Yoshimo v0.96

~7C-YOSHI/7C-YOSHI.TP2~

This mod makes it possible to keep Yoshimo in the party after spellhold and he can be imported into ToB. He has a couple of fairly lengthy dialogues with the PC.

*This mod is conceptual not compatible with the mods Yoshimo Friendship, Yoshimo Romance, Yoshimo's Remorse, Keto and Tortured Souls. Also it is not compatible with Banter Packs and with the "Sarevok's Remorse" component of Unfinished Business for BGII. The Quest Pack component "Saving Sanik In Brynnlaw" is incompatible if the party chooses to save Sanik.*

Copy the folder **#!Yoshi** into your main SoA directory. Copy the WeiDU-setup and rename it to **Setup-#!Yoshi.exe**.

### 13.14 Jan's Extended Quest v1.5

~JANQUEST/SETUP-JANQUEST.TP2~

You want to know how the story between thief illusionist, his former girlfriend and Vaelag, her violent husband, ends? This extension offers a continuation of this original quest in the form of two very short missions filled with typical dialogues and unexpected meetings with new supporting characters. Additionally, the mod aims to cast a new light on

some of the most influential organizations of the city.

Copy the folder **JanQuest** and the file **setup-JanQuest.exe** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

### 13.17 Coran for Baldur's Gate II v8

~CORAN/SETUP-CORAN.TP2~

This mod adds Coran, a great archer and an infamous womanizer in BG1, as a fully developed NPC to BG2. He can be found in the Gate district of Athkatla, near the entrance. In ToB, Coran can also be summoned from the Pocket Plane Fate Spirit. Coran has a full friendship path with the PC, player-initiated dialogue and a number of banters with all Bioware NPCs.

*This mod is technically neither compatible with the Bioware BG2 Coran nor with the Coran of Tortured Souls nor with Khalid for BGII.*

*This mod is technically not compatible with the Coran and Safana Romance component from BG1NPCSoA because you would have the NPC twice. This mod is contentswise not compatible with the Khalid mod.*

Install the file **Coran\_v2.exe** into any dummy folder **but by no means into your main directory!** Otherwise this mod would start to auto install immediately after being unpacked. The WeiDU-setup starts automatically, updates itself and breaks off. Now you will find the folder **Coran** and the file **setup-Coran.exe** as well as a file **SETUP-CORAN.DEBUG** in that dummy folder. Move them except the **SETUP-CORAN.DEBUG** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

### 13.19 The One Drizzt v1.41

~THEONEDRIZZT/SETUP-THEONEDRIZZT.TP2~

This mods adjusts Drizzt from Drizztsaga and Region of Terror. Now, you can travel with Drizzt from BG1 to BG2 and keep Drizzt's level and inventory.

*Both Drizztsaga and ROT must be installed before.*  
*This mod messes with The BG1 NPC Project Dynaheir quest.*  
*This version is not compatible with DrizztSaga v3.*

### 13.27 Xan for BG2 v19

~XAN/SETUP-XAN.TP2~

Xan, a depressed elven enchanter, is a character originally from Baldur's Gate, now added to Baldur's Gate 2 as well. The mod includes an extensive friendship path, two completely different romances for a female elven PC.

*Xan includes extra banters for Dungeon Crawl, Assassinations, Romantic Encounters, Tales of the Deep Gardens, The Sellswords, Back to Brynnlaw and The Longer Road. Install them in any order.*

*This mod is technically not compatible with the Xan component from BG1NPCSoA because you would have the NPC twice. This mod is contentswise not compatible with the Khalid mod.*

## 13. BG2 NPC-RELATED MODS

Copy the folder **Xan** and the file **Setup-Xan.exe** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

### 13.28 Xan's BG2 voice for BG1 Version 2

~XANBG2VOICE/SETUP-XANBG2VOICE.TP2~

This mod provides a different soundset for Xan NPC in Baldur's Gate I, the one recorded for Xan BG2 NPC mod. It is available in English only.

Install the file **XanBG2Voice\_v2.exe** into any dummy folder **but by no means into your main directory!** Otherwise this mod would start to auto install immediately after being unpacked. The WeiDU-setup starts automatically, updates itself and breaks off. Now you will find the folder **XanBG2Voice** and the file **Setup-XanBG2Voice.exe** as well as a file **SETUP-XANBG2VOICE.DEBUG** in that dummy folder. Move them except the **SETUP-XANBG2VOICE.DEBUG** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

### 13.29 Aeon v1.0

~AEON/SETUP-AEON.TP2~

Aeon is a young, impulsive, but trustworthy companion, who joins your team for gold. But why would a human use a moonblade? That's something you have to find on your own. You can find him deep beneath the graveyard.

Copy the folder **Aeon** and the file **Setup-Aeon.exe** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

What should be done with all components that are NOT YET installed? [A]sk about each one?

### 13.30 Sarevok Romance v1.4

~SAREVOKROMANCE/SAREVOKROMANCE.TP2~

A female eleven, half eleven or human can have a romance with Sarevok.

*Sarevok does not undergo a change of alignment within this romance.*

*The mod should be installed after Unfinished Business and after Romantic Encounters.*

Copy the folder **sarevokromance** and the file **setup-sarevokromance.exe** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

Choose your language: 1 [English]  
Install Component 0 [Aeryn's Sarevok Romance for BGII: Throne of Bhaal]? [I]nstaLL  
Successfully installed [Aeryn's Sarevok Romance for BGII: Throne of Bhaal] Press ENTER to exit

**13.31 Corthala Romantique v3**

~CORTHALAROMANTIQUE/SETUP-CORTHALAROMANTIQUE.TP2~

This mod adds a romance for female PCs of good or neutral alignment or female druids. The mod also adds friendship talks for the SoA part of the game for PCs that do not fulfill the romance criteria. For ToB, all dialogues added are for romance, only.

*The Romantic Encounters' components "Valygar Romance, by Kulyok" and "Valygar Romance ToB, by Kulyok" are technically compatible with Corthala Romantique, however content-wise it's no good idea to have two romances play together, as they paint slightly different pictures of Valygar and might make him sound like he has a bad short-time memory.*

*Tortured Souls is not compatible because that mod contains an own version of the Valygar romance.*

*The Unfinished Business component Suna Seni/Valygar Relationship must be installed first to make those two mods compatible. Note: The current love affair of Valygar and Suna Seni will be tuned down to a past love.*

*The Valygar Friendship works fine with Corthala Romantique. Corthala Romantique kills Valygar Friendship, but Valygar Friendship kills Corthala Romantique friendship talks in case of no romance.*

*This mod has crossmod content for Weimer's Solaufein and Jastey's Solaufein if they are installed before.*

Copy the folder **corthalaromantique** and the file **Setup-CorthalaRomantique.exe** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

These mods expand and improve your BG2 stores and items.

For BG2 there are a lot of new stores and items. With the big BG2 mods and the BG2 quest mods are already added a number of new. So as not to overfill BG2 with stores and items so that you easily lose track and no longer feel like to deal with this immense bulk of objects, we have made a choice in this “Stores and BG2 Items mods”.

### 14.50 Brendan Bellina Quivers (1-9) v1.0

~SETUP-BBQUIV.TP2~

This mod will add a quiver to your game.

*If you use the Unique Containers component from the Tweaks Anthology it will patch Brendan Bellina's containers into Perter's and Mira's shops in Waukeen's Promenade. (Otherwise, they are only available via CLUA Console; therefore, do not use the console to create these or any other containers, when Unique Containers is installed, as that will lead to buggy duplication of bag stores and inventories.)*

Copy the folder **BBQUIV** and the files **setup-BBQUIV.exe** and **setup-BBQUIV.tp2** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

Install Component	0	[Installation of Item BBQUIV1, BBQUIV2, BBQUIV3, BBQUIV4, BBQUIV5, BBQUIV6, BBQUIV7, BBQUIV8, BBQUIV9 - Quiver]?	[I]Install

#### 14.54 Brendan Bellina Scimitar of the Arch-Druid, "Sif's Gift" v1.1

~SETUP-BBSCARDR.TP2~

This mod will add the Scimitar of the Arch-Druid to your game.

*If you use the Unique Containers component from the Tweaks Anthology it will patch Brendan Bellina's scimitar into a shop later in the game. In addition, it will balance the weapon to fit in better to your game. (Otherwise, it is only available via CLUA Console; therefore, do not use the console to create it, when Unique Containers is installed, as that will lead to its buggy duplication.)*

Copy the folder **BBSCARDR** and the files **setup-BBSCARDR.exe** and **setup-BBSCARDR.tp2** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

### 14.67 igi's Item Mod 5b

~IITEMMOD/SETUP-IITEMMOD.TP2~

The iitem mod adds several dozen new items to the game, concentrating on lesser known item types (such as potions, bracers, arrows etc). Items are scattered randomly throughout the game world.

*iitem should be installed before the "Shadow Thief Improvements" and the "Chosen of Cyric" components of Rogue Rebalancing if both mods are to be used together because the part of iitem which adds random items to creatures could possibly cause some slowdown when used in conjunction with those components; so it is recommend not installing iitem alongside the aforementioned components of Rogue Rebalancing.*

Copy the folder **iitemMod** and the file **Setup-iitemMod.exe** into your main SoA directory.

The **B.G World Fixpack** adds a *subcomponent to the mod*.

Double-click the Setup. The DOS dialogue appears:

Choose your language:		0 [English]
Install Component	[View Readme]?	[N]ot Install

	1000 2] View readme file after installation	
	2000 3] Do not view readme file	
Install Component	1 [Items [version 5]?]	[I]nsta
	Items in the iitem mod are split into two categories; normal and 'flavour'. Flavour items are items that may have no relevance to the game, though they may add to the atmosphere (e.g. Spear +5 vs Dragons in BG1, where there are no dragons).	
	Normal items are always installed, you can choose whether to install flavour items.	
	Do you wish to install flavour items	
	0] Flavour items should be installed	[0]
	1] Flavour items should NOT be installed	
Successfully installed	[Items [version 5]	Press ENTER to exit

These mods or one of their components are either content wise or technically depending on other mods.

### 15.1 Almateria's Restoration Project 8.4

~ARESTORATIONP/ARESTORATIONP.TP2~

This is a mod for Baldur's Gate 2 aiming to restore literally all unused sounds, as well as some minor cut characters or locations.

### 15.2 Ding0's Quest Pack v3.5 (2)

~SETUP-D0QUESTPACK.TP2~

This mod adds other adventures to BG2; some are extensions, other absolutely new.

*This mod must be installed because of interactions with Kelsey, Keto and Virtue after these mods, must also be installed after NPC Flirt Pack to avoid inappropriate flirts in the underdark and must be installed before Refinements. Quest Pack should be installed AFTER Unfinished Business.*

*Many of the battles in QP respond to the difficulty slider. If you find one too difficult, try reducing the setting.*

*SCS explicitly states compatibility (mostly by replacing D0 AI) and says D0 provides AI for some creatures that SCS misses.*

**NOTE:** *This mod must be installed in two steps! The component Improved Oasis must be installed before the Longer Road mod.*

Copy the folder **questpack** and the files **setup-d0questpack.exe** and **setup-d0questpack.tp2** into your main SoA directory.

### 15.10 Smiling Imp Cross Banter Mod 1.2

~SMILINGIMPCROSSBANTERMED/SMILINGIMPCROSSBANTERMED.TP2~

Cross Banter between the BG1 NPCs and many NPC mods.

*The mod can be installed only if previously BG1 NPC for BG2: SoA has been installed. Each component installs crossmod-content for one or more of the following NPCs if they are installed before: Aeon, Allison, Angelo, Ariena, Biddekelorak, Horace, Hubelpot, Keto, Kiara-Zaiya, Kido, Kitanya, MTS/Azrael, Neh'taniel, Petsy, Questor, Saerileth, Solarom, Silverstar, Stivan, Swylif, Tsujatha, TsukiBG2, Valen, Varshoon, Yasarena.*

### 15.11 Faren v3

~FAREN/SETUP-FAREN.TP2~

Faren is a True Neutral dual-classed Fighter/Thief that can be found in the Trademeet jail. He has a friendly, laid-back disposition and is willing to share a joke or a drink with a protagonist who treats him with respect. He is playable all the way through to the end of the Throne of Bhaal expansion pack.

*Because of its crossmod content with many other mods Faren must be installed after all NPCs that are listed with the components.*

Copy the folder **Faren** and the file **setup-Faren.exe** into your main SoA directory.

**15.17 Rylorn v1.0.1**

~SETUP-RYLORN.TP2~

Rylorn is a young Blackguard dedicated to Cyric which joins only to an evil character. You may pick him up in the Dark Monastery (one of the nine new areas). If the reputation of the group rises too high, Rylorn can attack the group. He will not accept Imoen and Aerie in the party. This mod is playable complete through SoA and ToB.

*Rylorn is possibly not compatible with the large mods like "The Darkest Day", "Check the Bodies"...*

*Tactics components "Smarter Mages and Liches" must be installed before this mod.*

*Every mod which alters Carsomyr in any way must be installed before this mod, such as "Item Upgrade", "Item Revisions" main component, SCS component #3110 "Change Carsomyr so that its Dispel on contact power grants a saving throw".*

*Everything that alters Sir Ryan Trawl's inventory also must be installed before this mod.*

*Do not install any mod which will provide you with an option "Evil Paladins", that is:*

*Sword and Fist component #33 Blackguard Fighter Kit*

*Prestige Kit Pack component #2 Blackguard*

*The Darkest Day component #1 TDD Kits (Anti Paladin, Dark Knight, Dragon Slayer, Saurial Paladin)*

*Return to Trademeet Kitpack components #6 Anti-Paladin and #7 Dark Knight*

*Tactics mod component #27 Anti-Paladin Kit*

*Blackguard Fighter Kit mod*

*Region of Terror component #1 Region Of Terror Kit Pack (Dark Paladin)*

*Enhanced BG2 component #13 Dragon Slayer*

*The **B&G World Fixpack** makes changes to TDD and RoT so that the remaining kits can be installed.*

*The second quest in chapter six is buggy.*

### 15.19 Rjali NPC v8.5

~RJALI/SETUP-RJALI.TP2~

This mod adds Rjali as an amorous cleric/thief who will not leave your side. She will accept your other amours as long as you take good care of her. She has a full romance with the PC and banters with other NPCs. Adult content. The romance starts when she joins. This mod is intended only for heterosexual, non-evil males.

*This is the latest version that could be made compatible with BWP. Tv9.0 and up use script/dialog actions/triggers that are specific to BG2EE only. You'll miss the great stuff in v9.0 and v10.0.*

*It is highly recommended that you install the Tweaks Anthology component Romance Cheats with options "Allow multiple romance" and "Nothing kills romances" before installing this mod. Rjali is VERY multiple romance oriented. There's not much point installing Rjali without it.*

*Install all other romance mods before this mod because Rjali makes changes to them! Supported mods are:*

*Imoen Romance v3.9 (HIGHLY recommended! Install this before all other romance mods as the latest release tends to overwrite content of those other mods.)*

*Nalia Romance (de'Arnise Romance) v5*

*Saerileth Romance v18*

*Branwen Romance v3*

*Tashia Romance v1.4*

*Ninde Romance v3.0*

*Tyris Romance v7*

*Yvette Romance v3.0*

*Isra Romance BG2 v2.1*

*Dace Romance v1.3*

*Amber Romance v4*

*Skie ReDone v3.0*

*Petsy Chattertone v3.1*

*Fade Romance v7.3b (Install this mod after all the above romance mods; it has a bug that only can be fixed if it is last.)*

*Rjali makes the Saerileth mod, Branwen mod and Nalia mod multi-romance capable (if they are installed).*

*Should be installed before igi's Item mod.*

Copy the folder **Rjali** and the file **setup-Rjali.exe** into your main SoA directory.

### 15.20 Heroes, Thieves and Moneylenders v3.0 (2)

~HERTHIMONEY/HERTHIMONEY.TP2~

This mod adds several mini-quests and dialogues, a new bank location on the Waukeen Promenade and many reactions of NPC-party members to story events.

*This mod should be installed AFTER all mods adding new NPCs except the first component that has to be installed before for technical reasons. The mod has cross-mod content with: BG1NPCSoA, Tiax, Branwen for BG2, Imoen Forever.*

### 15.21 Kivan and Deheriana Companions for BG2 v16

~KIVAN/SETUP-KIVAN.TP2~

formerly: Kivan of Shilmista

This mod adds Kivan from BG1 and under certain circumstances, his elven wife Deheriana to the cast of BG2 actors. This mod is a first cut at telling one of the most romantic stories of BG1.

*This mod is technically not compatible with the Kivan component from BG1NPCSoA because you would have the NPC twice. This mod is contentswise not compatible with the Khalid mod.*

Copy the folder **Kivan** and the files **Setup-Kivan.exe** and **Setup-Kivan.tp2** into your main SoA directory.

### 15.22 Crossmod Banter Pack for BG2 v21

~CROSSMODBG2/SETUP-CROSSMODBG2.TP2~

This mod adds dozens new banter, interjections, romance conflicts between the NPCs from different mods if these are installed.

*This mod must be installed AFTER Kivan and Deheriana Companions and AFTER all other NPC mods. Crossmod with: Adrian, Ajantis (BG2, ToB), Alassa, Amber, Angelo, Aran Whitehand, Arath, Auren, Branwen, Coran,*

## 15. MISCELLANEOUS DEPENDEND MODS

*Dace, Darian, Fade, Faren, Gavin (BG2, ToB), Goo, HaerDalis Romance, Haldamir, Homeward Bound, Hubelpot, Isra, Iylos, Kari the Kobold, Kelsey, Keto, Kido, Kindrek, Kitanya, Kivan of Shilmista, Laufey's Edwin Romance, Nathaniel, Neh'taniel, Nephele, Ninde, Petsy Chattertone, Saerileth, Sarah, Solaufein, Tales of the Deep Gardens, Tashia, The Longer Road, The Luxleys, Tiax, Tsujatha, Wikaede, Willie Bruce, Xan, Xulaye, Yasraena, Yoshimo Romance, Yvette.*

Copy the folder **CrossmodBG2** and the file **Setup-CrossmodBG2.exe** into your main SoA directory.

## 16.2 Universal Clear Fog of War v1.0

~UCFOW/SETUP-UCFOW.TP2~

This mod removes the Fog of War from maps, so you don't have to explore them. It will work for every area, modded or not.

*This mod only works with Party AI enabled but will work instantly if you have AI off and turn it on for three or four seconds and then turn it off again if you don't want the AI on.*

### 16.5 Hidden Adventures beta 7

~HIDDENADVENTURE/HIDDENADVENTURE.TP2~

This mod adds a few quests and tweaks to BGT and Baldur's Gate 2.

*The component "Silver Dagger in Irenicus Dungeon" requires BGT to be installed. "Anomen's extended plot" needs to be installed after "Jasteys Ajantis for BG2", "NPC Tweak", and "Weimer's Item Upgrade Mod" because this component includes crossmod content for these mods.*

### 16.7 cbisson's FamiliarPack v6

~SETUP-FAMILIARPACK.TP2~

New familiars are added with this mod.

*This mod is useful only if want to play with familiars. Unfortunately there are some inconsistencies with the familiars in the game. You can, however, install this mod without worries.*

Copy the folder **FamiliarPack** and the files **Setup-FamiliarPack.tp2** and **Setup-FamiliarPack.exe** into your main SoA directory.

Install Component 8 [Weapons for all]?

[N]ot Install

*This component changes the weapon proficiencies for nearly all kits and thus it is not compatible with any mod or component that also change the weapon proficiencies.*

*If you want to install this component, you should install it after any other item-mods, because it alters also objects from all other mods installed before. Ashes of Embers has a similar, however more elaborated component.*

Install Component 9 [Special Encounters]?

[I]nstall

Install Component 10 [Improved Bard Song]?

[N]ot Install

*Don't install this component together with other Bard Song Tweaks like the BG2 Fixpack component Bard Song Fixes.*

Install Component 11 [Improved Irenicus Dungeon]?

[N]ot Install

*This component is for those, which the original dungeon is too boringly, but the "Improved Ilych" from Tactics is to suicidal. The concurrent installation together with "Improved Ilych" is not recommendable because it could be that you lack some pieces of equipment which you need to defeat the big boss from "Improved Ilych".*

*By concurrently installation with ROT this component may cause a crash. The crash can be avoided if the group after the Djinn does not go at the bottom edge of the corridor, but the group members individually go along the upper edge of the corridor to the sewage golem.*

*Do not install it together with the component Improved Dungeon from Revised Battles.*

Install Component 12 [Grandpa's Shield quest]?

[N]ot Install

*This component overwrites PALIN.CRE, a Tales of the Sword Coast file.*

Successfully installed

Press ENTER to exit

*With this mod you can add 2 kits to the game: 1 fighter and 1 thief. The B&G World Installpack will handle this correctly for you.*

## 16.9 Fading Promises v9

~FADINGPROMISES/SETUP-FADINGPROMISES.TP2~

This mod introduces a long dead fallen paladin of Amaunator, who needs help in completing his last task.

*This mod must be installed after the Victor's Improvements Pack component "Lydia's Scroll".*

Copy the folder **fadingpromises** and the file **Setup-fadingpromises.exe** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

### 16.10 Drizzt Is Not Stupid (BGT) v1.1

~DRIZZTISNOTSTUPID/SETUP-DRIZZTISNOTSTUPID.TP2~

With this mod Drizzt in BG1 cannot be deprived of his weapons.

*Should be compatible with Drizzt Saga v3, provided the Delayed Start component is installed.*

Copy the folder **DrizztIsNotStupid** and the files **readme-DrizztIsNotStupid.html** and **Setup-DrizztIsNotStupid.exe** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

Choose your language:		0 [English]

Successfully installed	[Drizzt Is Not Stupid]	Press ENTER to exit

The readme opens.

### 16.11 Game Over Only on Party Dead v1.7

~NOGAMEOVER/SETUP-NOGAMEOVER.TP2~

This mod changes drastically the game over condition. Not the protagonist's death ends the game any more, but the annihilation of the entire party.

*In the BGConfig.exe 3D acceleration must be enabled, otherwise the game may end with a crash to desktop if all party members are dead.*

*This mod requires the BG2Fixpack and BGT to work.*

*This mod is not compatible with the mod SandrahRTF.*

Copy the folder **nogameover** and the file **setup-nogameover.exe** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

Choose your language:		0 [English]
Would you like to display the readme?		[N]o

### 16.12 Dungeon-Be-Gone v1.7

~SETUP-DUNGEONBEGONE.TP2~

This mod enables you to skip optionally Irenicus' Dungeon while still giving you loot and experience.

*If you have installed a mod that adds new content to the Irenicus dungeon (such as Improved Ilyich or the Imoen Romance), you will skip it using this option.*

Install the file **DungeonBeGone-v16.exe** into any dummy folder **but by no means into your main directory!** Otherwise this mod would start to auto install immediately after being unpacked. The WeiDU-setup starts automatically, updates itself and breaks off. Now you will find the folder **jassy** and the files **Setup-DungeonBeGone.exe**, **Setup-DungeonBeGone.tp2** and **dbgaudio.bat** as well as a file **SETUP-DUNGEONBEGONE.DEBUG** in that dummy folder. Move them except the **SETUP-DUNGEONBEGONE.DEBUG** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

Choose your language:		0 [English]

### 16.13 Skip Chateau Irenicus v3.1

~SKIPCHATEAUIRENICUS/SETUP-SKIPCHATEAUIRENICUS.TP2~

This is a serious alternative to the Dungeon-Be-Gone mod. Either install one or the other.

*This mod is not compatible with NeJ3v71.*

Copy the folder **SkipChateaulrenicus** and the file **setup-SkipChateaulrenicus.exe** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

## 16.14 Parting Ways v1

~PARTING/SETUP-PARTING.TP2~

This mod allows you to re-recruit Baldur's Gate NPCs once you kicked them out.

*Both SCS and BG1NPC have much more advanced versions of this. This should not be installed.*

Copy the folder **parting** and the file **setup-parting.exe** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

Install Component 0 [Parting Copmany]? [I]Install

## 16.15 Mal des Vampirismus v1.3a

~PCVAMP/SETUP-PCVAMP.TP2~

If you join Bodhis guild, you have the choice to be transformed permanently into a vampire.

*Dawn of Vampirism currently has only a german translation. For an English version please access the version 1.1.*

*This mod conflicts with the Romantic Encounter component "Bodhi's Allure, by Kulyok (adult content)". The dialog about turning the PC into vampire gives you an empty dialog box for duration of Dawn of Vampirism dialog part.*

Copy the folder **pcvamp** and the file **setup-pcvamp.exe** into your main SoA directory.

## 16.16 Drows v1.1

~SETUP-DROWS.TP2~

This mod changes the party's vanilla NPCs' portraits to "drow variants" after Adalon casts her Polymorph spell over the party.

*It should be compatible with Tweaks Anthology' "No Drow Avatars On Party In Underdark" component if installed BEFORE it.*

Copy the folder **Drows** and the files **setup-Drows.exe** and **setup-Drows.tp2** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

## 16.17 Mortis Mini Mod v2.32

~SETUP-MORTIS.TP2~

This mod adds two new stores to the game which sell items that transform the main char into different other creatures like liches or vamiros.

ATTENTION: you must use the version Weidu\_Mortis\_V23! CONDITION: TDD must be installed!

*The mod is neither compatible with Raziel or Worgas.*

## 16. BG2 RULES, TWEAKS AND SPELLS

### 16.18 Sarevok Related Tweaks v1.3

~7C#SARTWEAK/7C#SARTWEAK.TP2~

This mod offers options to change Sarevok's weapon and turn him more powerful by restoring him to his non-TotSC BG1 version.

*This mod requires both BGT and Ascension or BP- Ascension to be installed. This mod should be installed \*before\* Sword Coast Stratagems.*

Copy the folder **7c#sartweak** and the file **setup-7c#sartweak.exe** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

Would you like to display the readme?		[N]o

Install Component	[Give Sarevok a better weapon]?	
	250	1] Give him a Two-Handed Sword +2
	251	2] Give him Ascension's Final Battle Sarevok's sword
		[2]

*This component requires Ascension to be installed.*

### 16.19 The MTS Crappack v4

~SETUP-MTS\_CRAPPACKV2.TP2~

This is a collection of tweaks for BGII. Most are older components converted in WeiDU. The NPC-Mods Azrael and Mike are included in this Mod.

*Most components are obsolete except components 23 and 24.*

Copy the folder **MTS** and the files **Setup-MTS\_Crappack.exe** and **Setup-MTS\_Crappack.tp2** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

## 17.6 Hidden Kits

~SETUP-HIDEKT.TP2~

This mod introduces a variety of Hidden Kits that are made available under certain conditions. Typically all of them are obtainable by Dual-Classing at level 12, from either a Fighter, Mage, or Cleric. The amount of XP required to achieve the Hidden Kit is considerable, but so are the advantages gained. Note that certain Basic Stats are still required to successfully Dual-Class.

Apart from a few standard advantages and disadvantages within the Kit itself, most notably present in ALL the Hidden Kits is the ability to increase your INACTIVE Class by one level every time you level up. This advantage enables to effectively gain a multi-class character on the rate of a single-class character.

Copy the folder **Z#HideKt** and the files **Setup-HideKt.exe**, **Setup-HideKt.tp2** and **readmeHideK.txt** into your main SoA directory.

**17.15 Auror Kit v4.4.1**

~A4AUROR/SETUP-A4AUROR.TP2~

A unique archer with an exceptional ability to control the forces of Ice and Winter. She is a stalwart protector of the weak and a vicious, cold foe of evil.

*It is named 4.03 in its readme and tp2 file.*

*It is strongly suggested using this kit with a female character unless you have an editor (for example Shadowkeeper) or it will ruin the experience.*

*Gamers' comment: "It is unbalanced and too powered, for sure."*

Copy the folder **A4Auror** and the file **Setup-A4Auror.exe** into your main SoA directory.

**17.24 Druidic Sorcerer v1.9**

~SETUP-DRUIDSORCERERKIT.TP2~

This kit offers a uniquely powerful magic-user player class. It combines certain abilities of the druid and the sorcerer. The Druidic Sorcerer is undeniably the most powerful class that you can play, but you will have to work for that power. This kit gives an interesting play experience while preventing it from becoming ridiculously powerful.

*This kit is selectable under the Druid tab on character creation, and you must be a human or a half-elf to select it. It is possible that the spells "Torrential Cacophony" or "Fiery Cataclysm" may crash your game.*

*Read carefully the readme!*

*Note: You can only install one sorcerer. The last installed one will overwrite the previous one.*

**17.32 Blackguard Fighter Kit v1.01**

~X0BLACK/X0BLACK.TP2~

The Blackguard epitomizes evil and is a villain of the foulest sort. Some people call these villains "antipaladins" due to their completely evil nature.

*This mod is not compatible with the Rylorn mod.*

Copy the folder **x0black** and the file **setup-x0black.exe** into your main SoA directory.

### 17.35 Runiczny Pieśniarz Klingi (Rune Singer Blades) v. 2.0

~SETUP-RUN.TP2~

Rune Singer Blades are mystical defenders of elven race and the eternal order of Faerûn. Their ancient powers are able to prevent death and destruction, wars and natural disasters.

*This mod is not compatible with TDD fighter kit Mage hunter.*

Copy the folder **Run** and the files **Setup-Run.exe**, **Setup-Run.exe** and **readme.txt** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

```

Successfully installed [Runiczny Pieśniarz] Press ENTER to exit
```

### 17.36 Arcane Archer

~ARCANEARCHER/SETUP-ARCANEARCHER.TP2~

These elven warriors use innate magic talent to supplement their deadly marksmanship. Arcane archers can create special arrows and with them achieve what ordinary fighter cannot.

*This mod conflicts with Refinements (the kit creates arrows but the arrows themselves are not equippable).*

Copy the folder **ArcaneArcher** and the file **setup-ArcaneArcher.exe** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

```

### 17.37 Custom Kits: The Spellsword v1.5

~A7-CUSTOMKITS/SETUP-A7-CUSTOMKITS.TP2~

The spellsword is a fighter kit which features monk-like abilities together with many advantages of the fighter class. Because of the spiritual part of the kit your character now has two prime stats (Strength and Wisdom) to cope with.

*The kit comes in two flavors. You can choose between the nerfed and the original version.*

Copy the folder **A7-CustomKits** and the file **Setup-A7-CustomKits.exe** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

**17.38 Armiger Kit v1.0**

~ARMIGER/SETUP-ARMIGER.TP2~

The Armiger is a specialist of defensive fighting style with improved Armour Class and abilities, which relies on counterattacks. Also he has unique HLA ability.

While other warriors rely on speed or canny parries to defend themselves, the armiger trusts in his armor. Armigers create their own protective gear and improve it over time. They can stand before dozens of opponents, confident that their armor will shield them from harm.

Copy the folder **Armiger** and the files **Setup-Armiger.exe** and **setup-Armiger.tp2** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

**17.39 Samurai Kit v1.0 by Maurolava**

~SAMURAIKIT/SETUP-SAMURAIKIT.TP2~

*Not to be confused with Samurai Kit by Greener.*

Known for their matchless bravery and strict code, they are cultured warriors who strive to be courteous, brave, and unswervingly loyal to their overlord.

*This mod is not compatible with the same kit from RTT kitpack.*

Copy the folder **SamuraiKit** and the file **Setup-SamuraiKit.exe** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

**17.40 Tempest KitMod v1.0**

~TEMPEST/SETUP-TEMPEST.TP2~

The Tempests are group of warriors that have an innate ability to control lightning. Through their training, they specialize in fighting with two swords, strike hard and fast, learn devastating lightning based attacks, and are deadly foes. However, their fighting style only lets them wear studded leather armour, and the containment of their powers is taxing on their bodies.

**17.42 Diablo2 Kit Pack - The Amazon v0.4**

~D2AMA/SETUP-D2AMA.TP2~

This powerful woman warrior is accustomed to fighting to defend her own. While her skill with the bow rivals that of the Rogues, the Amazon is also adept in the use of spears and other throwing weapons, as well as in hand to hand combat. The Amazon is much sought after as a mercenary, in which type of service she will be loyal as long as her own ends are also served.

### 17.44 Diablo2 Kit Pack - The Barbaian v1.0

~D2BAR/SETUP-D2BAR.TP2~

Ceaseless warfare and the constant struggle to survive in the hostile wilderness are evident in the Barbarian's sturdy and powerful frame. Though perhaps lacking the sophistication of his civilized contemporaries, the Barbarian has an acute awareness of his surroundings. He believes that he can improve his superb battle tactics by calling upon the totemic animal spirits to infuse him with supernormal strengths and abilities.

### 17.46 Diablo2 Kit Pack - The Paladin v0.9

~D2PAL/SETUP-D2PAL.TP2~

A battle-ready warrior for whom faith is a shield, the Paladin fights for what he believes to be right. His steadfastness gives him powers to bestow blessings to his friends and wreak cruel justice on foes. There are those who call the Paladin an overwrought zealot, but others recognize in him the strength and goodness of the Light.

Copy the folder **d2pal** and the files **SETUP-d2pal.exe** and **SETUP-d2pal.tp2** into your main SoA directory.

**17.47 Jedi & Sith Kits v1.1**

~SETUP-JEDI\_SITH.TP2~

This mod will introduce two fighter kits Jedi and Sith, who are from Star Wars, into your game.

The Jedi are well known for their talent in manipulating The Force. Their Force powers can penetrate magic resistance. The Jedi are good at fighting with lightsabers, but can not fight in armors.

The Sith are much like the Jedi, except for they believe in the dark side of The Force while the Jedi believe in the light side of The Force.

Copy the folder **Jedi&Sith** and the files **Setup-Jedi&Sith.exe** and **Setup-Jedi&Sith.tp2** into your main SoA directory.

**17.48 MegaModKits v1.01L**

~MEGAMODKITS/MEGAMODKITS.TP2~

The kits in the large mods mostly are only usable by one NPC. This mod resurrects them in their full potential, adds missing bam files and makes the kits useable for any races the player character is, or they have fewer restrictions.

*Take care not to install kits that are already installed together with its original mods.*

Copy the folder **MegaModKits** and the file **setup-MegaModKits.exe** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

*Archer of Sylvanus and Sylvan Mystic should be installed after the Divine Remix mod and after other item mods. It is unlikely but possible that the Sylvan Mystic kit, Archer of Sylvanus kit and Arcane Fist kit may cause some compatibility problems with mods that alter the "Specialty Priest Of Talos" cleric kit, "Undead Hunter" paladin kit and "Specialty Priest Of Lathander" cleric kit due to some usability hacks that were implemented for the item restrictions. It is recommended that the kits be installed after other item and kit mods but before tweak mods.*

## 17.52 Derat's Unused Kits Pack v17.1 (1)

~DERATS\_KITS/SETUP-DERATS\_KITS.TP2~

This mod offers interesting kits of the rarely performed "pure" classes (without multiclassing). Hence the term "unused".

**18.5 Song and Silence v16**

~SONG\_AND\_SILENCE/SETUP-SONG\_AND\_SILENCE.TP2~

This mod enhances the thieves and bards, adds some new kits and items for both classes and some general fixes.

*This mod should be installed before Rogue ReBalancing, because it copies a few 2DA's instead of patching them. This could potentially cause compatibility issues if Song and Silence is installed after a mod which also alters these files (such as Rogue ReBalancing). These issues should not create any significant problems if Song and Silence is installed before any other mods which also make changes to the thief and bard kits. Rogue ReBalancing and Refinements likewise change the rogues (bard and thieves). You get the support of that mod of the both which was installed as last. The use together with Rogue Rebalancing is expressly recommended! The mod is fully compatible with the changes made in the Ashes of Embers "Universal Weapons" component, provided Song and Silence is installed after it. Install thieves kits and bards kits before!*

## 18.7 Divine Remix v8.1

~DIVINE\_REMIX/SETUP-DIVINE\_REMIX.TP2~

(former: Cleric Remix)

This mod aims to rebalance and change several aspects of divine-magic-using classes (clerics, paladins, druids, and rangers) in Baldur's Gate I + II. As well as arcane magic has its different school, the divine magic is divided into effect spheres like animal, nekromantic, protection etc. The available magic are depending on belief of the user in the different divinities and, hence, are limited to the effect sphere of the divinities and can vary from class to class and even within the character classes.

Divine Remix also changes the default Cleric kits from vanilla BGII (Priests of Lathander, Helm and Talos) to the much more complex Morninglord of Lathander, Watcher of Helm and Stormlord of Talos. These are not additional kits but replacements for the originals.

*IR, SR, 1pp, and item mods generally should be installed before DR component 1000.*

*Install druid kits, cleric kits, paladin kits and ranger kits before!*

*This mod must be installed after Oversight, because it corrects some errors from Oversight. Divine Remix has to be*

installed after any mods that add Cleric/Paladin/Druid/Ranger Kits (mxsplprs.2da, mxsplpal.2da, mxspldru.2da, mxsplran.2da) or else they'll have empty spell books.

The kits are not designed to be installed without the DR components.

High level ability mods like Vecna may not be compatible. Spell packs are fully compatible, though if the player wishes to use the sphere system, it is recommended that spell mods be installed prior to Divine Remix.

SCS has slight compatibility issues with Divine Remix. Divine Remix rearranges the spellbooks of some potentially-hostile priests and SCS, not knowing this, will fail to use their spells effectively. This is unlikely to have any significant effect on play, though.

**INFO:** Spell Revisions has some compatibility issues with Divine Remix, so it is not recommended to use them together at this time. Currently, installing SR after Divine Remix will result in divine spells no longer following the sphere system while installing Divine Remix after SR will result in the replacement of some of SR's spell descriptions and the disappearance of some of SR's new and moved spells.

Unfortunately the sphere system is fragmentary yet. Apparently IWDification and SpellPackb6 are in fact supported by DR's sphere system.

**WARNING:** Also in an unmodded game the component 1000 "Implement sphere system" causes the game to crash as soon as you click the "New Game" button. You can either use DRv7 with the sphere system or DRv8 without it. DRv7 uses the same component numbers except for the sphere system. Use component 0 "Divine Remix Core Components (Required for Everything)" instead.

Copy the folder **Divine Remix** and the file **Setup-Divine\_Remix.exe** into your main SoA directory.

*This component modifies traps throughout BG2 to be triggered by creatures outside the party, be they friendly or hostile. This allows you, for example, to trigger traps by sending summons through them. Illusions, Wizard Eyes, Shadows, Mists and Air Elementals will not trigger traps.*

*This component may cause issues with the Improved Ilyich component of the Tactics mod because with that component installed, Ilyich can potentially wander over fatal traps without any action.*

*This component is conceptually incompatible with the "Shadow Thief Improvements" component of Rogue Rebalancing as it will inadvertently cause the Shadow Thief opponents to trigger their own traps. ### 18.13 bltweak v4 "Lite"

~SETUP-B!TWEAK\_LITE.TP2~

This mod is a small collection of tweaks. It includes an adjusted CTD-proof "Ashes of Embers"-based weapon proficiency system.

*For BWP we use the "Lite" version. The full version includes a lot of specially adjustments that are not supportet by BWP. Many of them are already included in other mods.*

*The mod should be installed before Item Revisions' "Weapon Changes" component.*

Copy the folder **bltweak\_lite** and the file **setup-bltweak\_lite.exe** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

### 18.14 Bard Song Switching (Icewind Mode) v2.2

~SETUP-BARDSONG\_BG2\_IWD.TP2~

With this mod you can freely switch to the bard song you need by clicking new buttons in Special Abilities. If you've installed any new bard kits, then install this pack, because only the original kits will have the ability of selecting songs.

*Not compatible with other mods that modify the original bard kits.*

*Compatible with new bard kits, but can not give them ability of switching songs.*

*Must be installed after the HLA-revisions of Rogue ReBalancing.*

Copy the folder **BardSong\_BG2\_IWD** and the files **Setup-BardSong\_BG2\_IWD.exe** and **Setup-BardSong\_BG2\_IWD.exe** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

### 18.17 One Pixel Productions v4.2.0 (1)

~1PP/1PP.TP2~

This is an essential mod that improves with attention to detail, the graphics of BGII.

This mod combines and complements the previously disjointed mods 1PP v2.7, 1PP v3: Avatar Fixes 2, 1PP v3: Female Dwarves, 1PP v3: Thieves Galores v1.1 and a few more to one huge single mod.

*Detection and native support for Infinity Animations is included.*

*Crossmods compatibility with BG1 NPC Project, Bolsa, Darron, Improved HaerDalis Swords, Rolles, Ruad Ro'fhessa, Song and Silence, Stuff of the Magi, The Unusual Oddities Shop, Chloe, Yasraena, IWD in BG2. Partial compatibility with Item Revisions, Spell Revisions and IWDification.*

*Item Revisions is compatible with 1PPv4 when you follow this installation order:*

*Install before IR's main component:*

*101 Core Paperdolls (included in IR but required for other 1PP components)*

*400 Core Updates and Item Patches (partially included in IR but required for other 1PP components)*

*401 Improved Projectile Effects*

*Install after IR's main component:*

*113 Smart Avatar & Armour Switching*

*210 Increased Paperdoll Object Variety (core)*

*Don't install because they are already included:*

*203 Restored Flame Sword Animations*

*204 Colourable Quarterstaves*

*205 Legacy Shields v2*

*206 Additional Shield Animations (core)*

*207 Wizards' Staves (core)*

*208 Additional Helmet Animations (core)*

*Aurora's main component also patches BGMain.exe, therefore 1PP component Unique Thief Avatars can not be installed after Aurora or after Infinity Animations main component.*

*At least the 1PP component "Softer Spell Effects" must be installed before Spellpack because otherwise some spells and items will be faulty patched and display wrong animations.*

**NOTE:** *This mod must be installed in three steps! Only the components Core paperdolls and Core content patches should be installed before Item Revisions main component. All the others components should be installed after. "The Smart Avatar & Armour Switching" component needs to be installed seperately at the end of the megamod.*

Copy the folder **1PP** and the files **setup-1pp.exe** and **1pp.tp2** into your main SoA directory.

## 18.18 Item Revisions v4b10 (20 June 2017) (1)

~ITEM\_REV\ITEM\_REV.TP2~

**NOTE:** There is a revision for this mod - **IR Revised V1.3.400 (2021 March 17th)**.

**NOTE:** This mod must be installed in three steps! The main component of IR overwrites existing items and their descriptions, so it should be installed before mods that patch items and also before Rogue Rebalancing. The other components of IR have been designed to patch all items, including items added by other mods, so they should be installed after all tweak mods that add or replace items and also after Rogue Rebalancing.

**For full description see step (2)**

Copy the folder **item\_rev** and the file **setup-item\_rev.exe** into your main SoA directory.

Copy the folder **item\_rev** from **IR Revised V1.3.4** into your main SoA directory overwriting the designated files and folders with the new ones.

### 18.24 Lost Crossroads Spell Pack for Baldur's Gate 2 v6b

~SETUP-SPELLPACKB6.TP2~

This mod renews the graphics of the spells, so that they are more similar to IWD.

*It is strongly recommended to install trap adding mods (usually quest mods) before SpellPack, so then SpellPack can patch their trap scripts.*

*It is also advised (for maximum effect) to install Divine Remix after Spell Pack.*

*Because Sword Coast Stratagems makes duplicates of existing spells for the AI, it is recommended you install it after SpellPack.*

*Spell Pack Beta 6 is completely technically compatible with SR when it is installed after SR. Spell Pack adds some new spells and it revises some old ones. It has separate components for each spell, so if you prefer the SP version of a particular spell, you can install that component to replace the SR version. I can't comment on how well SR and SP match up conceptually.*

*This mod is not compatible with Wild Mage Additions.*

*This mod requires a powerful computer!*

Copy the folder **SpellPackB6** and the files **Setup-SpellPackB6.exe** and **Setup-SpellPackB6.tp2** into your main SoA directory.

### 18.25 Wild Mage Additions v2.1

~WILDMAGE/SETUP-WILDMAGE.TP2~

This mod features 27 new wild magic spells, as well as the Spellshaper Kit - a practitioner of wild magic who casts his spells by virtue of raw magical talent or gift, a wizard capable of casting spells spontaneously.

*The Wild Mage Rhalto is unbeatable at the first encounter in BG1. That's no bug - it's intended by the author and there is a chance to escape unscathed.*

*This mod is useful only if want to play a Hasardeur. You can, however, install this mod without worries.*

*This mod is not compatible with Lost Crossroads Spell Pack.*

Copy the folder **WildMage** and the file **Setup-WildMage.exe** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

### 18.26 Spell-50 v12

~SETUP-SPELL50.TP2~

The Spell-50 mod extends a number of priest, druid and mage spell effects to level fifty. This mod has nothing to do with the level 50 ruleset of BP. Both can be installed at the same time.

*It is not recommend to use Spell-50 with Spell Revisions as conceptually they are on opposite extremes. Spell Revisions is trying to "rebalance" spells, while that mod purposely makes them extremely overpowered.*

Copy the folder **spell50** and the files **Setup-Spell50.exe** and **Setup-Spell50.tp2** into your main SoA directory

### 18.27 Semi-Multi-Clerics 0.2.3

~SETUP-SEMI\_MULTI\_CLERICS.TP2~

This mod will add various clerical spells to wizard magic users via a new item, effectively turning them into previously unavailable Cleric kits / multiclass combinations. The semi-multi learns and uses spells as per a normal Arcane caster, and also has access to 35 clerical spells.

Copy the folder **semi\_multi\_clerics** and the files **Setup-semi\_multi\_clerics.exe** and **setup-semi\_multi\_clerics.tp2** into your main SoA directory.

### 18.28 Authentic mischievous Fairy Dragon v6

~SETUP-FAIRYDRAGON.TP2~

Now your familiar fairy dragon is more useful and more authentic - your 7th member in the party. It can be summoned only by a chaotic-good magic user.

*This mod it is useful only if want to play with familiars. You can install this mod without worries, however the dragon is too powerful for BG1 and rather useless in BG2.  
Authentic Fairy Dragon must be installed after Spell Revisions.*

Copy the folder **fairydragon** and the files **Setup-fairydragon.exe** and **Setup-fairydragon.tp2** into your main SoA directory.

### 18.29 WTP Familiars for Throne of Bhaal v2.5

~WTPFAMILIARS/SETUP-WTPFAMILIARS.TP2~

This mod introduces an more PnP faithful version of the standard Find Familiar spell. The player will be able to

## 18. SPELLS, TWEAKS AND HLA CHANGING MODS

choose from a pool of three or four creatures. When the spell is cast you will be able to select the Familiar matching your own alignment or one of the Familiars whose alignment is closest to your own.

*Install this modification after Spell Revisions or any other modification that changes the Find Familiar spell in any way.*

### 18.31 Infinity Animations Core WeiDU beta 5 (1)

~INFINITYANIMATIONS/SETUP-INFINITYANIMATIONS.TP2~

Infinity Animations restores standard animations that mods have overwritten and solves slot and naming conflicts.

This mod consists of the core package for the actual installation and the content packages, which contain the appropriate graphics. (For most megamods all archives are needed.) For a complete installation all necessary packages must be downloaded and unpacked into the appropriate infinityanimations subfolder.

*Install this mod after most other mods, particularly those that add creatures or animations, but before 1PP, BG2 Improved Gui and any final "biffing" routines.*

**NOTE:** This mod must be installed in three steps! The components "BG1 Character Animations for NPCs" and "BG1 Character Animations for PCs" should be installed only after Level 1 NPCs!

Copy the folder **infinityanimations** and the file **Setup-infinityanimations.exe** into your main SoA directory.

Unpack only the following archive into the ...\\BGII - SoA\\infinityanimations\\restore folder by choosing the option "No pathnames" with 7-Zip and delete afterwards the empty subfolders:

**18.32 IWDification v5**

~IWDIFICATION/SETUP-IWDIFICATION.TP2~

This is a mod that brings some of the elements of Icewind Dale into the Baldur's Gate series of games.

*TobEx is highly recommended for players using the spell packs. Without TobEx, spell selection screens during character creation are limited to 24 spells.*

*The fourth-level divine spell relies on Infinity Animations, as the beetles summoned by the spell do not have animations in BG2, and will be skipped without the mod being installed. One of the summons (yeti) for the sixth-level arcane spell Monster Summoning IV will not be available without Infinity Animations, though the spell will otherwise work with the other two summon options.*

**Known Issues:** For the Arcane and Divine Spell Packs, not all spells could be converted to the original Baldur's Gate II engine. The Cat's Grace spell (part of the Arcane Spell Pack) requires TobEx for its unique dexterity modifications. Giant Insect (part of the Divine Spell Pack) requires the beetle animation, part of Infinity Animations. Soul Eater, Seven Eyes, Favor of Ilmater, and Spiritual Wrath are not available.

Copy the folder **iwdification** and the file **setup-iwdification.exe** into your main SoA directory.

### 18.37 Brandock the Mage beta6

~C#BRANDOCK/SETUP-C#BRANDOCK.TP2~

This is a NPC Mod for BG1 for the whole Baldur's Gate Epic. So far, only BG1 content is included. If he is granted to go through every library found in game this will give him a bonus to his lore score. If the group consist of 6 NPCs already, Brandock will join as a "7th party member" and follow like a familiar.

*To get most cross mod content, install the mod after BGQE, The Calling, BG1NPC, Brage's Redemption, Gavin BG1, Alternatives, NPC Strongholds but before Grey the Dog.*

### 18.39 Viconia Revamped v7.1

VICONIAREVAMPED/SETUP-VICONIAREVAMPED.TP2

formerly: La'Viconia.

This mod changes Viconia's class from a cleric to a cleric/assassin. Viconia will also receive a Symbol of Shar after reaching a specific level as a cleric and she also gains a new special ability, "Embrace of Shar."

*Divine Remix's "Add Nightcloak of Shar Kit to Viconia" component in conjunction with this mod will conflict.*

The following mods give the finishing to Baldur's Gate. With individual settings the huge game world will be customized. If you play through BG1, BG2 and ToB with all mods, you will get the feeling to experience really one single big game.

### 19.1 Infinity Animations Core WeiDU beta 5 (1)

~INFINITYANIMATIONS/SETUP-INFINITYANIMATIONS.TP2~

Infinity Animations restores standard animations that mods have overwritten and solves slot and naming conflicts.

This mod consists of the core package for the actual installation and the content packages, which contain the appropriate graphics. (For most megamods all archives are needed.) For a complete installation all necessary packages must be downloaded and unpacked into the appropriate infinityanimations subfolder.

*Install this mod after most other mods, particularly those that add creatures or animations, but before 1PP, BG2 Improved Gui and any final "biffing" routines.*

**NOTE:** This mod must be installed in three steps! The components "BG1 Character Animations for NPCs" und "BG1 Character Animations for PCs" should be installed only after Level 1 NPCs!

Copy the folder **infinityanimations** and the file **Setup-infinityanimations.exe** into your main SoA directory.

Unpack only the following archive into the ...BGII - SoA\infinityanimations\restore folder by choosing the option "No pathnames" with 7-Zip and delete afterwards the empty subfolders:

## 19.5 Jarl's BGT Adventure Pack v0.8.0

~JA#BGT\_ADVPACK/SETUP-JA#BGT\_ADVPACK.TP2~

This mod expands various content for the BG1-part (BG2-part, planned) of BGT. The mod follows on unfinished, incomplete positions of the original and enhances them.

*This mod requires Baldur's Gate Trilogy.*

*This mod requires Infinity Animations components "Distinctive Undead" und "More Icewind Dale II Animations".*

*The BG1 Unfinished Business components #19 "Minor Dialogue Restorations" and #21 "Store, Tavern and Inn Fixes and Restorations" are required.*

*The TobEx function "CharmPatch" is recommended.*

*The "Jondalar Fix for BGT" is not needed, because an equivalent fix is included.*

*SandrahNPC is incompatible with Jarl's Adventure pack (JA#BGT\_AdvPack), as this mod replaces/renames some vanilla non-joinable NPCs which are triggers for Sandrah quests.*

Copy the folder **JA#BGT\_AdvPack** and the file **Setup-JA#BGT\_AdvPack.exe** into your main SoA directory.

## 19.6 Made in Heaven: Encounters & Quests v6

~MIH\_EQ/SETUP-MIH\_EQ.TP2~

(only for 64-bit engines)

This mod was designed to spice up some encounters and to introduce some new encounters, monsters and quests to BG1 and BG2.

**NOTE:** v4 and higher is only running on 64-bit engines. On a 32-bit engine you need to have v3 of this mod! Because v4 requires InfinityAnimations it is to be installed after that mentioned mod towards the end.

Unfortunately the author changes the components numbers respective the component names haphazard with every new release. If you don't have exactly the same version of the mod as the described one you won't get those components that you want.

This mod should be installed fairly early, before any 'tweak' mods. This mod was explicitly made to be compatible with Sword Coast Stratagems, it is considered to be something of a "companion" mod to SCS. It can be installed either before or after SCS, but installing it before is generally recommended.

This mod can optionally use Icewind Dale animations from Infinity Animations, however this is disabled by default. It can be enabled in the .ini file, if you use this you need to have Infinity Animations with at least the Icewind Dale animations installed. The file shared/monsters/tables/animations.2da controls which animations get used.

Copy the folder **mih\_eq** and the file **Setup-mih\_eq.exe** into your main SoA directory.

### 19.7 Made in Heaven: Encounters & Quests v3 (25.08.19)

~MIH\_QE\SETUP-MIH\_QE.TP2~

This mod was designed to spice up some encounters and to introduce some new encounters, monsters and quests to BG1 and BG2.

**NOTE:** v4 and higher is only running on 64-bit engines. On a 32-bit engine you need to have v3 of this mod! Because v4 requires Infinity Animations it is to be installed after that mentioned mod towards the end.

Unfortunately the author changes the components numbers respective the component names haphazard with every new release. If you don't have exactly the same version of the mod as the described one you won't get those components that you want.

*This mod is incompatible with the "Erevain NPC for NeJ3" component from the "Never Ending Journey 3" mod because in spell.ids both of them use the same literal number for different symbolic identifiers.*

Copy the folder **mih\_eq** and the file **Setup-mih\_eq.exe** into your main SoA directory.

**19.8 Vecna v23**

~VECNA/SETUP-VECNA.TP2~

ENGLISH

This mod is the first HIGH LEVEL adventure, propelling the party into a deadly war between gods and creatures that gods fear. With over 50 new areas to explore, many new monsters, spells and new animations to experience there should be many hours of playtime. Some parts of the mod are still under development but the primary storyline is finished, fixed and will remain unchanged. The difficulty level of this mod is quite extreme, a real challenge, but the rewards are suitably generous. Recommend is a party of 14th+ Lv players commanded by a suitably experienced player. To start the mod: There is a cowled figure in the council of six building that requires you attention.

**Note: Vecna is HARD and is meant for a “Big World Project” game only.** In Vecna you are wishing you had 2 of such overpowered item mods like Alex Macintosh and Unusual Oddities Shop.

*Vecna should be installed AFTER other weiDU mods. Vecna uses Infinity Animations code and therefore should be installed after that.*

*BP, BH, CtB, Drizzt Saga, NEJ, RoT, SOS, TDD, TS, Sheena, Planar Sphere, RPGKits must be installed before Vecna.*

Copy the folder **vecna** and the file **Setup-vecna.exe** into your main SoA directory.

There is an revised English text - **Vecna v23 - Text Overhaul v1.1** Copy the folder **Language** and the file **Vecna v23 - Text Overhaul v1.1 - ReadMe.txt** into the Vecna folder.

**19.9 Aurora's Shoes and Boots v5.2.1 (1)**

~AURORA/SETUP-AURORA.TP2~

**NOTE:** This mod must be installed in two steps! At least the component “Realistic random treasures” should be installed after SCS to avoid blank treasure.

Aurora not only sells all sorts of shoes, but will also chat with you about nobles and commoners alike, providing exciting information about their daily lives.

You will also meet the surly gnome Tomthal, doomed to the surface by a mysterious curse, and his cheerful sister Karaea.

This mod also includes the former mod Store Prices. With this one you can increase the selling prices and decrease the buying prices. Without these components you would get very soon much to much money in a megamod.

*The main component should be installed before Stratagems. Just, there is one problem. Aurora's main component adds its own scripts to lot of creatures. As a result, some creatures have all 5 script slots filled and SCS would skip those creatures. This could be avoided by installing the main component after SCS.*

*The former Store Prices components “Change store buying prices”, “Change store selling prices”, “Change gem and jewelry prices” and “Change creature gold carried” must be installed after all item changing mods except Sandrah.*

*This mod should be installed fairly late after mods that add creatures or mods that overwrite rather than patch game resources.*

*Aurora's main component also patches BGMain.exe, therefore 1PP component Unique Thief Avatars can not be installed after Aurora.*

*Install Aurora before Level 1 NPCs.*

*Install Aurora because of its crossmod material after MTS Crappack or Tales of the Deep Gardens. Eventually, there will be additional material available through Crossmod, including banters with Solaufein, Kelsey, Hubelpot and others.*

*TobEx must be installed for the component “Change creature gold carried” because it enables the use of 99 rows for all RND\*.2DA files.*

### 19.12 The Bigg Kit Pack v1.1

~TB#KITS/TB#KITS.TP2~

This mod adds Biotic Vanguard - inspired from the Vanguard class in Mass Effect 2 and 3.

*The mod must be installed after Haiass and before Tweak Packs.*

*If you install a mod that adds two-handed versions of some weapons (E.G. two-handed axes from Tweaks Anthology), you still won't be able to specialize in such weapon classes.*

*Please note that there are several known graphical issues with the mod.*

### 19.13 Sandrah NPC v1.11

~SANDRAHNP/SETUP-SANDRAHNP.TP2~

Sandrah is a young priestess of Mystra (fighter/cleric) from Waterdeep, who wants to make herself an own name and also to discover the hidden part of her family history. This plot runs paralell to the discovery of the origin of the main character. Sandrah is a specialized healer, on the battlefield but also for those companions that suffer in heart and soul.

Her main quest runs throughout the complete trilogy and finds its end at the Throne of Bhaal. Beside that there are nearly 50 other quests, adventures and areas you may discover with her, some of them are dependent on other NPCs as well.

*Sandrah is a PURE BGT CHARACTER and works not with TUTU or any other installation.*

*Sandrah NPC requires a full installation of BGT with all the "big mods" installed:*

#### **BG1:**

Dark Side of the Sword Coast  
Northern Tales of the Sword Coast  
The Drizzt Saga  
Grey Clan Episode 1  
BG1NPC (with all quests and romances)

#### **BG2:**

The Darkest Day  
Check the Bodies (and also Check the Bodies Chores)  
The Region of Terror

*Any version of Ascension is required if you want to finish the Sandrah's mod and continue into the sequel RtF.*

*The following mods are not required, but without them you will miss significant contents of Sandrah NPC:*

#### **BG1:**

Dark Horizons  
Secret of Bone Hill  
The Vault  
BG1 Mini Quests and Encounters  
The Lure of the Sirine's Call  
The Stone of Askavar  
Ascalons Breagar  
Ascalons Questpack  
Finch

#### **BG2:**

Planar Sphere  
Fishing for Trouble  
Kivan and Deheriana Companions  
Yasraena  
Saerileth  
Chloe

*There is also more or less interesting crossmod content with the following mods:*

<b>BG1:</b>	<i>Beyond the Law</i>	<i>Kindrek</i>	<i>Summon Bhaalspawn</i>
Gavin BG1	Coran BG2	Kitanya	Tales of Anegh
Indira	Dace Linton	Longer Road	Tashia
Isra BG1	Ellistraee	Luxley Family	The Undying
Mur'Neth	Fade	Nathaniel	Thief Stronghold
Valerie	Faren	Nephele	Tiax SoA Friendship
White	Gavin BG2	Nikita	Tortured Souls
	Haldamir	Ninde	Tsujatha
	Hanna	Romantic Encounters	Tyris Flare
<b>BG2:</b>	Isra BG2	Sarah	Vampire Tales
Aeon	Ilyos	Sarevok	Varshoon
Alora	Kari	Shadows Over Soubar	Vynd
Amber	Kelsey	Sheena	Xulaye
Angelo	Keto	Silverstar	Yikari
Arath	Kiara-Zaiya	Sir Ajantis	
Ariena	Kido	Skie	
Auren	Kim	Solaufein	

*The more mods you have installed before Sandrah, the more content you will get out of the new mod. If you plan to play an evil character, do not install the mod because the idea of an evil Bhaalspawn with growing powers will make Sandrah (and her goddess) your enemy sooner or later but the largest part of the mod will never evolve.*

*Install Sandrah quite at the end after Aurora. The XP reduction contained in Aurora is already taken into account by Sandrah quest XP values.*

*The BP mod v180 or later is recommended.*

*SandrahNPC and RTF should be installed after Haiass the Wolf because the mod adds improvements and additional contents to Haiass.*

*Sandrah both parts are not compatible with the "Teleport" mod. Sandrah contains a own similar capability for SoA, ToB and RtF.*

*Do not use any AI script for Sandrah or other joinable NPCs from the mod.*

*All setup options must be installed, the different components are just for faster recovery in an error case.*

*Sandrah is not compatible with mods that spawn pure BG1 creatures in further chapters.*

*Not compatible with BG1 NPCs for BG2:SoA v9 and Smiling Imp Cross Banter mod.*

*Not compatible with Worgas' Drizt-component.*

*Turnabout is only compatible to a limited extent with SandrahNPC because you cannot call creatures for support at the Throne of Bhaal final battle when Sandrah is with you.*

*SandrahNPC is incompatible with Jarl's Adventure pack, as this mod replaces/renames some vanilla non-joinable NPCs which are triggers for Sandrah quests.*

*It is confirmed for several reasons that Sandrah and NEJ are not compatible.*

*Sandrah is not compatible with Scales of Balance components 121 - 125 Weapon Proficiency Overhaul, component 180 Magic resistance Overhaul, component 200 Revised Stat Bonuses.*

Copy the folder **SandrahNPC** and the files **setup-SandrahNPC.exe** and **setup-SandrahNPC.tp2** into your main SoA directory.

To be able to install Sandrah, you must copy the file worldmap.wmp immediately before installation of the mod from the folder **B&G World Fixpack** into the override folder. Because this patch cannot be installed before, this will not be done by the **B&G World Fixpack.bat**, but the **B&G World Installpack**.

#### 19.14 Sandrah - Return to Faerûn v1.11

~SANDRAHRTF/SETUP-SANDRAHRTF.TP2~

Sandrah RTF (Return to Faerûn) is an epic sequel to the trilogy which starts after ToB and takes place in areas from all three parts of the original game. In addition to the original playground, it adds about 100 new areas to the original game. You can recruit old friends but also a new generation of characters to your party. RtF starts seamlessly after your final decision at the Throne of Bhaal (provided you choose right).

*This mod requires Sandrah NPC, of course.*

*Sandrah RTF is not compatible with the BGT Tweak Pack - "Import more NPCs into Shadow of Amn" components. Sandrah RTF is not compatible with the "Game over only on Party Dead" mod. The common survival of Sandrah and the main character is crucial for their mission. If one dies the other dies, too. The party dead mod would probably prevent this from happening for the PC, so if Sandrah dies you will be stuck in the game with no way to finish it.*

~DJINNICOMPANION/DJINNICOMPANION.TP2~

This mod adds Afaaq, the djinni who will be your faithful companion in the course of your adventures throughout SoA and ToB.

*The mod changes a number of original game resources. To ensure the highest compatibility with existing mods, it should be installed as late as possible.*

*The following mods have to be installed BEFORE this mod, if you want to use them:*

*Westley Weimer's "Ascension"*

*DavidW's "Wheels of Prophecy"*

*SimDingo's Quest Pack and its subcomponent "Revised Hell Trials"*

*Unfinished Business and its subcomponent "Kalah and What He Was Promised"*

*Infinity Animations and its subcomponent "Distinctive Genies".*

*The following mods will be considered if you install them before this mod:*

### 19.19 Pack Mule v1.4b

~W\_PACKMULE/SETUP-W\_PACKMULE.TP2~

This mod adds a pack mule to the game. It will follow your party around and carry your equipment for you. You can buy the mule from a guy named Stedd, who can be found near the northeast exit of Waukeen's Promenade or in the courtyard of the Friendly Arm Inn.

*This mod requires Infinity Animations (core) to function. Install this mod after any mods that add outdoor or dungeon areas to the game.*

**19.21 Spell Revisions v4beta18 (2)**

~SPELL\_REV/SETUP-SPELL\_REV.TP2~

**NOTE:** *There is a revision for this mod - SR Revised v1.3.905.*

This mod improves the arcane and divine spells, removes different bugs, some weaker spells are improved and a few spells are completely remade. This mod replaces entirely the Arcane-Divine Spell Pack.

**NOTE:** *This mod must be installed in two steps! The component "Update Spellbooks of Joinable NPCs" must be installed after any NPC mods.*

*Spell Revisions should be installed after the BG2 Fixpack and before AI enhancing mods. Install it before all mods that change spells.*

*Spell Pack Beta 6 is completely technically compatible with SR when it is installed after SR. Spell Pack adds some new spells and it revises some old ones. It has separate components for each spell, so if you prefer the SP version of a particular spell, you can install that component to replace the SR version.*

*When SR starts using ADD\_SPELL, it should become technically compatible with the spells added by megamods. It's generally agreed that a number of megamod spells stray far from the balance desired by SR, so SR will probably remain conceptually incompatible with them unless those spells get rebalanced.*

*It is not recommend to use Spell-50 with Spell Revisions as conceptually they are on opposite extremes. Spell Revisions is trying to "rebalance" spells, while that mod purposely makes them extremely overpowered.*

*SCS should be installed after SR.*

*Spell Revisions may have some compatibility issues with Divine Remix, so it is not recommended to use them together at this time. Currently, installing SR after Divine Remix will result in divine spells no longer following the sphere system while installing Divine Remix after SR will result in the replacement of some of SR's spell descriptions and the disappearance of some of SR's new and moved spells.*

You have already copied the folder **spell\_rev** and the file **setup-spell\_rev.exe** into your main SoA directory.

**19.22 Daulmakan's Item Pack for Baldur's Gate II v1.8**

~SETUP-ITEM\_PACK~

This mod will add 30 brand new items to Baldur's Gate II, taken from the Icewind Dale series and Planescape: Tor-

ment, as well as a few item related tweaks.

*For optimal performance, Item Pack should be installed AFTER spell-modifying mods, so changes made by Spell Revisions or any similar spell mod will be accounted for.*

*In order to see all the items, you should install Item Pack AFTER:*

*Tactics' Gebhard Blucher's Improved Mae'Var*

*Item Upgrade*

*Anishai One Day NPC*

*Questpack's Additional Shadow Thieves' Content*

*If you have other item-affecting mods, be warned that components 2 and 3 from this mod overwrite items, so you'll only get to see their version or these ones, depending on your install order.*

Copy the folder **Item\_Pack** and the files **Setup-Item\_Pack.exe** and **Setup-Item\_Pack.tp2** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

### 19.23 Trap Revisions v1

~TRAP\_REV/SETUP-TRAP\_REV.TP2~

This mod overhauls the system of laying traps in Baldur's Gate 2. The thief's success to set traps is no longer depending on random chance and power of snares depends on Set Traps skill rather than character level.

*Spell Revisions must be installed before Trap Revisions, otherwise various protective spells will not grant immunity to new effects.*

*The Rogue Rebalancing component "Chosen of Cyric" component must be installed before Trap Revisions, otherwise one of it's scripts will fail to execute correctly.*

Copy the folder **trap\_rev** and the file **setup-trap\_rev.exe** into your main SoA directory.

### 19.25 Item Revisions v4b10 (20 June 2017) (2)

~ITEM\_REV\ITEM\_REV.TP2~

Item Revisions aims to fix/tweak/enhance all items in Baldur's Gate II. Weaker items have been improved, over-powered ones have been (or will be) nerfed, many descriptions have been extended or replaced with more appropriate ones, and so on. In addition, there are a number of rule changes available that can be chosen individually as the user wishes.

**NOTE:** There is a revision for this mod - **IR Revised V1.3.400 (2021 March 17th)**.

**NOTE:** This mod must be installed in three steps! The main component of IR overwrites existing items and their descriptions, so it should be installed before mods that patch items and also before Rogue Rebalancing. The other components of IR have been designed to patch all items, including items added by other mods, so they should be installed after all tweak mods that add or replace items and also after Rogue Rebalancing.

Most content from the One Pixel Productions mod is already included in this mod.

Item Revisions is compatible with 1PPv4 when you follow the suggested installation order:

Install before IR's main component:

101 Core Paperdolls (included in IR but required for other 1PP components)

400 Core Updates and Item Patches (partially included in IR but required for other 1PP components)

401 Improved Projectile Effects

Install after IR's main component:

113 Smart Avatar & Armour Switching

210 Increased Paperdoll Object Variety (core)

Don't install because they are already included:

203 Restored Flame Sword Animations

204 Colourable Quarterstaves

205 Legacy Shields v2

206 Additional Shield Animations (core)

207 Wizards' Staves (core)

208 Additional Helmet Animations (core)

Many but not all items from One Pixel Productions are also used with this mod. Files already existing will be replaced.

BGT is required for this mod.

The components "Sensible weapon restrictions for SoA (non-mod weapons)", "Sensible weapon restrictions for ToB (non-mod weapons)", "Sensible weapon restrictions for BG1Tutu" and "Throwing Spears" from the Ashes of Embers mod are not compatible with Item Revisions' main component, because they completely overwrite existing item descriptions.

You have already copied the folder **item\_rev** and the file **setup-item\_rev.exe** into your ... \BGII - SoA\ directory quite at the beginning.

Double-click the Setup. The DOS dialogue appears:

### 19.27 Full Plate and Packing Steel v3

~FULLPLATE/SETUP-FULLPLATE.TP2~

This mod is one big rework of the armour system of BG2. Light, enchanted armours actually help you dodge. Heavy, enchanted armours don't help dodging much, but they absorb perhaps half or more of an blow in exchange for slowing you down and fatiguing you.

Stealth, thieving and casting in heavy armour is possible, but difficult.

**This mod must be installed after anything adding armours to the game. Definitely after Spell Revisions, Item Revisions, Galaxygon's SpellPack Beta 5.**

**If casting in heavy armor is already modified by another mod, the main component will avoid modifying your previous choice. Therefore it checks for:**

**19.28 Hard Times for BGT v2.4**

~SETUP-HARDTIMES.TP2~

This mod will reflect the severe economic pinch caused by the iron crisis. Almost all of the stores will charge substantially more for their wares and sell far less magic items. Renting rooms at an inn will cost more than a mere pittance. Many of the exceptional or magic items that are just lying around the game world will be replaced with less valuable items.

*This is the BGT version only.**Hard Times must be installed after Aurora, otherwise Aurora will multiply what Hard Times has set as prices.*Copy the folder **HardTimes** and the files **Setup-HardTimes.exe** and **Setup-HardTimes.tp2** into your main SoA directory.

**19.29 BGT NSC Portraits v3.0**

~SETUP-NSCPORTRAITS.TP2~

This mod inserts missing portraits to all non-player characters (NPC) which have to do something directly with quests, avoids the double portraits for different characters, however, leaves existing portraits of NPC mods unchanged. Pictures of celebrities and sign styles which do not fit to the world of Baldur's Gate were avoided. Particular attention was given to the character portrayals on the fact that they also fit to the respective characters. Bad characters mostly have also bad expressions, while good characters are to be recognized unambiguously. No images received normal passers-by or other avatars who are only for decoration, have nothing to do with quests, or have otherwise nothing important to say.

*This mod requires the games BG1, BG2 and BGT compelling!**Must be installed after Infinity Animations because otherwise some files will be overwritten.*Copy the folder **NSC Portraits** and the files **Setup-NSCPortraits.exe** and **Setup-NSCPortraits.tp2** into your main SoA directory.

**19.31 FinnJO's Subrace mini-mod for Baldur's Gate 2 v1.0**

~SETUP-BGII-SUBRACE.TP2~

This mod adds subraces to Baldur's Gate II basing partially on 3rd edition AD&D rules as in Icewind Dale II and partially on 2nd edition AD&D rules. After you have created your character and started a new game or loaded an old game, after a small delay you get a dialogue window with the choices for your subrace.

*You can add the subrace only to a class, not to a kit.*

*The component Improved Difficulty System from The Bigg Tweak Pack must be installed before this mod because otherwise its dialogue will be overwritten.*

### 19.33 Might and Guile v4.25.1

~MIGHT\_AND\_GUILE/MIGHT\_AND\_GUILE.TP2~

This mod is designed to be installed on top of all the other great mods out there and alters many different aspects of the BGT game.

*Might and Guile should be installed after all other mods that add or change items, and after other mods that add kits. It should be installed after Rogue Rebalancing and after the "WSPATCK for All" component of tb#Tweaks. There are a few compatibility issues with some tweaks from other mods because they make similar modifications but in a different way.*

*Most of Might and Guile's class tweaks are incompatible with the first component "General Class, Kit, & Class-Combination Rebalancing" from Six's Kitpack.*

*For now Might and Guile is not compatible with Kit Revisions. Choose that one or the other.*

*Some of the components of Rogue Rebalancing modify the same resources as M&G; be aware that the behavior is different depending on which are installed last.*

*Since the bard kit components 450, 470, 480, 490 are using Aquadrizzt's qd\_multiclass function which allows easy installation of working multiclass kits on EE 2.0, many of Stratagems' tactical challenges could only be installed with warnings, the components 6830, 8000, 8050, 8180 cannot be installed at all.*

**19.35 Face Directions Fix**

~SETUP-FACE\_DIRECTIONS.TP2~

This fix corrects mismatching “face” arguments from various dlg files. It is needed for installing Unique Artifacts without errors.

Copy the file **setup-face\_directions.tp2** into your ... \BGII - SoA\ directory.

Double-click the Setup. The DOS dialogue appears:

**19.36 Unique Artifacts v7.2**

~UA/UA.TP2~

Many items in Baldur's Gate, have their own history, and therefore should exist in a single copy. But, there are many cases when player gets the same item several times. With this mod excessive copies of supposedly unique items (like boot of the speed, ring of the magic etc.) are removed. This mod also removes duplicates from mods.

*Install UA after any mod that adds new content (areas, creatures, quests, etc). If you also use Item Randomiser, install UA first, then IR.*

*UA provides compatibility with:*

*Rogue Rebalancing 3.8+*

*Sword Coast Stratagems*

*Tortured Souls*

*BG2 Fixpack*

*Thalantyr item upgrade - forbid Ring +1 upgrade*

*Daulmakan item pack: More work for Cromwell - Periart of Proof against Poison*

*Tactics vs Daulmakan - Cloak of Balduran*

*Ruad item upgrade - forbid Ring +1 upgrade*

*Almateria's restoration pack*

*Salk's Cursed Items revision*

*Dungeon-be-gone*

*if they are installed before.*

*This process lasts several minutes!*

Copy the folder **ua** into your ... \BGII - SoA\ directory.

Double-click the Setup. The DOS dialogue appears:

4	2] Strict	[2]
---	-----------	-----

*Removes copies of unique and rare items. Rare items are the items that are not stated to be really unique, but according to their descriptions, it is unlikely that one band of adventurers would possess several of such items at the same time.*

**19.37 Item Randomiser v7**

~RANDOMISER/RANDOMISER.TP2~

The mod can randomise up to several hundred items in Baldur's Gate (including TotSC) and up to several hundred more in Baldur's Gate II (including ToB). The randomised items can be found throughout the game world over the course of the game.

*Item Randomiser should be installed after any mods which move or remove items. Doing otherwise can potentially result in two or more copies of the same item being found in the game world.*

*Item Randomiser is best installed before SCS, because SCS assigns weapon proficiencies to creatures according to which weapons they have, and Item Randomizer shuffles those weapons.*

## 19. MAJOR TWEAKS

**Item Randomiser will not randomise items that are expected by Neh'taniel, Spellhold Gauntlet or Tactics component Improved Sahuagin City if these mods are installed.**

Copy the folder **randomiser** and the file **setup-randomiser.exe** into your main SoA directory.

**19.38 The Tweaks Anthology v16 (2)**

~CDTWEAKS/SETUP-CDTWEAKS.TP2~

formerly: BG2 Tweak Pack

This is a compilation of fixes, cosmetic changes, and tweaks. It substitutes G3 Tweak Pack, Tutu Tweak Pack and Ease of Use.

**NOTE:** This mod must be installed in three steps! The Rebalanced Weapon Proficiencies should be installed after Jarl's BGT Tweak Pack.

Because many changes effect all installed mods and mostly thousands of files are to be changed, the individual steps may last for a while. Because all the changes are accumulated in the internal memory until you press enter, it may lead in consideration of the amount of the installed mods to problems with computers of low efficiency (computer crash). In this case, I recommend to install this mod category for category, that means at the first request "Would you like to display the components from [###]?" to press [Y]es, then to skip following ones with [N]o and to quit the installation after the first category. Afterwards install the next category in the same way individually. The following instructions are arranged after this principle.

If you choose Cams house rules, instead of many single components a collection of Tweaks is installed, preferred by the author CamDawg.

The following "Rule changes" should go before SCS:

Alter Weapon Proficiency System - Rebalanced Weapon Proficiencies

Make +x/+y Weapons Consistent

Un-Nerfed THAC0 Table

Alter Mage Spell Progression Table

Alter Bard Spell Progression Table

Alter Cleric Spell Progression Table

Alter Druid Spell and Level Progression Tables

Add Save Penalties for Spells Cast by High-Level Casters

Remove Delay for Magical Traps (Ardanis/GeN1e)

Every other Tweaks Anthology component can be installed in any order; it doesn't matter.

If not already done, copy the folder **cdtweaks** and the file **setup-cdtweaks.exe** into your main SoA directory.

ever, this could cause conflicts with other mods.

**Skipping:** [Make Cloakwood Areas Available Before Completing the Bandit Camp]?

1035 1] First Area Only

1036 2] All of Cloakwood Except the Mines]

*This component will be skipped if the similar BG1 NPC Project component is already installed.*

**Skipping:** 1040 [Improved Athkatlan City Guard]?

*The functionality of this component is either already enclosed or already been replaced by one of your mods (BP).*

Install Component 1050 [Gradual Drow Item Disintegration]?

[N]ot Install

*Instead your Drow objects crumble into dust immediately when you leave the Underdark, they will gradually degrade over time. This can cause slowdowns if you have many objects in your inventory and bags of holding.*

**SKIPPING** 1060 [Breakable Iron Nonmagical Shields, Helms, and Armor]?

*This component is already included in BGT.*

Install Component 1070 [Improved Kick-out Dialogues]?

[N]ot Install

*Only install if you want to play in the multi-player mode.*

Install Component 1075 [Send BioWare NPCs to an Inn (DavidW/Zed Nocear)]?

[I]Install

*This component isn't compatible with the similarly-named BG1 NPC component "NPCs can be sent to wait in an inn."*

*This version lets you send people to more inns. Not compatible with the "Zum Freundlichen Arm" mod for BG1.*

Install Component 1080 [Add Bags of Holding]?

[N]ot Install

*If you carry too many items, this can lead to slowing down the game. You get bags enough even without this.*

*Use aTweaks' "Slightly expanded storage capacity for containers" component instead.*

Install Component 1085 [Portable Containers (Zed Nocear)]?

[N]ot Install

*For a pure BG1 game only.*

Install Component 1090 [Exotic Item Pack]?

[I]Install

*This component distributes some weapons from BGII into the area BGI.*

*This component is only for Tutu or BGT.*

**SKIPPING** 1100 [Reveal City Maps When Entering Area]?

*This component is already included in BGT.*

Install Component 1101 [Do Not Reveal City Maps When Entering Area]?

[N]ot Install

**SKIPPING** 1110 [Add Map Notes]?

*This component is already included in BGT.*

Install Component 1120 [Stores Sell Higher Stacks of Items]?

[I]Install

*This component affects ALL stores, also those from other mods!*

Install Component 1125 [Infinite Nonmagical Ammo for Bows, Crossbows, and Slings]?

[I]Install

Install Component 1130 [Reputation Resets in BG2 (BGT Only)]?

[N]ot Install

*Because the hero and his party are still unknown in Amn when they emerge from the opening dungeon after the transition from BG 1 to BG2 and go to the Adventurer's Mart, they cannot already enjoy advantages because of her good call.*

*This component is only for BGT. This component is also included in BGT Tweak Pack.*

Install Component [Gems and Potions Require Identification]?

[N]ot Install

1140 1] Gems and potions

1141 2] Just gems

1142 3] Just potions

Install Component 1150 [Shapeshifter Rebalancing]?

[N]ot Install

*Shapeshifter abilities now create "symbolic paws". When you wield one you turn into a Werewolf, when you remove it you're human again.*

*The SCS-component "Improved shapeshifting" as well as the Refinements-component "Shapeshifting Fix" offers a similar solution. Instead of this component Refinement's, Shapeshifting Fix' component will be installed.*

Install Component [Multiple Strongholds (Baldurdash)]?

[N]ot Install

*The components "Make the Strongholds Available to All Classes" of this mod allow more fine-tune adjustments.*

*This component (either variant) is not compatible with Oversight's Cleric Kits component, the NPC Strongholds mod and the CliffHistory mod.*

1160 1] No Restrictions (Baldurdash)

1161 2] Keep Class Restrictions

Install Component 1170 [Bonus Merchants (Baldurdash)]?

[I]Install

*This adds Joluv and Diedre to the Copper Coronet and Ribald's Mart, respectively.*

*Not together with Freedom's Reign/Reign of Virtue, because this mod likewise inserts the merchants. Because of different coding they occur otherwise twice.*

## 19. MAJOR TWEAKS

*The component is skipped automatically, if the Big Picture mod is installed.*

Install Component 1180 [Female Edwina]? [I]nsta ll

*This components conflicts with Edwin romance mod because that mod already includes another portrait.*

SKIPPING 1190 [Romance Bug Fixes]?

*The functionality of this component is either already enclosed or already been replaced by one of your mods. BG2 Fixpack has already corrected the bugs.*

SKIPPING 1200 [Imoen ToB Dialogue Fix]?

*The functionality of this component is either already enclosed or already been replaced by one of your mods. BG2 Fixpack has already corrected the bugs.*

Install Component 1210 [Use BG Walking Speeds (BETA)]? [N]o

*This component prevents that you can install Unique Artifacts.*

Install Component 1220 [Allow Cromwell to Upgrade Watcher's Keep Items]? [N]ot Install

Install Component [Adjust Cromwell's Forging Time]? [N]ot Install

1225 1) Instant forging (original BG2 default)

1226 2) Eight hours

1227 3) Full 24 hours (BG2EE default, includes sleep)

*For a pure BG1 game only.*

Install Component 1250 [Move NPCs from Baldur's Gate]? [N]ot Install

Install Component [Move NPCs to Convenient Locations]? [N]ot Install

*Not compatible with the BG1 NPCs at Beginning components Move Eldoth, Move Quayle, Move Shar-Teel, Move Tiax and Move Viconia.*

1251 1) Move Alora to Gullykin

1252 2) Move Eldoth to the Coast Way

1253 3) Move Quayle to the Nashkel Carniva

1254 4) Move Shar-Teel to North Nashkel Road

1255 5) Move Tiax to Beregost

1256 6) Move Viconia to South Beregost Road

Install Component 1260 [Bardic Reputation Adjustments]? [N]ot Install

*For a pure BG1 game only.*

Install Component 1270 [Change Cloakwood Mine Chapter End Change Trigger to Non-TotSC Behavior (plainab) (BETA)]? [I]nsta ll

SKIPPING 1280 [Game ends when the main character dies]?

*For IWD only.*

SKIPPING 1290 [NPCs respond to the main character, not to whichever character talks to them]?

*For IWD only.*

SKIPPING 1300 [Make Heart of Winter accessible at any level]?

*For IWD only.*

SKIPPING 1310 [Restore (most) BG2 spells and make scrolls available - WARNING: they will look very out of place]?

*For IWD only.*

Install Component 1330 [NPCs Cannot Use Doors]? [N]ot Install

*The next 8 components are only available if Multiple Strongholds is not installed. They are modernised versions of the now redundant Multistronghold mod. They are not compatible with the NPC Strongholds mod.*

- Install Component 2010 [Separate Resist Fire/Cold Icon into Separate Icons (Angel)]? [N]ot Install
- Install Component 2020 [Two-Handed Bastard Swords]? [N]ot Install
- You can switch back to the one-handed version at any time. The ability is found behind the backpack icon, once the sword is equipped. This component will not affect items introduced by mods! It may happen that a bastard sword seems to have a selling price of 1 golden coin. Resting will fix this.**
- Install Component 2030 [Two-Handed Katanas]? [N]ot Install
- You can switch back to the one-handed version at any time. The ability is found behind the backpack icon, once the sword is equipped. This component will not affect items introduced by mods! It may happen that a katana seems to have a selling price of 1 golden coin. Resting will fix this.**
- Install Component 2035 [Two-Handed Axes]? [N]ot Install
- Install Component 2040 [Universal Clubs]? [I]n Install
- This component affects ALL objects, also those from other mods!**
- No need for this component if you use SoB #122 "systemic proficiency changes".**
- Install Component 2060 [Weapon Styles for All]? [N]ot Install
- This allows to all classes, not only warriors, to reach the maximum number of points in the different weapon styles. A sophisticated variation is included with the Level 1 NPCs.**
- Install Component 2080 [Delay High Level Abilities]? [N]ot Install
- High abilities begin with level 21 for all classes.**
- Install Component [Change Experience Point Cap]? choose one:
- 2090 1] Remove Experience Cap [1]
- Characters can advance without restriction up to level 50.**
- This component must be installed after the BGT Tweak Pack component "Restore BG2 XP bonus for traps, locks, and scrolls" because otherwise you get only level 40.**
- 2091 2] Level 20 Experience Point Cap
- 2092 3] Level 30 Experience Point Cap
- Install Component 2100 [Allow Thieving and Stealth in Heavy Armor]? [N]ot Install
- There is a deduction for the character if you use these abilities. This component also affects SOME objects from other mods!**
- Avoid this at all costs! You get penalties even if you wear a robe as a mage or thieving penalties when wearing leather armor as a thief!**
- Incompatible with the mod "Full Plate And Packing Steel".**
- Install Component 2120 [Allow Arcane Spellcasting in Heavy Armor]? [N]ot Install
- There is a deduction for the character if you use these abilities. This component also affects SOME objects from other mods!**
- Install Component 2140 [Expanded Dual-Class Options]? [N]ot Install
- This component permits the combination with other classes to barbarians and wild mages into dual-class characters. This component is causing the fatal error that all wild mages in the game become to mages or barbarians.**
- Install Component [Wear Multiple Protection Items]? [N]ot Install
- 2150 1] P&P Restrictions
- 2151 2] No Restrictions
- 2152 3] Allow Armor Plus One Protection Item (Angel)
- This was solved in a better way with the "Item Revisions" component "Items of Protection Can Be Worn with Magical Armor".**
- Install Component [Alter Weapon Proficiency System]? [1]
- This component changes the weapon proficiencies for nearly all kits and thus it is not compatible with any mod or component that also change the weapon proficiencies.**
- 2160 1] Rebalanced Weapon Proficiencies [1]
- This component needs to be installed before the SCS fighter component, otherwise enemies may lose proficiency in the weapons they wield.**
- 2161 2] BG-Style Weapon Proficiencies, With Weapon Styles (the bigg)
- 2162 3] BG-Style Weapon Proficiencies, Without Weapon Styles (the bigg)
- 2163 4] IWD-Style Proficiencies with Weapon Styles

2164 5] IWD-Style Proficiencies without Weapon Styles

*The Tweaks Anthology components 2161 and 2162 which change weapon proficiencies to the BG1 system should go after any mod components that change distribution of proficiencies stars or/and add new weapons, therefore they should be installed after Jarl's BGT Tweak Pack.*

### 19.39 Ding0's Tweak Pack v24 (2)

~D0TWEAK/SETUP-D0TWEAK.TP2~

This is a collection of different improvements like corrected behavior of demons, dimension door, enchanted weapons. Not everything is fitted for BGT.

**NOTE:** This mod must be installed in two steps! The NPCs/Summons Set Off Traps should be installed before Rogue Rebalancing whereas the Visual Ioun Stones should be installed AFTER the Tweaks Anthology component "Exotic Item Pack".

Copy the folder **d0tweak** and the file **Setup-d0tweak.exe** into your main SoA directory.

#### 19.40 Imoen is Stone v1.0

~IMOENISSTONE/SETUP-IMOENISSTONE.TP2~

This mod lets Imoen be turned into stone in the fight with the Cowled Wizards at the Promenade.

*It must be installed \*after\* Saerileth mod and after Tweaks Anthology "Faster Chapter 1&2 Cut-Scenes and Dreams" component.*

*Not compatible with the Imoen Forever mod.*

#### 19.41 Lol's RezMod v2.6d

~REZMOD/SETUP-REZMOD.TP2~

These are just some old non-WeiDU mods.

*This mod should be installed after Big Picture's components Improved Kangaxx Encounter and Improved Gromnir as well as the Ding0's QuestPack component "Creature & Area Improvements" to avoid them overwriting the creatures and effectively nulling the Masamune questline.*

*Also it should be installed after the Ding0's QuestPack component "Additional Shadow Thieves Content" to avoid it overwriting loot for Mae'Var.*

*The Extended Visual Ioun Stones component should be installed after Tweaks Anthology Exotic Items Pack component because otherwise the Deep Purple Ioun Stone and Flickering White Ioun Stone added by the latter do not benefit from the Extended Visual Ioun Stones.*

Copy the folder **RezMod** and the file **Setup-RezMod.exe** into your main SoA directory.

## 19.42 Level Adder v0.5

~7C#ADDLEVEL/7C#ADDLEVEL.TP2~

This mod adds the number you enter for X to every single non-joinable NPC, which makes them more powerful if you later install SCS.

*It's recommend installing this after mods that add new creatures, enemies or quest to the game. It's completely useless unless you use SCS. The "Multiply HP by X" components should be installed after the Tweaks Anthology component "Max HP for every creature".*

***The values for the single components are only there for testing purposes and not meant as a recommendation!***

Copy the folder 7c#addlevel into your main SoA directory.

### 19.43 Macholy's Tweak Pack v1.2

~SETUP-NMTP.TP2~

CHINESE

This is one of three of Macholy's mods which aim to make the game more realistic.

This Tweak Pack, relates to Relationship V2.6, adds some of DnD's nonweapon proficiencies, like cooking, bluff, perform, sense, motive and so on, to make the game looks more real.

***Install it after Tweaks Anthology, but before Improved Summons.***

Copy the folder **NMTP** and the file **SETUP-NMTP.TP2** into your main SoA directory.

Copy the WeiDU-setup and rename it to **Setup-NMTP.exe**.

#### 19.44 Macholy's Living-Mod v0.6

~SETUP-NML.TP2~

This is one of three of Macholy's mods which aim to make the game more realistic.  
 This mod provides a system of rules allowing the player characters need to eat and drink. Without food and drink the constitution gets weaker by time.

*This mod requires the Macholy's Tweak Pack component Cooking.*  
*This mod requires that BGT is installed.*

#### 19.45 Psionics Unleashed v0.3

~W\_PSIONICS\_UNLEASHED/SETUP-W\_PSIONICS\_UNLEASHED.TP2~

This mod aims to add a fully functional psionic system and psionic character classes based on Dungeons & Dragons edition 3.5.

Unlike a priest or wizard, the psion relies on no outside energies to give him power. His power comes from within. As long as his mind and body are rested (that is, as long as he has not depleted his power points) his powers are available to him.

*Install the mod as late as possible, after any mods that add or modify spells or items and in particular after any mod that modify mage and sorcerer spell tables (mxsplwiz.2da, mxsplsrc.2da).*  
*This mod must be installed before XP mod.*  
*Read carefully the readme!*  
*With this kit the avatar stutters and shows wrong animations!*

#### 19.46 Thrown Hammers v6.1.1

~HAMMERS/SETUP-HAMMERS.TP2~

This modification adds animations to the thrown hammers so they no longer appear as axes flying through the air instead of hammers. Also a few new items will be spread in the game.

*This mod should go after other mods that add or change hammers (including the Spiritual Hammer spell from the Lost Crossroads Spell Pack). Psionics Unleashed should also be installed before.*

Copy the folder **hammers** and the file **setup-hammers.exe** into your main SoA directory.

### 19.47 Refinements v4.32.1

~REFINEMENTS/SETUP-REFINEMENTS.TP2~

Refinements has multiple components which add a revised HLA system, improves Balthazar, adds a new kit, revises shapeshifting for druids, and more.

*For the classic engine you may want to use the classic (v3) Refinements - it has been far more extensively tested and used over many years before the EEs came out.*

*Don't install v24 because its component 110 Thief HLAs freezes the game when Imoen frees the char from the cage in Irenicus dungeon!*

*The new Refinements (as of v4) does not overwrite HLA tables anymore, it only adds to them. It is non-destructive. Divine Remix and new Refinements versions is no longer a conflict. If you install DR HLAs and Refinements HLAs you should get both. (Though if both mods add kind of the same stuff, you could end up with semi-doubles, which could be annoying.)*

*This mod has specific compatibility code for RR HLAs, thus with this version, RR should be installed before Refinements.)*

*This mod must be installed AFTER The Bigg Quest Pack. The use together with Rogue ReBalancing is expressly recommended!*

*The Refinements component "Shapeshifting Fix" must be installed after Thieves Galores, because otherwise the shapeshifting is faulty.*

*Any kits must be installed before Refinements, cause it changes the HLA tables for all classes and makes duplicates of kits. Any kits installed after that may run into bugs and/or may not benefit from the revised HLA tables.*

*Refinements conflicts with kit mod "Arcane Archer" (the kit creates arrows but the arrows themselves are not equipable).*

Copy the folder **refinements** and the file **setup-refinements.exe** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

### 19.49 Scales of Balance v5.33.2 (1)

~SCALES\_OF\_BALANCE/SCALES\_OF\_BALANCE.TP2~

This mod is designed to be installed on top of - not instead of - all the other great mods out there and alters many different aspects of the BGT game.

All former kits and class-based tweaks are now included in Might & Guile, Faiths & Powers, and Tome & Blood; the overhauls and basic game/rule tweak components are re-introduced, and updated.

**NOTE:** This mod must be installed in two steps! The component MRO - Magic Resistance Overhaul should be installed separately after aTweaks.

Scales of Balance should be installed after any mod that add or change creatures, items or kits, and after the "WSPATCK for All" component of tb#Tweaks. **The mod's author states to install most components immediately before or immediately after SCS except the MRO component that should be installed after aTweaks. However, the code of Scales of Balance component 200 "SBO - Stat Bonus Overhaul" conflicts with the code of some of Stratagems' tactical challenges if Scales of Balance is installed before Stratagems and a**

**few components can only be installed with warnings or cannot be installed at all. When Scales of Balance is installed after Stratagems there are no such problems.**

SoB is designed to work with IR. Using them together will give players the specific SoB rules on top of the base IR rules.

Installing SoB after Ashes of Embers should have either no effect (players will get the AoE system) or a blended effect (usability from both mods - maybe slightly different, but fully functional).

The first component of Rogue Rebalancing is not compatible, and not necessary, with SoB's components "Weapon Proficiency Overhaul."

Most of SoB's overhauls and class tweaks are incompatible with the first, "core" component of Six's Kitpack.

Copy the folder **scales\_of\_balance** and the file **setup-scales\_of\_balance.exe** into your main SoA directory.

### 19.51 Sword Coast Stratagems v34.3

~STRATAGEMS/SETUP-STRATAGEMS.TP2~

SCS adds about 90 optional components (substantially upgraded general AI, upgraded enemy challenges, NPC management and general improved gameplay and a full implementation of the Icewind Dale spell system in Baldur's Gate). This mod however is not to compare with other tactics mods, as it makes combats more interesting and tactically challenging, rather than just making it harder by brute-force methods like tripling all the damage rolls. SCS is highly responsive to the difficulty slider. SCS has five difficulty settings (Basic, Improved, Tactical, Hardcore, and Insane) and the great majority of enemies are affected by the slider. On the lowest difficulty settings, SCS mildly

improves the intelligence and immersiveness of the game's enemy AI (and makes full use of the Icewind Dale spell system or the Spell Revisions spell system, if you have them installed). At higher difficulty settings, you should notice enemies behaving much more intelligently and realistically.

**As of version 22, SCS and SCS have been combined into a single mod named "Sword Coast Stratagems".**

**NOTE:** v32 and higher is only running on 64-bit engines. On a 32-bit engine you need to have v31 of this mod! SCSv31 is described afterwards.

The current version of Stratagems somehow turns directions from numbers to letters in the dialog files. This will be fixed by the Face Directions Fix.

Ideally, SCS prefers to be installed last, but several other recent mods (aTweaks, BiggTweaks, The Tweaks Anthology) also say "install last" in their readmes. You can generally install any of these listed mods after SCS fairly safely. (In particular, aTweaks is designed with SCS specifically in mind, and should definitely be installed after SCS). Other mods, and in particular any mods that add new items, really need to be installed before SCS.

SCS for Baldur's Gate II requires the BG2 Fixpack.

SCS should be installed towards the end of your installation.

Rogue Rebalancing and aTweaks are designed to be installed after SCS.

SCS is fully compatible with Wheels of Prophecy. Install SCS after Wheels of Prophecy.

BiggTweaks and Virtue can also fairly safely installed after SCS.

Tweaks Anthology can be installed before or after SCS; both should work.

Other mods, and in particular any mods that add new items, really need to be installed before SCS.

The latest version of Big Picture is at some level compatible with Stratagems. For a stable install you should choose the AI components of one or the other, as both try to do broadly similar things in rather different ways.

Mixing BP AI and SCS AI components is a bad idea, because of the different approaches taken (SCS rewrites original scripts with new behavior; BP replaces original scripts with new differently-named scripts). By implication, if you install both then some creatures might have both SCS and BP AI scripts on them simultaneously, issuing contradictory commands.

As of version 32, SCS no longer makes use of high-level abilities from Refinements.

SCS is compatible with the "Item Revisions" and "Spell Revisions" mods. Both should be installed before SCS.

Some IR and SR components that overlap with SCS will be silently skipped on an install of SCS.

SCS has slight compatibility issues with Divine Remix. Divine Remix rearranges the spellbooks of some potentially-hostile mages and SCS, not knowing this, will fail to use their spells effectively. This is unlikely to have any significant effect on play, though.

If you install "Tougher Sendai" from Oversight then the SCS improvements to Sendai (in the Smarter Mages / Smarter Priests component) will be skipped in favour of the Oversight ones.

Quest Pack's AI and creature enhancements are compatible with SCS. Install Quest Pack first, then install whichever components of SCS you want: they will override the Quest Pack for the affected creatures. Quest Pack still has some content not influenced by SCS: notably, it improves Mummies and Umber Hulks.

Item Randomizer is best installed before SCS, because SCS assigns weapon proficiencies to creatures according to which weapons they have, and Item Randomizer shuffles those weapons.

Compatibility between Tactics and SCS depends on the components.

Since the bard kit components 450, 470, 480, 490 of Might and Guile are using Aquadrizzt's qd\_multiclass function which allows easy installation of working multiclass kits on EE 2.0, many of Stratagems' tactical challenges could only be installed with warnings, the components 6830, 8000, 8050, 8180 cannot be installed at all. So you have to skip the afore-mentioned M&G components if you want to install SCS without worries.

Some Stratagems components are extremely memory-intensive! You need at least 4 GB RAM installed or the installation will fail!

Because many changes effect all installed mods and mostly thousands of files are to be changed, the individual steps may last for a while. Because all the changes are accumulated in the internal memory until you press enter, it may lead in consideration of the amount of the installed mods to problems with computers of low efficiency (computer crash). In this case, I recommend to install this mod category for category, that means at the first request "Would you like to display the components from [###]?" to press [Y]es, then to skip following ones with [N]o and to quit the installation after the first category. Afterwards install the next category in the same way individually. The following instructions are arranged after this principle.

The settings of the subcomponents are more or less chosen randomly to test whether this component installs at all. Players' experience will show the commended settings in future.

Note: Some of the Stratagems components need several hours to be installed!

## 19.52 Sword Coast Stratagems v31

~STRATAGEMS/SETUP-STRATAGEMS.TP2~

SCS adds more than 90 optional components (substantially upgraded general AI, upgraded enemy challenges, NPC management and general improved gameplay). This mod is not to compare with other tactics mods, as it makes combats more interesting and tactically challenging, rather than just making it harder by brute-force methods like tripling all the damage rolls. On the lowest difficulty settings, SCS mildly improves the intelligence and immersiveness of the game's enemy AI (and makes full use of the Icewind Dale spell system or the Spell Revisions spell system, if you have them installed). At higher difficulty settings, you should notice enemies behaving much more intelligently and realistically.

**As of version 22, SCS and SCS have been combined into a single mod named "Sword Coast Stratagems".**

**NOTE: v32 and higher is only running on 64-bit engines. On a 32-bit engine you need to have v31 of this mod!**

## 19. MAJOR TWEAKS

Ideally, SCS prefers to be installed last, but several other recent mods (aTweaks, Rogue Rebalancing, BiggTweaks, The Tweaks Anthology) also say “install last” in their readmes. You can generally install any of these listed mods after SCS fairly safely. (In particular, Rogue Rebalancing and aTweaks are designed with SCS specifically in mind, and should definitely be installed after SCS). Other mods, and in particular any mods that add new items, really need to be installed before SCS.

SCS is designed to work with the BG2 Fixpack when used on BGT installs.

SCS should be installed towards the end of your installation.

Rogue Rebalancing and aTweaks are designed to be installed after SCS.

SCS is fully compatible with Wheels of Prophecy. Install SCS after Wheels of Prophecy.

BiggTweaks and Virtue can also fairly safely installed after SCS.

Tweaks Anthology can be installed before or after SCS; both should work.

Other mods, and in particular any mods that add new items, really need to be installed before SCS.

The latest version of Big Picture is at some level compatible with Stratagems. For a stable install you should choose the AI components of one or the other, as both try to do broadly similar things in rather different ways.

Mixing BP AI and SCS AI components is a bad idea, because of the different approaches taken (SCS rewrites original scripts with new behavior; BP replaces original scripts with new differently-named scripts). By implication, if you install both then some creatures might have both SCS and BP AI scripts on them simultaneously, issuing contradictory commands.

SCS is fully compatible with the “Refinements” mod, and in particular, will make use of the modified High-Level Abilities introduced by Refinements. Refinements must be installed before SCS for this to work properly.

SCS is compatible with the “Item Revisions” and “Spell Revisions” mods. Both should be installed before SCS.

Some IR and SR components that overlap with SCS will be silently skipped on an install of SCS.

SCS has slight compatibility issues with Divine Remix. Divine Remix rearranges the spellbooks of some potentially-hostile mages and SCS, not knowing this, will fail to use their spells effectively. This is unlikely to have any significant effect on play, though.

If you install “Tougher Sendai” from Oversight then the SCS improvements to Sendai (in the Smarter Mages / Smarter Priests component) will be skipped in favour of the Oversight ones.

Quest Pack’s AI and creature enhancements are compatible with SCS. Install Quest Pack first, then install whichever components of SCS you want: they will override the Quest Pack for the affected creatures. Quest Pack still has some content not influenced by SCS: notably, it improves Mummies and Umber Hulks.

Compatibility between Tactics and SCS depends on the components.

Since the bard kit components 450, 470, 480, 490 of Might and Guile are using Aquadrizzt’s `qd_multiclass` function which allows easy installation of working multiclass kits on EE 2.0, many of Stratagems’ tactical challenges could only be installed with warnings, the components 6830, 8000, 8050, 8180 cannot be installed at all. So you have to skip the afore-mentioned M&G components if you want to install SCS without worries.

Some Stratagems components are extremely memory-intensive! You need at least 4 GB RAM installed or the installation will fail! Please note that Windows XP and Windows 7 32-bit only support 2 GB. If you have Windows 7 32-bit installed you must remove the 2 GB limit with the patch from here:

<http://www.unawave.de/windows-7-tips/32-bit-ram-barrier.html?lang=EN>

With an operating system with a 32-bit architecture the component 6000 “Smarter general AI” possibly cannot be installed in a BWP megamod with all mods because this component requires more main memory than a 32-bit architecture can handle.

Because many changes effect all installed mods and mostly thousands of files are to be changed, the individual steps may last for a while. Because all the changes are accumulated in the internal memory until you press enter, it may lead in consideration of the amount of the installed mods to problems with computers of low efficiency (computer crash). In this case, I recommend to install this mod category for category, that means at the first request “Would you like to display the components from [####]?” to press **[Y]es**, then to skip following ones with **[N]o** and to quit the installation after the first category. Afterwards install the next category in the same way individually. The following instructions are arranged after this principle.

The settings of the subcomponents are more or less chosen randomly to test whether this component installs at all. Players’ experience will show the commended settings in future.

Note: Some of the Stratagems components need several hours to be installed!

Copy the folders **stratagems** and the files **stratagems.bat** and **weidu.exe** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

Install Component	[Smarter Mages]?	
-------------------	------------------	--

*This component requires “Smarter general AI” to be installed.*

*This component drastically improves the intelligence of pretty much all the arcane spellcasters (liches, mages, fighter/mages, thief/mages, bards).*

*You need Smarter Mages for some of the Tactical challenges - BG1.*

*If you install “Tougher Sendai” from Oversight then the improvements to Sendai in this component will be skipped in favour of the Oversight ones.*

## 19. MAJOR TWEAKS

*This function is also included with Big Picture mod. Don't install both of them.*

*The "Humanoids" component from Big Picture is not compatible with this component.*

*The "Improved Mae'Var" component from Tactics is not compatible with this component.*

- 6030 1] Mages cast some short-duration spells instantly at start of combat, to simulate pre-battle casting
- 6031 2] Mages only cast short-duration spells instantly at start of combat if they are created in sight of the PC
- 6032 3] Mages never cast short-duration spells instantly at start of combat [3]
- 6033 4] Mages in BG1 cast short-duration spells instantly at start of combat; mages in BG2 only do so if they are created in sight of the PC
- 6034 5] Mages cast short-duration spells instantly at start of combat on difficulty settings of Hard or higher

Install Component

[Smarter Priests]?

*This component requires "Smarter general AI" to be installed.*

*This component upgrades the intelligence of the clerics and fighter-clerics in the game.*

*You need Smarter Priests for some of the Tactical challenges - BG1.*

*This function is also included with Big Picture mod. Don't install both of them.*

*The "Humanoids" component from Big Picture is not compatible with this component.*

*The "Improved Mae'Var" component from Tactics is not compatible with this component.*

- 6040 1] Priests cast some short-duration spells instantly at start of combat, to simulate pre-battle casting
- 6041 2] Priests only cast short-duration spells instantly at start of combat if they are created in sight of the PC
- 6042 3] Priests never cast short-duration spells instantly at start of combat [3]
- 6043 4] Priests in BG1 cast short-duration spells instantly at start of combat; priests in BG2 only do so if they are created in sight of the PC
- 6044 5] Priests cast short-duration spells instantly at start of combat on difficulty settings of Hard or higher

Install Component

[Potions for NPCs]?

*This component requires "Smarter general AI" to be installed.*

- 6100 1] All of the potions dropped by slain enemies are recoverable
- 6101 2] One third of the potions dropped by slain enemies break and are lost [2]
- 6102 3] Half the potions dropped by slain enemies break and are lost
- 6103 4] Two thirds of the potions dropped by slain enemies break and are lost
- 6104 5] All of the potions dropped by slain enemies break and are lost

**19.55 The Calling v3**

~THECALLING/SETUP-THECALLING.TP2~

This mod is planned as a collection of class-specific quests. So far, only one class quest - mages - has been completed.

*BGT is required for this mod. The mod checks for Ashes of Embers, The Tweaks Anthology and Sword Coast Stratagems, thus it should be installed after them.*

Copy the folder **thecalling** and the file **setup-thecalling.exe** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

**19.56 Relationship v2.82**

~SETUP-NMR.TP2~

This is one of three of Macholy's mods which aim to make the game more realistic.

This mod adds a new system that determines the behavior between the main character and party members.

For example: According to the the value of relationship your teammate's behavior will be affected when he isn't in your team. He may fight for you when he saw you are in a battle, give you a treatment or other help when needed, does nothing or attack you.

Many original enemies in BG would ask their ally for help. Now, if the value of relationship between an enemy's ally and you is high enough, then he wouldn't help his ally to attack you.

There is also included an upgrade for the behavior of dragons, animal teammates, beholders and much more.

The value of relationship will quantified by several parameters: experience during beeing in the team, protagonist's charm and alignment, the teammate's personal mission, core skills and special items.

*The component 4 "Expansion of original game scripts" cannot be installed after the new Big Picture v181 AI components.*

*The former BP patch is included now.*

Copy the folder **NMR** and the file **SETUP-NMR.TP2** into your main SoA directory.

Copy the WeiDU-setup and rename it to **Setup-NMR.exe**.

Double-click the Setup. The DOS dialogue appears:

### 19.58 Big Picture v1.81 4611 (2)

~BP/SETUP-BP.TP2~

BP balances all mods installed before, contains several smaller mods and includes other improvements also as a unique hostile AI system. If several mods have changed the same objects, these are overpowered. BP compensates this again.

**NOTE:** *This mod must be installed in two steps! All the tactical challenges and also the Ascension components must be installed earlier because of their dependencies with other mods. However, all the AI components should be installed nearly at the end and particularly after SCS.*

**For full description see step (1)**

### 19.59 Improved Volcano! Pack v2.0

~VOLCANO-SETUP.TP2~

This mod adds a merchant to Amkethran, near the Temple of Waukeen. He offers several powerful items and spells, of course, for a high price.

**The main component "Initialise mod" from Sword Coast Stragems can not be installed after this mod.**

Copy the folder **volcano** and the files **setup-volcano.exe** and **setup-volcano.tp2** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

Install Component	0	[Improved Volcano! Pack Version 1.8]?	[I]n Install

### 19.60 Turambar fixes and tweaks 1.8.1 (2)

~SETUP-TURAMBAR\_FIXES\_TWEAKS.TP2~

**NOTE:** This mod must be installed in two steps! The kits should be installed before the Refinements mod. The component "Inactive creatures fix" should be installed after BP component 1725 "Improved Xvart Village" and the component "Dragons are not immune to backstabbing" should be installed after SCS.

**For full description see step (1)**

## 19. MAJOR TWEAKS

You have already copied the folder **Turambar\_fixes\_tweaks** and the files **Setup-Turambar\_fixes\_tweaks.exe** and **Setup-Turambar\_fixes\_tweaks.tp2** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

### 19.61 aTweaks v4.53 (2)

~ATWEAKS/SETUP-ATWEAKS.TP2~

**NOTE:** This mod must be installed in two steps! All components must be installed after SCS except the component "Use Icewind Dale's Dimension Door animation".

This mod includes different Pen & Papers improvements and different rules, which are designed in order to make the gameplay more consistent.

*It is strongly recommended to install the BG2 Fixpack before installing this mod.*

*It is highly advised to install aTweaks after mods which feature general AI improvements such as Stratagems, Big Picture, Tactics, Quest Pack. Note: aTweaks will not take over the AI of Fiends summoned by SCS spellcasters.*

*This is intentional.*

*Since aTweaks and Rogue Rebalancing share certain resources, it's very important never to install any component of Rogue Rebalancing after aTweaks.*

*Level 1 NPCs should be installed after aTweaks.*

Copy the folder **aTweaks** and the file **Setup-aTweaks.exe** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

### 19.64 Ding0's Experience Fixer = DEFJAM XP v7

~XPMOD/SETUP-XPMOD.TP2~

This mod enables to reduce the points of experience for rewards because you get thousands of experience points for every "open locks" or "learning spells" agrees and you would have too fast too high values of experience. You can change the new experience rate for every component separately of the others of 10% to 75% of the original experience rate. The installation is strongly recommended. The mod affects ALL mods installed before.

*This process lasts several minutes!*

*Other than mentioned in the mod's readme the mod can be installed without any error messages!*

Copy the folder **xpmod** and the files **setup-xpmod.exe** and **setup-xpmod.tp2** from the folder DEFJAM\_v6 into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

### 19.65 BP-Balancer v0.35 (2)

~BP-BALANCER/SETUP-BP-BALANCER.TP2~

This mod works similar as Big Picture, but for BG1: the values of too strong items from DSotSC, NTotSC, SoBH and Drizzt Saga are set back to their BG1 values. Besides BP-Balancerd reduces too high experience points, which you get with these mods, in order not to gain too soon too high experience levels. By all these settings you get a balanced BG1 gameplay.

**NOTE:** *This mod must be installed in two steps! For compatibility, the part that modified BG1 mods needs to be installed just after all BG1 mods because other mods may replace/modify files changed by this mod. (IR or IRR mostly).*

*The former components for Item and XP Balancing for "Dark Side of the Sword Coast" and "Northern Tales of the Sword Coast" are no longer available because this function is already included in the mods.*

Copy the folder **BP-Balancer** and the files **Setup-BP-Balancer.exe** and **Setup-BP-Balancer.tp2** into your main SoA directory.

### 19.66 EET Tweaks v1.12

~EET\_TWEAKS/EET\_TWEAKS.TP2~

This modification offers several optional tweaks for Infinity Engine games. Mostly related to Baldur's Gate: Enhanced Edition Trilogy (EET) mod, but some of these components are also compatible with BWP.

*This mod should be installed at the very end, after mods that are recognizable by EET Tweaks, such as Tweaks Anthology and others and after any mod that alters CRE, BCS, DLG, ITM, SPL, EFF files.*

*If you are going to use XP related components you should avoid installing Ding0 Experience Fixer (DEF JAM), as it does the same thing, but compared to this mod is less precise, flexible and doesn't cover mod related SPL, ITM, EFF files.*

*Due to its special code Virtue must be installed at least after the XP related components from this mod.*

## 19.67 Difficulty and Tweaks mod v6

~DIFFTWEAK/DIFFTWEAK.TP2~

formerly: Mix Mod

This is a small collection of different tweaks which some were already done before, but here these give more setting possibilities to the user. Many components determine similar already available components from other mods. These are not installed immediately, but you are requested to check them on the screen.

**This mod must be installed after all other tweaks, because this mod checks the already installed tweaks.**

**The settings of the subcomponents are more or less chosen randomly to test whether this component installs at all. Players' experience will show the commended settings in future.**

Copy the folder **DiffTweak** and the files **setup-DiffTweak.exe**, **Install\_DiffTweak.bat** und **readme-DiffTweak.rtf** into your main SoA directory. Double-click the Setup. The DOS dialogue appears:

### 19.70 igi's Learn Through Use v2 BETA1

~IILEARNTHROUGHUSE/SETUP-IILEARNTHROUGHUSE.TP2~

Proficiency points are gained for weapon types that are actually used, and they are gained at set boundaries, independent of the level up process - if you've used a weapon for so long you're going to get better, even if you've not killed a few thousand creatures or solved a few quests.

*Because this mod affects all weapons that are installed in the game at the time the mod is installed, i.e. it should be installed late in the install process.*

**NOTE:** Party AI must be enabled for this mod to work correctly.

Copy the folder **iiLearnThroughUse** and the file **Setup-iiLearnThroughuse.exe** into your main SoA directory.

### 19.71 gMinion v3

~SETUP-GMINION.TP2~

These scripts increase the ingame intelligence of the creatures that are summoned by spells and items, so that they behave more in line with the original intentions of both Bioware and more purist D&D roleplayers.

*Spell Revisions is somewhat incompatible with gMinion as that mod is based upon vanilla's creatures, while SR's ones are heavily changed. Installing gMinion before SR should allow to use its scripts for non-SR creatures.*

*gMinion is going to override summons' AI of earlier installed mods. Thus, in a megamod it must be installed after Big Picture (BP) or Sword Coast Strategems 2 (SCS) to ensure that summons use gMinion scripting EXCLUSIVELY.*

*gMinion is not compatible with Improved Summons or any other mod that alters the summons.*

Note: This mod was only created for vanilla BGII. The **B&G World Fixpack** makes some changes to this mod to adapt it to mega-mods.

Copy the folder **gMinion** and the files **Setup-gMinion.exe** and **Setup-gMinion.tp2** into your main SoA directory.

### 19.72 Improved Summons v2.03

~SETUP-IMPROVEDSUMMONS.TP2~

Most of your enemies regard your summoned devil/demon as a enemy of you (not a enemy of themselves), so they will not attack your devil/demon actively or cast any spell on it. With this mod your enemies will attack your devil/demon actively and cast their spells on it normally. Besides you can invoke stronger summons.

*This mod is conceptual incompatible with gMinions and Spell Revisions.*

*This mod may not be compatible with Spell-50 mod.*

*This mod must be installed AFTER Tactics mod.*

### 20.1 Level 1 NPCs v3

~LEVEL1NPCS/LEVEL1NPCS.TP2~

With this mod joinable NPCs, when they join your party, get the same experience points as the main character. You can level them up from level one and choose their skills and weapon proficiencies. Also you can modify the classes of all joinable BG1 and BG2 NPCs.

**NOTE:** This mod must be installed in two steps! The components 1201 - 4920 that allow you to change the classes and/or kits of individual NPCs should be installed manually after the installation of the megamod is finished.

*Kit mods, Ashes of Embers or any other mod that changes the weapon proficiency rules, must be installed BEFORE Level 1 NPCs.*

*BG1-style proficiencies component of Tweaks Anthology may be installed AFTER Level 1 NPCs.*

*If you have installed the Revised High Level Abilities component of Refinements, you may not assign multi-class abilities to any character.*

*You can install this mod during an existing game, but the modifications will only take effect if the NPC has not yet joined the party.*

Copy the folder **level1npcs** and the file **setup-level1npcs.exe** into your main SoA directory.

One or more files of this mod must be changed. This will be done by the patch from the folder **B/G World Fixpack**.

### 20.2 Virtue v20Alpha

~VIRTUE.TP2~

This mod splits reputation into two separate variables: Reputation, which represents how people in the game feel about the party; and Virtue, which represents how morally correct the party's actions are.

*The Virtue mod should be installed \*after\* other WeiDU mods and after Refinements.*

*Due to its special code Virtue must be installed after Ding0 Experience Fixer, after SCS and after Level1 NPCs.*

*With the patch made by The Biggs (included in the BiG World Fixpack) you might be able to use Virtue with BWP, although it might have full effect only in BG2 part. It seems to work also also in the BG1 part. However, whether it really works like intended is completely untested yet.*

## 20. CLOSER INSTALLATION

*Maybe further patches are needed. This mod is no more developed further for several years so it is on the community's own to make possibly needed improvements and add them by the Fixpack.*

Copy the folder **virtue** and the files **setup-virtue.tp2** and **setup-virtue.tp2** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

Choose your language:		0 [English]
Install Component	0	[Virtue]? [I]Install

### 20.4 Tweaks and Tricks v8.13

~TNT/TNT.TP2~

A collection of many very reasonable fine tunings to fix some annoying and/or unrealistic aspects of the game, add some flavour, make some things easier and other things harder.

*SCS must be installed before.*

Copy the folder **tnt** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

### 20.8 Enkida's Portrait Pack v2.0

~EPORTRAITS/EPORTRAITS.TP2~

This will upgrade various BioWare and player-made NPCs so they have a somewhat "standardized" look - similar head sizes, color range, and an attempt to be semi-faithful to the original BioWare artwork "look."

Copy the folder eportraits and the file setup-eportraits.exe into your main SoA directory.

### 20.9 BP-BGT Worldmap v10.2.6

~BP-BGT-WORLDMAP/SETUP-BP-BGT-WORLDMAP.TP2~

This modification is for the use of The Big Picture - Baldurs Gate Trilogy (BP-BGT) absolutely necessary, because it also shows the additional areas of the big mods.

Copy the folder **BP-BGT\_Worldmap** and the files **Setup-BP-BGT-Worldmap.exe** and **Setup-BP-BGT-Worldmap.tp2** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

**20.12 High quality music for SoA/ToB**

~1PP\_HQ\_MUSIC\_II/1PP\_HQ\_MUSIC\_II.TP2~

This patch (along with content) allows playback of higher quality, 44.1kHz music in Baldur's Gate II Shadows of Amn with Throne of Bhaal. The patch affects all .acm audio in the game.

This mod will be installed by the High quality music for BGT mod.

## 20. CLOSER INSTALLATION

Copy the folder **1pp\_hq\_music\_II** and the file **Setup-1pp\_hq\_music\_II.exe** into your main SoA directory.

**Don't start the Setup-1pp\_hq\_music\_II.exe! Use the setup-1pp\_hq\_music\_BGT.exe instead!**

### 20.13 High quality music for Tutu/ToSC

~1PP\_HQ\_MUSIC\_ToSC/1PP\_HQ\_MUSIC\_ToSC.TP2~

This patch (along with content) allows playback of higher quality, 44.1kHz music in Baldur's Gate I Tutu (on Throne of Bhaal installs). The patch affects all .acm audio in the game.

This mod will be installed by the High quality music for BGT mod.

Copy the folder **1pp\_hq\_music\_ToSC** and the file **Setup-1pp\_hq\_music\_ToSC.exe** into your main SoA directory.

**Don't start the Setup-1pp\_hq\_music\_ToSC.exe! Use the setup-1pp\_hq\_music\_BGT.exe instead!**

### 20.14 High quality music for BGT

~1PP\_HQ\_MUSIC\_BGT/1PP\_HQ\_MUSIC\_BGT.TP2~

This package contains an automated BGT-compatible WeiDu installer for the 1PP: High Quality Music mods (TotSC/BGII). It will add audio from both BG1 and BG2 1PP packages into the game and optionally patch all areas to make full use of added music.

*1PP HQ music should be installed after all mods that add new ACM audio into the game.*

*BGTMusic mod must be installed - specifically the component "Full Baldur's Gate/Shadows of Amn/Throne of Bhaal Music".*

*As of v1.22 BGT is no longer compatible with High quality music .*

Copy the folder **1pp\_hq\_music\_BGT** and the file **Setup-1pp\_hq\_music\_BGT.exe** into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

Install Component	[High quality music for BGT]?

Successfully installed	[High quality music for BGT]	Press ENTER to exit

### 20.15 BGT Graphical User Interface

~SETUP-GUI.TP2~

With this mod the user interface and for some mods also the background music can be changed. Depending on which mod you play, you can change the GUI any time.

*This mod is included in BGT and will be created during the installation of BGT.*

*You can change the settings of this mod at any time because the remaining installation will not be affected!*

The folder **GUI\_Mods** and the files **Setup-GUI.exe** and **Setup-GUI.tp2** have been copied into your main SoA directory together with BGT-WeiDU.

Double-click the Setup. The DOS dialogue appears:

Install Component	[Game Graphical User Interface (GUI)]?	choose one:

### 20.16 LadeJarl's Tutu GUI v1.8

~TUTUGUI/SETUP-TUTUGUI.TP2~

This is a GUI replacement which will give the game the original Baldurs Gate look. The mod supports 640x480,

## 20. CLOSER INSTALLATION

800X600 and 1024X768 screen resolutions.

*This mod should be installed last, but before the Widescreen mod.*

**Note:** When using this mod you will only be able to choose between 9 kits each character because there is no scroll bar in the kit selection screen.

Copy the folder **TutuGUI** and the file **setup-TutuGUI.exe** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

### 20.17 W\_GUI v0.6b

~W\_GUI/SETUP-W\_GUI.TP2~

This mod is a partial replacement for BG2 ToB GUI - Graphical User Interface. Only a few screens have been redone. This version may be its final release, because the author lost interest in this mod a very long time ago.

*Has to be installed after "BGT-GUI", but before the "Widescreen mod" (if you should use it).*

Copy the folder **W\_GUI** and the file **setup-W\_GUI.exe** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

### 20.18 Widescreen Mod v3.07

~WIDESCREE/WIDESCREE.TP2

This mod allows you to play the game at any desired resolution. It can currently set your resolution to any X by Y, with X >= 800 and Y >= 600. Non-standard resolutions (E.G. 801 by 632) are not supported in fullscreen, but can work in windowed mode. BG cannot be forced to be windowed, but can work at all X by Y, with X >= 640 and Y >= 480.

*This mod must be installed AFTER any mods that alter the GUI.*

Copy the folder **widescreen** and the file **setup-widescreen.exe** into your main SoA directory.  
Double-click the Setup. The DOS dialogue appears:

Choose your language:			0 [English]
Would you like to display the readme?			[N]o

I have not enough information about optimal settings. Maybe users with bigger resolutions as for example 20", 23" or 30" get not happy with this mod.

In theory it may be useful to install the Widescreen mod after Generalized Biffing because you could uninstall the widescreen mod again easily if you don't like it. However - this does not work. For some reasons the game will freeze. Maybe an incompatibility arises with other .exe-patches that were installed before - I don't know. For the moment the install order Thieves Galore - Widescreen - Generalized Biffing is the only working one.

## 20. CLOSER INSTALLATION

You should also be able to uninstall the Widescreen mod in that order. Indeed, this fails now and then and will ruin the whole installation!

### 20.19 BG2 Improved GUI v4.0

~BG2IMPROVEDGUI/BG2IMPROVEDGUI.TP2~

This mod makes some changes and additions to the GUI.

### 20.26 Sandrah Item Restauration

~SETUP-SANDRAHITEM.TP2~

This patch is necessary to prevent that Sandrah's personal items are overpowered at the start of the BG1 part in a BWP installation.

*This patch is required if Sandrah NPC is installed and should be installed AFTER Lolfixer.*

## 20. CLOSER INSTALLATION

Double-click the Setup. The DOS dialogue appears:

### 20.27 Generalized Biffing v2.5

~GENERALIZED\_BIFFING/GENERALIZED\_BIFFING.TP2~

This WeiDU mod allows you to biff the content of the override folder for improved performance, that means the files are converted into the BIF file format and moved into the data folder. The game thereby loads much faster again and the performance is running pretty smoothly without jerking. Differently from BWP's end\_biff it is compatible with the common WeiDU stack uninstall operation.

*This process lasts up to two hours even on a fast computer!*

*Due to technical reasons this mod cannot be installed with the current WeiDU 249 if Infinity Animations is installed before.*

Copy the folder generalized\_biffing and the file setup-generalized\_biffing.exe into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

Install Component [Generalized Biffing]?

*With a full BWP installation the override folder will be reduced from 4,5 GB to 2,2 GB.*

*With a full BWP installation the override folder will be reduced from 4,5 GB to 32 MB.*

The read me then opens.

### 20.28 NPCs Enhanced for Everyone v4.3

~NPC\_EE/NPC\_EE.TP2~

This is a simple alternative to the Level 1 NPCs mod. It enables you to set NPCs to 1st level. Also you can assign a new kit to any of Bioware's NPCs.

*This mod replaces the respective components from the former Scales of Balance mod.*

*This mod should be installed after Generalized Biffing, so you can easily uninstall a component or replace it with another if you are dissatisfied with your choice without the need to install a new megamod.*

*You can install this mod on top of another mod that already had changed the kits - the last installed mod will control.*

*Kits marked (DR) or (S&S) will only be available if you have installed the respective kit from Divine Remix or Song and Silence before.*

Copy the folder npc\_ee and the file setup-npc\_ee.exe into your main SoA directory.

Double-click the Setup. The DOS dialogue appears:

### Hotfixes

These are temporary fixes that work for many players, but don't solve the root of the problem. Copy all files out of the subfolders from **B&G World Fixpack\Hotfixes** into the override directory at the end of installation. Maybe they don't work for all installations!

### BGT MULTIPLAYER

Many people are having problems playing multi-player games, especially those who are behind routers at home. It seem, the only way to play BGT online is using Hamachi. Installing and configuring of Hamachi is very easy. Hamachi works with any kind of routers. Hamachi is available in many languages and for different operating systems

1. Go to <http://www.hamachi.cc> and download Hamachi v1.0.2.5.
  2. There is an excellent guide here:

## BG CLASSIC VS EE

**Baldur's Gate: Enhanced Edition**™ runs with an improved version of the Infinity Engine and includes the entire Baldur's Gate adventure and the "Legends of the Sword Coast" expansion pack.

In addition, the adventure adds three new companions, each of them with new skills that were not available in the original game, each with its own quest and new areas. The new characters are basically mod NPC's, which you can find plenty of free. In addition, there are pit fights, but they are not related to the game.

All other technical enhancements of Enhanced Edition such as bug fixes, use of Baldur's Gate 2 engine, and wide-screen monitor support are already available as free mods for a long time.

**Hint:** Baldur's Gate: Enhanced Edition on GOG includes the download link for the classic Baldur's Gate 1.

**Baldur's Gate II: Enhanced Edition**™ includes the classic Baldur's Gate 2 completely with the "Throne of Bhaal" expansion pack and adds four new companions. Also there are pit fights without any content to the game. All technical enhancements of Enhanced Edition such as bug fixes and widescreen monitor support are already available as free mods for a long time.

Unlike the Classic version, the EE is only available in English, German, Spanish, Italian, voice output is available only in English. Due to the lack of voice output for not English speaking people the EE is not as much fun as the classic version with voiced foreign language.

Most players are disappointed by the Enhanced Editions and say they are not worth the money. Many players' advice is to buy the originals and use fan mods instead - it's a much more satisfying gaming experience.

**Hint:** Baldur's Gate II: Enhanced Edition on GOG includes the download link for the classic Baldur's Gate 2 Complete.

The new story chapter **Siege of Dragonspear** is an extension for Baldur's Gate: Enhanced Edition with 70 new areas and does not work with the original game. It is a confusing story about leaving the city of Baldur's Gate that shall bridge the two main stories. Throughout the story, we also meet old friends as well as new comrades from the Enhanced and four completely new companions. It is available in English only. As long Siege of Dragonspear is not available in other languages than English it will be of no interest to any not English speaking people.

The Enhanced Editions are still being actively developed by Beamdog. When a new official patch is released, the update process removes any outside files, with the effective result being that your mods get wiped out by a new patch. Coupled with the above point, it may mean you cannot use your old saves from modded games.

### Please note:

The **B&G World Project** is meant for the classic version and not for the enhanced edition. You can add more than 500 mods to the game. Most of them and especially the large quest mods will probably never be available for the Enhanced Edition.

For the Enhanced Edition there are about 150 mods available. Most of them had been created for the classic games and were converted to EE, but they have no content for the new NPCs that come with the EE. To solve this problem, you could disable these new characters by a mod, however, what's the reason to play an enhanced edition with disabled enhanced content? Only a few mods are exclusively for the EE.

Other than the BGT mod the EET mod can also merge "Siege of Dragonspear" with the BG1EE and BG2EE games.

This guide describes the installation procedure for the BG classic edition. For the EE the install order will not be the same because the BG1 mods have to be installed before the EET mod. Also most of the listed mods are not available for EE.

## SWORD COAST STRATAGEMS VS BIG PICTURE

What are the differences between SCS & BP really?

BP is a lot older than SCS, existing in some form since 2003. SCS is more modernized, with a very nice program for building scripts on the fly.

The biggest differences in the two mods are in their underlying theories. In SCS the opponents are typically more brutal, more machine-like efficient in their tactics. Their attacks are highly coordinated, well-ordered and difficult to overcome. However, they tend to do the exact same things every time you encounter them. You can have two dozen mage battles in the same game with exact same casting progressions.

BP has similar intelligent AI checks and casting orders, but adds something SCS doesn't: a slight element of randomness. Each spell check comes with the logical checks, but also with a random roll. If it's not met, the spell is ignored for this round. Same with enemy targeting - somewhat random. This can give some extreme cases where opponents become too easy, or even too hard - but in the majority of cases it's right around par. This reflects that in the heat of the fight you can always make a wrong decision.

BP also does a lot to balance characteristics (STR, HP, etc) on individual creatures, and not as a blanket operation (same amounts to everybody, like in Mix Mod e.g.) It fixes errors in creature files, where they were found. It makes sure vanilla casters have proper spell allotments, instead of (e.g.) a few high level spells and a half-dozen magic missiles only. SCS doesn't handle much/any of this. It might add spells to casters, but that would be about it.

The latest versions of BP were set up to take SCS into account as much as possible.

BP is split into dozens of smaller components so to some degree the user can mix & match the two mods.

General Rules of Thumb: Don't install both versions of similar components. Choose either BP or SCS spellcasters not both (Priests & Mages). If you use it, install BP-Ascension (& Improved components) before SCS. [Otherwise, SCS won't offer its additions.] Install the rest of BP after SCS, because BP at least attempts to be compatible.

## BG2FIXPACK VS BALDURDASH

With this subject there are two hardened fronts: opponents and advocates of the BG2Fixpack. Both mods pursue the same purpose: to remove bugs from both original plays.

**Baldurdash** is very static and removes intentionally only essential bugs and avoids changes in the interfaces. The original mod is considered as a standard, however, it is developed no more; now and then from different authors one more component is added which is tuned to their own mod.

**BG2Fixpack** is very dynamic, very well coded and has to the purpose to remove all bugs and carries out in the eyes of a few modders also less important corrections. Besides, some interfaces are changed now and then. This entails that mods which access these interfaces are suddenly no more compatible to the original game.

The modders are forced thereby to adjust their mods again to BG2Fixpack or, however, new problems may arise especially with the older mods which are developed no more. The BG2Fixpack is not accepted by all modders as a new standard. The main reason for the fact is that the BG2Fixpack unfortunately not offers separate components for crucial fixes and for less important fixes which can be also evaluated as a tweak.

One could compare both original mods in unit with the BG2Fixpack with the operating system of a computer: Also this is developed to offer to the user, thus to us to players, more service comfort many these amendments are imperative, some are useful and other are only cosmetics. But every time the third party developers are demanded to adjust their programs. But without this further development no progress is possible and today we would not have the comfort which we know.

Some modders accuse the authors of BG2Fixpack, they would abuse the players as a tester. Doubtless the authors act after best knowledge and conscience. But no mod is perfect. You can't make an omelette without breaking eggs.

A problem exists of course with the mods which are developed no more and whose interfaces are broken by the BG2Fixpack. In this case it would be desirable if the BG2Fixpack provided fixes for these mods.

With a little bit goodwill one could come up to both sides and establish the BG2Fixpack as a new standard. Players won't remark technical details - they only want a functioning megamod.

## KITS

Due to a technical limitation up to now it was not possible to have more than 9 kits per class. More could actually be installed, but not more than 9 of them were available for selection during character creation.

This restriction is now repealed by using the TobEx. This mod adds a scrollbar to the kit selection screen and allows to install up to 1280 kits. But there is still another technical limitation on 255 kits. This is caused by the code inside the mods "Divine Remix" and "Song of Silence". Lollorian changed that code (added by **B&G World Fixpack**) so this limitation is also repealed. Without that, you would get the error message "Invalid\_argument "Char.chr"" during installation and the game will crash when you are going to choose the character skills if you have installed more than 255 kits.

When you also install Refinements, the number of kits will be more than doubled. Nevertheless you don't reach the limitation of 1280 kits and there occur no problems while creating the character. (Maybe later in-game, but that is unknown for now.)

You can install as many kits as want and select them later at start of play in the character selection screen, nevertheless I would not advice to do so. Others than NPCs that you can dismiss from your party anytime if you don't like them you can select a kit only at character creation. It doesn't make any sense to install a lot of kits when you can only use one of them.

There are two kinds of kit mods: those that only add new kits to the submenu without changing already existing kits and those that change all existing kits. Most of the mods that only add kits should not interfere another. Nevertheless I would tend to say choose either only one of the kitpacks because the kits included there are compatible with each other or pick up carefully only a few kits that don't overlap.

If you install several mods that change Bioware and mod kits, there is a high risk that you don't get the result that you expect.

The barbarian, sorcerer and monk don't have kits. So each mod for these classes will overwrite the already existing ones. You will get the benefits of this one you have installed last. The same goes for the Mage Specialization.

Bear in mind that most of these kits are not tested in the BWP. They come with no guarantee of enjoyable gameplay experience with any mod. You are then asked to try them to yourselves. Read the mod readmes thoroughly for incompatibilities.

In order to use Refinements' great HLA tables, it is recommended to install any and all kits before Refinements, cause it changes the HLA tables for all classes and makes duplicates of kits. So, any kits installed after that may not benefit from the revised HLA tables.

There are only a few kit mods which should be installed after Refinements according to their readmes. However, I'm not sure about this. Other than one readme states I got not any crash when installing the kits before. That still has to be investigated by some experienced players.

**Note:** If you decide to install **LadeJarl's Tutu GUI** or **W\_GUI beta** the limitation of nine kits per class exists furthermore because both of them don't have scrollbars. More kits can be installed but not selected in the character screen. For this case the **Mod Kit Remover** was created.

## REMOVING KITS WITH “MOD KIT REMOVER”

This description is obsolete by TobEx and is only useful if you want to install **LadeJarl's Tutu GUI** or **W\_GUI beta**.

The Mod Kit Remover can remove all of the kits in the “Character creation” screen. The mod was primarily made because TDD fills all the slots, but also because players wanted to use kits from other mods. Any component can be installed without having to worry about conflicts. The fighter, ranger, paladin, cleric, druid, magician, thief and bard kits can be individually removed; in each case either just the mod kits (“Remove Mod Kits”) or both mod and BioWare kits (“Remove BioWare and Mod Kits”). All kits already installed will still be useable by NPCs and previously created PCs. Any changes mods have made to the BioWare kits remain active, and kits from other WeiDU-mods can be installed and will be selectable during character creation.

Just install the Mod Kit Remover manually straight before the mod kits you want to install.

*In the following example only the Bioware PaladinKits und Bioware Cleric Kits shall be removed to be able to install other kits.*

## AI MODIFICATIONS

### Quest Pack and Big Picture

Quest Pack has been tested and confirmed compatible with the Big Picture and its associates. Quest Pack's AI and improved creatures may safely be installed alongside BP's. Where overlap arises, BP's changes will take precedence.

### SCS and Big Picture

There are many improvements provided by BP that are not covered by SCS. Many monsters are added, become stronger etc. The AI from SCS is, on the other hand, better than the AI from BP.

The AI of SCS and BP works in rather different ways. There is no problem in using SCS and BP together, but you should be very carefully if you try to mix the AI components to avoid to get unexpected results.

If you choose the option to combine the AI from both mods at the best the configuration has a limited SCS AI mainly for BG1 with the main BP AI. Tests have shown no issues between the two. However, the simplest choice would be to install only the AI from one of them.

### SCS and Quest Pack

Quest Pack's AI and creature enhancements should be compatible with SCS. The components of SCS will override the Quest Pack for the affected creatures. Quest Pack still has some content not influenced by SCS.

## HLA MODIFICATIONS

The HLAs (High Level Abilities) are powerful innate abilities which were introduced by the Throne of Bhaal expansion and can be obtained at higher levels. For example, Whirlwind, Power Attack and Evasion are all HLAs.

With the correct installation order it's possible to install Song and Silence, Rogue Rebalancing and Refinements alongside each other and still obtain the proper benefits of all three mods. The proper install order should be:

- 1) Song and Silence
- 2) Rogue Rebalancing
- 3) Refinements

Song and Silence makes only minor changes to the default Bard and Thief kits. Those changes are fully compatible with Rogue Rebalancing since they were initially based on that mod. Since Song and Silence currently uses the default HLA tables for its new kits, they will be handled by Rogue Rebalancing and/or Refinements in case those mods are installed afterwards.

Refinements doesn't change the kits in any way, it merely alters their HLA tables and replaces the Thief and Bard HLA tables introduced by Rogue Rebalancing with its own version. Both versions are fairly similar though as the Bard HLAs from Refinements were initially based on the Bard HLAs from Rogue Rebalancing.

Rogue Rebalancing is fully compatible with Song and Silence, Refinements, Oversight, Divine Remix und Sword and Fist if these mods are installed in the proper order.

Song and Silence	makes some minor changes to the Thieves and Bards and adds several custom Thief and Bard kits to the game.
Oversight	changes the Monk HLAs.
Divine Remix	changes the Clerics, Paladins, Druids and Rangers
Sword and Fist	improves the Monks
Rogue Rebalancing	alters all Thief and Bard kits in order to bring them more in line with their PnP counterparts. Furthermore, it also changes the Bard HLAs.
Refinements	changes the HLAs of all cases and thereby complements and supersedes the Thief and Bard HLAs from Rogue Rebalancing.
SCS	component Add high-level abilities (HLAs) adds 10th level spells to mages and 8th level spells to priests.
The Tweaks Anthology	component Triple-Class HLA Tables will max out the HLA tables for fighter-mage-thieves and fighter-mage-clerics.
SCS	component Treat mages' and priests' High-Level Abilities as innate abilities causes that the 10th level spells can be cast once per day without the need of learning them before.

With the aforementioned installation order Refinements would only alter the HLAs for Paladins, Specialist Mages, Barbarians, Rangers, Sorcerers, Fighters and their multi-classes.

The HLAs from Divine Remix, Sword and Silence and Oversight might conflict with the HLAs from Refinements. This is not fully tested yet and a more detailed account will follow in the next update of this guide.

In general, completely new custom kits should be compatible with each other. However, if two mods change an already existing Bioware kit then they are most likely going to be incompatible, both from the technical and from the conceptual standpoint. Some kits were coded to use the generic HLA table (the one which their base class uses) and they should generally work fine. However, other kits were coded with different HLA tables which were specifically made for those kits and it is not certain how that would work on a Megamod install.

## XP SETTINGS IN THE MEGAMOD

For the **B&G World Project** we have tried to manipulate the experience points as fair-minded as possible with the XP mods. Without this XP mods all characters would reach with all additional mods too fast too high experience levels and thus make the game too easy.

### BGT

With this mod the experience caps are removed, thus you receive continuously experience points. Besides, BGT reduces the experience points for “open locks” “find traps” and “learning spells”.

### BGT Tweak Pack

With the component “Restore BG2 XP bonus for traps, locks, and scrolls” the suitable experience points that are used by BGT are removed again. Thus is everything again like that, as it is intended for BG1.

### The Tweaks Anthology

With the component “changed experience caps” we have the possibility to remove the ToB-experience caps, so that you can collect consistent experience points up to level 50 in the mega-mod.

### aTweak component “Altered XP rewards from locks, traps and scrolls”

The sub component “Improved (lowered) XP rewards from locks, traps and scrolls” alters the XP rewards to be lower than the vanilla BG2 values.

### BP-Balancer

The “BP-Balancer” is made especially to balance the experience points of the big BG1 mods in the megamod, because some mods give atypical high experience points which do not fit to the game balance of BG1. Besides, it restores again all original experience points that these mods have changed in “Baldur's Gate 1”.

In addition, the “BP-Balancer” has also individual experience points settings for “open locks” “find traps” and “learning spells” that are applied also in BG1 and BG2. We have set the experience points to 10% of the original value of experience. Thereby you receive a diminished number of experience points, but then you have them constantly for BG1 and BG2. Furthermore you get still more than enough of experience points by the additional mods.

### Ding0's Experience Fixer

The “DEFJAM” is made to adjusted the XPs in a megamod. With so many mods there are vast amounts of experience points that would allow to level up the characters too fast and thus to endanger the game balance. Who would like to have in BG2 in chapter 3 already level 20 that actually is intended for “ToB”? This is why it is important for a megamod to reduce the experience points. Players' reports have pointed out that 50% of the original experience points for killing creatures and doing quests are good settings.

### BP-Balancer and Ding0's Experience Fixer

With Ding0's Experience fixer (DEFJAM) the values XP are reduced global with the value of x%.

With the BPBalancer there is consciously no global reduction of the experience for killing enemies but the single mods are anew (specifically) balanced.

Depending on the installed order either the Balancer works on the diminished values of DEFJAM (what would not be bad, because the Balancer sets the values explicitly) or, DEFJAM would reduce the values set by the Balancer once more.

### Summary

The game balance should guarantee well balanced settings in the megamod.

In the original BG1 together with legends of the sword coast you could reach level 8-9. This was the start level for BG2.

With all mentioned settings these values are preserved. However, if you solve all quests in BG1 you have the possibility to get a bonus level that was not possible in the original game. Now you can reach about level 9-10 in BG1. This is anyhow a duplication of the experience points.

Although BG2 has more mods at disposal than BG1, these settings guarantee that the game remains fair up to the end. At the end we have these settings:

- XP levels 50
- learning spells 25
- traps 25
- picking pockets 10

## MAKE WATCHER'S KEEP ACCESSIBLE BETWEEN SOA AND TOB

In roleplaying terms, the natural time to explore Watchers' Keep is between the end of Shadows of Amn and the start of Throne of Bhaal. Before chapter 4 you're probably too weak; in chapters 6 and 7 of SoA you're in a desperate race against time; in ToB, the way the start works makes it difficult not to take random time off from urgent business to explore Watchers' Keep.

This component moves the start location of Throne of Bhaal to Watcher's Keep, so that you're moved there immediately after the end of SoA. You can then explore WK to your heart's content. When you want to start ToB, just leave WK via the world map. You can still return to WK after leaving.

**Be warned:** you don't have any stable base, or any way to change your party, as long as you're starting at WK. If you find you need either, you'll need to do the first part of ToB. Similarly, although you could start a new game of ToB using this component, this is only a good idea if you're masochistic enough to want to solo Watchers' Keep with a starting-level ToB character!

If you install this component you will not be able to access Watcher's Keep during the Shadows of Amn part of the game.

## MULTI-INSTALL TOOL

This program allows several independent side-by-side installs of BGII at minimal size to perform separate installation(s) from BGII, without touching the original game folder. A clone only needs 400 MB space over and above the actual installation!

Additional mods can be installed into a separate folder. You can attach a clone to your game at any point and continue with your installation afterwards. This could be useful for example when you want to play incompatible mods, or when you want to test a new mod at a certain place. If your installation fails, your game folder is untouched!

You can for example create a folder only for the BG1 part of BGT, only for the BG2 part or whatever you want. This works with all mods other than those that are biffed or include a movie file.

Installation of MIT-v5.1 is conditional upon Java Runtime Environment Version 5.0 Update 6 or higher (currently Java Version 6 Update 12) already being installed on your computer. (Download from: <http://www.java.com/de/download/manual.jsp> )

Install version v5.1.10 from <http://forums.gibberlings3.net/index.php?showtopic=9452>

Don't use v5.1.11 or v5.1.12. These versions don't seem to work correctly (You cannot activate the buttons and checkboxes.)

The MultiInstallTool-5.1.10.jar can be placed anywhere, but would be most useful in the Black Isle folder.

Create a folder there for your clone(s), naming it as you wish. Inside this folder create another folder named BGII - SoA. The directory could be named, for example: Black Isle\MIT Clone\TDD Kits\BGII - SoA. Note: The folder must be named BGII - SoA during installation and/or playing of the mods.

Double click the MultiInstallTool-5.1.10.jar. A new window Multi-Install should open.

If your zip program extracts the files instead, you will need to start the program by right-clicking to bring up the context menu, select "open with" and then choose "Java (TM) to 2 Platform Standard edition binary".

Type the path or browse to your BG2 game (Source).

Then type the path or browse to your new installation (Sink).

You can choose some options in the lower pane. Each option will increase the size of the clone directory, but may be required for certain functionality or mods.

Click in the Characters field if you want to import one of the preset characters.

Click in the Save field if you want to import the present score.

Then click Go.

Wait until the progress bar finishes and says 'Done'. *This process lasts several minutes!* Close the window by clicking the close box.

If you begin a game without copying the save folder, the game creates a new one.

The newly-created install will have the same set of patches and mods to start with as the one it was cloned from. You can add mods to the cloned game as per usual and they will not affect any other installation you have on your system.

Note: The folder must be named BGII - SoA during installation and/or playing of the mods

Run the clone with 'bgmain.exe' in the clone folder.

## GENERAL RULE OF THUMB - WHAT CAN BE INSTALLED?

Mod format:	Forget about mods not in the WeiDU format.
Areas:	Mods which change areas are extremely risky, because the area could already have been changed by another mod. Look in the description to see what it is compatible with.
Stores and objects:	Can generally be easily added.
NPCs:	In general can be added, except Nalia and NPCs which change Valygar. NPCs that use ToB are also usually ok.
Tweaks:	Are risky in general and should not be installed without precise instructions.
Script mods	With the exception of the BP Series and gMinion (only this version adapted to mega-mods) none are compatible.
Total Conversions:	As the name suggests, these are complete changes and are absolutely incompatible.

In general, when installing multiple mods, it matters which order you install them in. A rough guide is:

*The BG2 Fixpack*  
*The Ascension mod*  
 Mods which add new quests and similar game content  
 Mods which add new joinable characters  
 Mods which add banter to existing NPCs  
 Mods which add new stores or items  
 Mods which change the spell or item systems  
     *(including Item Revisions and Spell Revisions)*  
 Mods which add new kits or class abilities  
     *Divine Remix*  
     *Song & Silence*  
     *Rogue Rebalancing*  
     *Might and Guile*  
 Mods which tweak aspects of gameplay  
     *Tweaks Anthology*  
     *Scales of Balance*  
     *Sword Coast Stratagems*  
 end-of-order mods

Within each category, as a rule of thumb you should install older mods first. However, there are a lot of exceptions from this rule because of specific dependencies of some mods.

NPC Flirtpack or any romance mod that adds Player-Initiated Dialogues for existing NPCs should be installed after all other banter/romance mods because they have a way of breaking other mods that are installed afterwards.

Beside of this there are many other rules to be considered.

## INSTALLING MODS WITH WEIDU

The WeiDU program allows easy installation of individual mods. Files are added to existing folders as is appropriate, scripts are appended to the proper files, new dialogs are added to the dialog file - in short, the program independently handles all of the complex file allocation.

Most of the mod packages contain a WeiDU-installer Setup-###.exe. But because the mods were produced at different times and WeiDU continues to be developed and updated, different mods may contain different setup versions. This means that immediately after being started, the WeiDU-setup often stops with the message: "WeiDU has finished auto-updating all copies of itself in this directory. Please RE\_RUN Setup-###.exe to actually install the mod." Don't worry, this isn't an error. This just means that when the WeiDU-setup was run, it discovered a more recent version among the previous installs and updated itself. Older setups cannot finish automatically. In this case press enter to finish the program.

Older setups can also give the error message: "TOO BIG FOR WEIDU" or "error loading Dialog.tlk". If this happens, replace the setup file with a copy of the most recent version and rename it as per the original setup file for that mod.

Download the latest version of WeiDU (presently v2.36) and copy the file "WeiDU.exe" into your main SoA directory. When the installer is first started, all setup files will update themselves to this version.

**INSTALLATION** – Install WeiDU-mods using the following steps, repeating for each mod:

Extract your mod to your main SoA directory.

Rename the WeiDU-setup if necessary in Setup-### (same name as the TP2 file).

Double-click the Setup. A DOS-dialog window will open. Enter the following data as required.

If the mod is available in several languages, you will be asked to "Choose your language". Type the number of the appropriate language and press enter.

Next you are asked to "Install Component [###]?" and you have the choices [I]nstall, [N]ot Install and [Q]uit. In each case indicate your choice by typing the letter between the brackets.

Some mods give you several install options of which you can only choose one. Beside "Install Component [###]?" you will have the choices "[N]o, [Q]uit or choose one. Type the number corresponding to the component you want to install.

Some mods consist of several components and you are asked: "Would you like to display the components from [###]?" If you type [Y]es, you can individually select the recommended components. To save time you may choose [N]o to start the default installation. This means some things will be installed, but you won't know which or why. (Many mods may skip this.)

In the next step you are asked: "Install Component [###]" for every single component and you have the choices [I]nstall, or [N]ot Install or [Q]uit? Type the appropriate letter and press enter. Different files are copied and patched. If the dialog "SUCCESSFULLY INSTALLED [###]" appears, the installation went fine.

Finish the program by pressing the enter key, not with the return key. This is required for some mods to begin the audio-decompression. The setup can only be finished when the ReadMe files are closed!

**ADDITIONAL INSTALLATION** - Other individual components can be installed afterwards by repeating the following steps. You are asked "What should be done with all components that are NOT YET installed?" with the choices [I]nstall them, [S]kip them, [A]sk about each one? Press [A]sk to select the components you want and continue as described.

If some components are already installed, you are asked "What should be done with all components that are ALREADY installed?" Make your choice with [R]e-Install, [N]o Change, [U]ninstall or [Q]uit.

**DEINSTALLATION** – The uninstall / reinstall process shows what a brilliant tool the WeiDU-installer is: You can safely uninstall or reinstall a mod which is right at the beginning of your installation chain, even though you may have installed twenty other mods after it. WeiDU uninstalls, from last to first, all the mods installed since the one you want to change, does the uninstall or reinstall, then automatically, in the correct sequence, installs all of the other mods again. This process can last several minutes with an extensive installation!

Do NOT use the option "What should be done with all components that are ALREADY installed?" with mods installed in two steps unless you want to completely remove the mod. You would not only uninstall the recently installed components, but also those from potentially a much earlier point in the install which could cause the installation to rebuild out of sequence.

This will not work with biffed files!

**RE-INSTALLATION** - The steps above repeat again. With mods with several components this time you are asked "What should be done with all components that are ALREADY installed"? Now you have the choice between [R]e-Install them, [U]ninstall them, [S]kip them, [A]sk about each one. Types the according letter and press enter. At a extensive installation this process can last several minutes!

Doing so will not work with biffed files!

**DEINSTALLATION OF BIFFED FILES** - The mods NEJ, all big BG2 mods like TDD, SoS, CtB, TS and, BGT-WeiDU as well as the big BG1 mods DSotSC, NTotSC, SoBH, Drizztsaga, BG1NPC and also BP cannot be uninstalled with WeiDU perfectly!

Follow the special instructions of the respective mods. To return to an absolutely clean state before the installation, please delete following Files and folders from the BG2 main directory.

- the entire override folder
- the entire data folder
- dialog.tlk
- baldur.ini
- CHITIN.KEY
- BGMain.exe
- SETUP-##.DEBUG of the mod
- possibly from the mod generated ##.BAT files

Afterwards open your WeiDU.log file with a text editor and remove the lines generated by the installer of this mod.

Don't remove the setup.exe files until your megamods is not complete. You still need these files in case of a possible reinstallation.

## RESTORATION OF A CLEAN INSTALLATION

Now and then a backup is recommended in the instructions. If you must reatone a part of the installation for any reason, you need to continue the installation only after the backup. There always repeat the same steps:

Delete the following files and folders from your main SoA directory:

- the entire override folder
- the entire data folder
- dialog.tlk
- baldur.ini
- CHITIN.KEY
- BGMain.exe
- WeiDU.log

Copy (do not move) the following files from your main SoA directory into the backup directory:

- the entire override folder
- the entire data folder
- dialog.tlk
- baldur.ini
- CHITIN.KEY
- BGMain.exe (If you had created a no-CD crack, you copy this of course)
- WeiDU.log

## WEIDU.LOCK

With WeiDU 2.00 a function was introduced which prevents that two mods are installed at the same time. Nevertheless, now and then this function becomes also effective, although the preceding installation is concluded. It Appearing the announcement:

You cannot install more than one mod at a time or you will have bugs.

Try to install the mod once again, after the following:

Setup-###.exe has finished.

Make sure in such a case that really only one DOS window is open.

Delete file WeiDU.lock from your main list ...\\BGII - SoA main directory.

Restart the Installer. Now it functions as usual.

## **MODS, BUGS, PATCHES AND FAIR PLAY - HOW BWP WORKS TECHNICALLY AND LEGALLY.**

Gamers and modders sometimes have different views regarding megamods:

Gamers want to download the whole bunch all in one go, preferably in just one gigantic file from a single website.

Modders however would rather gamers only download their mods from their authorized sites. They prefer you visit their homepages and have the opportunity to get additional information about their mods. They also want to ensure that gamers are downloading the correct version of their mod, not one that may have had unauthorised changes made to it.

BWP will satisfy both sides. With the link-list you can download the original mods from their respective authorised sites and install them with batch files. Then you will have the megamod ready to play on your computer.

The required patches are inserted only on your computer. In order to not infringe on any copyrights, BWP includes no modified mods, only instructions on how to install the mod as well as complete solution proposals (the patches and the batch files). If you alter the mods yourself in the privacy of your own home, it is solely by and for yourself and completely legitimate.

This is important information for those players who find a solution themselves, but are uneasy about making it public. The best example is the BGT mod itself. It modifies the complete BG1 game. The modified game may not be distributed, but you can create this modification by yourself on your computer!

It would be unfair to the modders, not to inform them if an error is found. It is also unfair to the players, not to publish a solution due to concern for getting on the wrong side of the modder. Nothing is more frustrating for other players than to read that although a solution has been found to a problem, no patch is available or published. Taking the honourable attitude "Never touch someone other's mod" may mean there will be no further development because it often takes months before an updated version appears, assuming the mod is still generally supported. Also, for any number of reasons, some modders are not interested in making their mod compatible with other mods (including BGT) if they have to add even one single line of code. Such a mod would then not be playable at all.

BWP is working closely with the modders. Once we have a new bug fix, it will be installed with the BWP Fixpack and is immediately available to all players. At the same time, the modder will be informed about the patches made. - Unfortunately, this is no longer continued since Leomars retirement.

Many of the modders support their mods further and as a general rule include the patch with the mod's next update. However, this can sometimes take several months. Until then the patch is able to be used by all players and tested in combination with other mods. Once the correction in the original mod is done and the patch is no longer needed, we delete it again from the Fixpack. This is also helpful for the modders, because it means all the found fixes are bundled up in one place instead of scattered over the whole net. The same is true for all text patches.

This is fair to both sides and has long been accepted. After all, the BWP with its wide dissemination and consistent structure is an enormous and best test platform for the modders.

## DEBUG WARNINGS AND THEIR MEANING

There are in three different kinds of error messages:

### 1. Messages to the mod author without meaning for the game

The following warnings and all similar ones can be ignored:

WARNING: I\_C\_T2: the interjection point (GAELAN 66) has multiple exit transitions that have different actions!

This is a hint to the mod author and ordinarily works with the game. It only means that an additional variable is set up. It is a WeiDU feature and results in no program errors. All interjections were tested extensively so you can be sure of this.

WARNING: REPLACE specifies no WEIGHT for state 109 and DLG uses non-trivial weights. Using weight from DLG (39). [65]

It has no effect on gameplay, but is a reminder to the modder that the modder has not specified what WEIGHT they wanted (the order in which dialogs are evaluated)... so WeiDU is doing it for the modder. It is harmless.

WARNING: Fast SET\_2DA\_ENTRY failed, falling back on old method...

This works, only not in the way WeiDU first tries. It is it a hint to the mod author.

WARNING: [questpack/wilbur/d0nosnd.wav] is a 0 byte file

This can be ignored: it is harmless and intended.

WARNING: EXTEND\_TOP #position 1 out of range 0-1

This means that no changes had to be made to the script because another mod is not installed.

### 2. Typos

Messages like the following are only typos which probably lead to mistakes, because variables are not set. These can be just absent quotation marks or tildes. Not all of these failures are detrimental: the fact that a couple of demons and a vampire aren't as smart as they might be because a matching script block was not found is no big drama, the fact that a mod fails to check charisma correctly won't be noticed - unless you deliberately created CHARNAME with a low charisma to avoid the Ariena romance.

WARNING: cannot verify trigger ~!InParty("Zaiya")~: Failure("lexing: empty token")

should say: ~!InParty("Zaiya")~

WARNING: cannot verify action ~SetGlobal("KiaraChallenge",LOCALS",1)~: Failure("lexing: empty token")

should say ~SetGlobal("KiaraChallenge", "LOCALS",1)~

WARNING: cannot verify trigger ~=InParty("Kiyone") InMyArea("Kiyone")~: Failure("lexing: empty token")

should say: =~InParty("Kiyone") InMyArea("Kiyone")~

WARNING: cannot verify action ~SetTokenObject("DORCNAME",<PLAYER1>)~: Failure("lexing: empty token")

should say: ~SetTokenObject("DORCNAME", PLAYER1)~

WARNING: cannot verify trigger ~CheckStatGT(Player,12,CHR)~: Not\_found

should say: ~CheckStatGT(Player1,12,CHR)~

These and all similar warnings signify typos from the mod author which cause an error in the ACTION.IDS. The suitable script block will fail in the game.

WARNING: cannot verify action ~Global("freebae","GLOBAL",1)~: Parsing.Parse\_error

should say: ~SetGlobal("freebae","GLOBAL",1)~

These and all similar warnings signify errors which cause an error in the ACTION.IDS. The suitable script block will fail

in the game.

It is astonishingly difficult to compare the Debug file and the program code to find a problem which is caused by a single missing type!

**The errors shown are only examples of similar errors. These errors had been corrected of course a long time ago!**

### 3. Error in the program code

Messages like the following must be exactly checked anyway. Whether an error is slight or not, depends on the fact which block is changed: it can mean that some scripts are not installed and thereby some creatures are not as clever as provided, however, can lead also to serious malfunction in the game.

```
WARNING: cannot find block matching [BGTtweak/3/xKAGAIN.BAF]
```

These and all similar warnings, point out that the block to which something should be added has already been changed by a previous mod, which is why this action has failed.

```
Warning: cannot find block matching [redemption/bcs/ AR6200asc.bcs]
```

A special case of the previous one: Redemption and Longer Road search not only for specific script blocks, but also for blocks in files in the override folder. If they are biffed, the installation fails.

```
Not enough arguments to [NumTimesTalkedTo]. Recovering.
```

These and all similar warnings signify an error in the mod. The corresponding script block or dialogue will fail in the game.

### 4. Error caused by a virus scanner

Errors like the following may happen if WeiDU and the virus scanner try to access simultaneously the same file.

```
ERROR: COPY ~bgmain.exe~ ~bgmain.exe~ FAILED: cannot open target
```

```
ERROR: Sys_error("bgmain.exe: Permission denied")
```

It is important to deactivate the virus scanner during the installation to prevent such errors!

## CRASH IN IRENICUS DUNGEON

On Windows 10 you may get a crash at the first auto-save in Irenicus' Dungeon. You will get the error message "abnormal program termination". It is easily to fix:

1. Go to the game folder, right-click on BGMain.exe and select Properties.
2. On the compatibility tab, select bots "Run as administrator" and set compatibility mode to Windows XP.
3. Start new game again.
4. From now on you should be able to save normally.

You could also be unable to save the game and get the message "Save game failed, do you wish to quit?" It seems there are two reasons for this issue. Either there is a file named "temp" (without suffix) being created or there is a default.tot file in the invisible BG2/temp directory. Anyway, the fix is to make a temp folder with a **folder** named default.tot inside in order to prevent BG2 from making such a file.

## CHEAT KEYS / CONSOLE COMMANDS

### Activate Cheats:

Backup the existing baldur.ini file in the main SoA directory ensuring that the extension of your backup file is no longer .ini; for example, rename baldur.ini to baldur.bak. Open the file baldur.ini in the BGII-SoA-folder with a text editor. Add below [Program Options] as the last line: "Cheats=1" (without quotation marks). Then you can open in the game with STRG+Space or CTRL+Space (according to keyboard) a dialog window and enter Cheats. Add below [Program Options] as the last line: "Debug Mode=1" (without quotation marks). Then you can perform following actions during the play.

### Cheat Keys

CTRL+1	Change armor level animation
CTRL+2	Fade screen to black
CTRL+3	Fade screen to normal
CTRL+4	Highlight background-interactive objects
CTRL+5	Displays animation information
CTRL+6	Change avatar animation previous
CTRL+7	Change avatar animation next
CTRL+8	Highlights the text boxes
CTRL+9	Highlight the sprites
CTRL+0	Unknown
CTRL+A	Animation avatar (see CTRL+S)
CTRL+C	Jump to next chapter
CTRL+D	Display some numbers (framerate related?)
CTRL+E	Alters visual range
CTRL+F	Turn the character
CTRL+G	Display list of areas loaded in cache
CTRL+H	(TOB only) Sets a specific Surge for wild magic 1-100
CTRL+I	Selects animation (see CTRL+L). Can force banter.
CTRL+J	Teleport to cursor position
CTRL+K	Creature under cursor kick out party
CTRL+L	Plays animation (selected by CTRL+I)
CTRL+M	(Followed by ENTER) Debug Dump
CTRL+P	Keep screen centred on selected character
CTRL+Q	Creature under cursor joins party
CTRL+R	Heals character under cursor
CTRL+S	Select avatar animation
CTRL+T	Advance game time 1 hour
CTRL+U	Temporarily highlight Doors + Ground Objects
CTRL+X	Extended position information
CTRL+Y	Kills creature under cursor

### Console Commands

CLUAConsole:AddGold(<int>)	Adds the gold specified by <int> to the party.
CLUAConsole:AddSpell("<string>")	Adds the spell specified by <string> to the selected character.
CLUAConsole:AdvanceRealTime(<int>)	Advances the in-game 'real time' counter.
CLUAConsole:CreateEngine(<int>)	Unknown - seems to start a new single (0) or multi (1) player game.
CLUAConsole:CreateCreature("<string>")	Creates the creature specified by <string>. The name that is entered must be six characters or less. If the desired character has a name longer than that, only enter the first

	six letters.
CLUAConsole:CreateItem("<string>",<int1>,<int2>,<int3>)	Creates the item specified by <string>. The parameters control the amount/charges of the item.
CLUAConsole:CreateVEFVidCell("<string>")	Plays the VVC specified by <string>.
CLUAConsole:DisplayAllBAMFiles()	Plays all graphic files in order.
CLUAConsole:DisplayText("<string>")	Displays the text specified by <string>.
CLUAConsole:EnableCheatKeys(<int>)	Enables (1) or disables (0) cheat keys, based on the value of <int>.
CLUAConsole:ExploreArea()	Explores the current area.
CLUAConsole:GetGlobal("<string>",<string2>")	Displays the variable specified by <string1> (of type <string2>).
CLUAConsole:LogMessages(<int>)	Enables logging of game messages?.
CLUAConsole:LogSet("<string>")	Filename to log message to?.
CLUAConsole:MoveToArea("<string>")	Move the selected characters to the area specified by <string>.
CLUAConsole:PlayMovie("<string>")	Plays the movie specified by <string>.
CLUAConsole:PlaySound("<string>")	Plays the sound specified by <string>.
CLUAConsole:SetCurrentXP("<int>")	Sets the XP of the selected character to <int>.
CLUAConsole:SetDisableBrightest	Unknown
CLUAConsole:SetGlobal("<string1>",<string2>",<int>)	Sets the variable specified by <string1> (of type <string2>) to the value of <int>.
CLUAConsole:SetLimitTransparency(<int>)	Unknown.
CLUAConsole:SetWaterAlpha(<int>)	Unknown
CLUAConsole:SetWeather(<int>)	Sets the current weather. 0 = standard, 1 = rain, 2 = snow
CLUAConsole:StartStore("<string>")	Starts the store specified by <string>.
CLUAConsole:StrrefOn()	Strings are displayed with their associated strref numbers.
CLUAConsole:StrrefOff()	Strings are not displayed with their associated strref numbers.
CLUAConsole:TestAllDialog()	Lists all dialog file in the game, and checks for errors.

While the console is enabled, the following cheat is also enabled:

At the stat distribution screen, pressing CTRL+8 will yield maximum stat value.

## TRANSLATION OF MODS

Many of the used mods are possibly not available yet in your language. Hence, translation is very important and voluntary translators are urgently searched.

### .tra files

Translation of mods is very simple: Most of the mods include already a folder with one or several files with the ending .tra in the source language (e.g., Language/English). Copy this folder and rename it into your language (e.g., Language/German).

Open the .tra files with a text editor and simply overwrite the text between the tildes “~” with your translation. Every string within a dialog file begins with “@0 = ~”, “@1 = ~” “@2 = ~” et cetera and ends in each case with “~”.

If a string however follows on a flag enclosed with quotes it must be enclosed with tildes. For example: for example: JOURNAL @7, but “JOURNAL” ~@7~ or REPLY @5 but “REPLY” ~@12~

**NOTE:** There is a limitation to the length of the strings of maximal 4096 characters. Longer strings will lead to crash if the string is called.

In some texts the main character is addressed directly. Depending on whether the main character is male or female the texts varies. These text variations are written one after the other, thus: @123 = ~I am the son of Bhaal.~ ~I am the daughter of Bhaal.~

If sound references are given, it looks thus: @1234 = ~male dialog string~ [SOUND01] ~female dialog string~ [SOUND01] Both sound files can also be different.

### Placeholder (token)

In some strings place holders are used. These are replaced in the game with different variables. The texts between the sharp brackets < > may be never translated.

Only in some foreign languages: If in a string the token cannot be applied because the sentence would not be grammatically correct, for example, or a word should be at the beginning of a sentence but the token begins with a small letter (e.g., <my son>) the entries must be created in two variants, once as a male (given) string and once as a female string.

Mostly the token refer to the character being spoken to. If is spoken about the main character in a conversation, must be preceded “PRO\_”. Example: “<CHARNAME> is actually quite nice, even if <PRO\_HESHE> is sometimes strange.”

*Only in some foreign languages:* Other than in the English original string the token <MANWOMAN> and <PRO\_MANWOMAN> can be used only in collocations because of the included declension!

Also <BROTHERSISTER>, <PRO\_BROTHERSISTER>, <LADY'S LORD>, <PRO\_LADYLORD>, <SIRMAAM> and <PRO\_SIRMAAM> can not be used in the translation at the beginning of a sentence.

Several token are used for the time specification and are irrelevant in the translation; they are listed only for the sake of completeness.

<BROTHERSISTER>	Returns “brother” or “sister” depending on the gender of the person being spoken to.
<CHARNAME>	Returns the name of the PC.
<DAY>	Returns the current numerical day.
<DAYANDMONTH>	Returns the current numerical day as well as the month. (Example: It is <DAYANDMONTH>, would produce: It is 24 Mirtul...or whatever the current day and month happens to be.)
<DAYNIGHT>	Returns “day” or “night” depending on if it's daytime or night-time in the game world.
<DAYNIGHTALL>	Returns “morning” from 6am (6) to 11:59am, “afternoon” from Noon (12) to 5:59pm, “evening” from 6pm (18) to 9:59pm. and “night” from 10pm (22) to 5:59am (game world times).
<DURATION>	Returns the elapsed time from the start of the game in days and hours. (Example:

	We've been around for <DURATION>, would produce: We've been around for 23 days and 13 hours...or whatever the elapsed time happens to be.)
<DURATIONNOAND>	Returns the same thing as <DURATION> except it omits the and. So it would be 23 days 13 hours rather than 23 days and 13 hours.
<GABBER>	Returns the name of the current speaker. (Example: If I use Jaheira and click-talk her on a creature rather than using the PC, this would return Jaheira if used in a dialogue.)
<GAMEDAY>	Returns the current game day. (Starts at 1 for a new game.)
<GAMEDAYS>	Returns the number of game days that have elapsed since the start of the game. (Starts at 0 for a new game.)

<HESHE>	Returns "he" or "she" depending on the gender of the person being spoken to.
<HIMHER>	Returns "him" or "her" depending on the gender of the person being spoken to.
<HISHER>	Returns "his" or "her" depending on the gender of the person being spoken to.
<HOUR>	Returns the current hour of the day in numerical 24 hour format.
<LADYLORD>	Returns "Lady" or "Lord" depending on the gender of the person being spoken to.
<LEVEL>	Returns the experience level of the person being spoken to.
<MALEFEMALE>	Returns "male" or "female" depending on the gender of the person being spoken to.
<MANWOMAN>	Returns "man" or "woman" depending on the gender of the person being spoken to.
<MINUTE>	Returns the current number of real-time minutes (0-59) that have passed in the last hour.
<MONTH>	Returns the current game month as a number.
<MONTHNAME>	Returns the current month's name. (Example: It is <MONTHNAME>, would produce: It is Mirtul...or whatever the current month is in your game.)
<NUMBER>	Returns a random number
<PLAYER6> - <PLAYER6>	Returns the name of the party character in the specified internal party slot. (The main character is always PLAYER1.)
<PRO_BROTHERSISTER>	Returns "brother" or "sister" depending on the main character's gender.
<PRO_GIRLBOY>	Returns "girl" or "boy" depending on the main character's gender.
<PRO_HESHE>	Returns "he" or "she" depending on the main character's gender.
<PRO_HIMHER>	Returns "him" or "her" depending on the main character's gender.
<PRO_HISHER>	Returns "his" or "her" depending on the main character's gender.
<PRO_LADYLORD>	Returns "Lady" or "Lord" depending on the main character's gender.
<PRO_MALEFEMALE>	Returns "male" or "female" depending on the main character's gender.
<PRO_MANWOMAN>	Returns "man" or "woman" depending on the main character's gender.
<PRO_RACE>	Returns the main character's race.
<PRO_SIRMAAM>	Returns "sir" or "ma'am" depending on the main character's gender.
<PRO_SONDAUGHTER>	Returns "son" or "daughter" depending on the main character's gender.
<RACE>	Returns the race of the person currently being spoken to.
<SIRMAAM>	Returns "sir" or "ma'am" depending on the gender of the person being spoken to.
<SONDAUGHTER>	Returns "son" or "daughter" depending on the gender of the person being spoken to.
<TM>	Returns the "TM" trademark symbol.
<YEAR>	Returns the current year in numerical format. (Example: It is <YEAR> currently, would produce: It is 1369 currently...or whatever year it is in your game.

## TREP

Using the translation tool TREP is highly recommended. <http://www.blackwyrmlair.net/Tools/trep.php>

This simplifies the job immensely. In two windows the original string as well as the translation string are clearly arranged. In addition, one can search with it bugs, renumber strings consecutively and a lot more. In some languages there are additional auxiliary modules available which give additional advices during translation as for example how to use the place holders.

If you do not want to use the tool, you should load after the completion of the translation at least once the translated files into this tool and save anew. The tool examines for proper function and corrects missing tildes "~" what often happens with translations.

## Converting of .d files into .tra files

If in the mod still no tra files exist, these can be easily generated. Use for this the tool traify.bat from the BiG World Installpack.

Please, never translate .d files, but convert them into tra files before. Otherwise errors happen very easily and it is nearly impossible to correct them afterwards. And much more worse: If the mod author changes the .d files with an update, your whole translation fits no more to the new mod version.

Please, NEVER traify any translated .d file, but always only the original .d file! Background: WeiDU recognizes identical strings in a dialog and assigns to them only one single number, even if the string exists several times. If now in your translation the smallest divergence appears (this can be even a single space or point), WeiDU assigns for this string an other string number. That means you have in the translation one string more than in the original with the result that every dialog behind moves around one position and in the game will appear absolutely wrong dialogs!

## Language directory

At the end you must create the language list in the tp2 file. Open the Setup-Modname.tp2 and insert the following before the BEGIN:

```
AUTO_TRA ~Mod directory\%s~
```

```
LANGUAGE ~English~
~English~
~Mod directory\English\Setup.tra~
```

```
LANGUAGE ~German~
~German~
~Mod directory\German\Setup.tra~
```

(Type in here your language instead of German)

## Text conversion

Translation of foreign-language mods with foreign characters.

If you want to translate mods from the Polish, Hungarian, Greek or Chinese language, you first are confronted with the problem that see your only a weird character sequence as for example £~İàİ~Ö½,è²»¿Éµþ¼Ö which you can not do anything with. This results from the fonts preset on the computer for our language area. First the font must be converted. This is especially simple with the program "EditPad Lite" (Freeware!)

Open therefore in that program the file which you want to convert. Go in the menu bar to the menu item "Convert" and select there the line "Text Encoding". In the window that opens now you see on top the original text. Select afterwards the suitable encoding to make the text readable:

for Chinese: Windows 936:	Simplified Chinese GBK; note: a character font must be selected which contains the script Hangul (e.g., @Dotum)
for Korean: Windows 949:	Korean; note: a character font must be selected which contains the script Hangul (e.g., @Dotum)
for Polish: Windows 936:	Central European
for Russian: Windows 1251:	Cyrillic

Now below the text will be displayed in a readable matter. You can copy this text and insert it into the Google or Yahoo online translator and translate. However, it needs sometimes a lot of imagination to formulate from it a flawless sentence in your language. The online translator cannot substitute real knowledge of languages.

## ACKNOWLEDGMENT

The **BiG World Project**, the **BiG World Project** install guide, the **BiG World Installpack** and other tools have been initiated and developed by me, Leonardo Watson. Over the course of time the BWP had been supported by countless aides.

Special thanks to (in alphabetical order):

aVENGER	for his professional advice and partial translation.
Clan REO	support of the Spanish version
Daniel von Braun	for the cover and the drawings
Dabus	programming of the installation-tool BiG World Setup
Davor	for his adjusted install.bat file
Durandil	for the Windows Vista introduction videos
erebusant	for his compatibility improvements (although he never was involved in BiG World Projekt directly)
Fennek der Schwarze:	support the tactical version and their mods
Fiona	for proof-reading the English release
horred the plague	for his efforts to make his Big Picture mod as compatible as possible with the BWP
Jarno Mikkola	for his support at Spellhold Studios
Leomar	my right hand for a long time, support and public relations
Lich aka 10th:	support and problem solving
Lokadamus	for the first attempt at a mega-mod installer, the BGT-NPCSound-Patch and his professional advice
Lollorian	for creation of fixes and for his support at Spellhold Studios
Manduran	for the BP-Balancer and his professional advice
Marvin	for the collection of all the links for the megamod and for his untiring troubleshooting
micbaldur	for his extensive tests and detailed reports
Miloch	for his compatibility enhancements
MK	for the textpatches, his advice and hands on assistance
Prowler & Silent	support of the Russian version
Steffen	for the compilation of the download packages (although they are no longer available)
Taimon	for the revised BGT-NPC Sound-Patch, his fixes, his brilliant tools and his professional advice
The Imp	for his support at Spellhold Studios
Weigo	for creating his biffer and his professional assistance, both practical and advisory
